Personality Disorders: Toward the DSM-V offers a scientifically balanced evaluation of competing theoretical perspectives and nosological systems

for personality disorders. Editors William T. O'Donohue, Scott O. Lilienfeld, and Katherine A. Fowler have brought together recognized authorities in the field to offer a synthesis of competing perspectives that provide readers with the richest and most nuanced assessment possible for each disorder. The result is a comprehensive, current, and critical summary of research and practice guidelines related to the personality disorders. Key Features
Focuses on controversies and alternative conceptualizations: Separate chapters are dedicated to each personality disorder and considered from various points of view. Presents authoritative perspectives: Leading

scholars and researchers in the field provide a critical evaluation of alternative perspectives on each personality disorder. Frames the current state of personality disorder research and practice issues: Cutting edge and streamlined research is presented to be used in courses on diagnosis, assessment, psychopathology and abnormal psychology, especially those that include the DSM-IV. Offers an integrative understanding of elusive personality categorizations: Wherever possible, case examples are offered as illustrations of each disorder's clinical presentation. Minimizes the use of technical terms: Each contributor takes the approach of a user-friendly summary

and integration of major trends, findings, and future directions. Intended Audience This is an excellent supplementary text for advanced undergraduate and graduate courses on adult psychopathology in the departments of psychology, psychiatry, social work, counseling, and marriage and family therapy.

the experienced mechanic. The service manual by Clymer is an authoritative piece of DIY literature and should provide you the confidence you need to get the job done and save money too.

The Motorbike Book Haynes Manuals N. America, Incorporated

This clinical casebook is comprised of surgical cases involving the most important cardiovascular diseases in a concise, easy-to-read format (5x8 in trim size, like other titles in this burgeoning, informal product line in the Springer clinical medicine program). Each chapter is a case that opens with a unique clinical presentation, followed by a description of the diagnosis, assessment and management techniques used to treat it, as well as questions and answers (between 8 and 10) about relevant aspects related to the diagnosis and treatment of the addressed

disease. The Q&A section will broaden discussion and increase the title's pedagogical value. The casebook features 40 surgical cases in the following thematic areas: Aortic Disease, Arrhythmias, Cardiac Tumors, Coronary Insufficiency, Congenital Heart Disease, Endovascular Therapies, Heart Failure, Heart Transplantation, Mechanical Circulatory Support, Pericardial Disease, Pulmonary Embolism and Valvular Heart Disease. This book will be prepared by the Brazilian Department for Academic Leagues of Cardiovascular Surgery, within the Brazilian Society of Cardiovascular Surgery (BSCVS). This department is the section within BSCVS that consists of the academic leagues of cardiovascular surgery from each university throughout the country. In Brazil, medical academic leagues are organizations that gathers students, interns and residents to discuss a certain topic and promote research

and teaching-oriented extra-class activities, supervised by a group of professors. Thus trainees will have involvement in writing the chapters and the senior professor supervisors will edit and finalize the work. Basically, each chapter is written by an intern or resident and, ultimately, his/her supervisor. As the books volume editors, doctors Almeida and Jatene will have final responsibility for the cases and overall manuscript.
