Eighteen million Vespas have buzzed their
way into the world since 1946. Stood end
to end, they would form a line measuring
32,000 kilometres – 20,000 miles – in
length. This is an almost inconceivable
statistic, as with many things that
transcend conventional measures and at
some point achieve cult status. How did
the little machine come so far? The
answer is simple. The Vespa has always

remained the Vespa, true to itself, and has
what others lack: real character! This
book tells the Vespa 's story via over 470
photos, corrects many misconceptions and
lets the reader become immersed in the
culture of Vespa and la bella vita.
