Diary Of Dorkius Maximus Mint Editions
This book is written for scientists and engineers whose work involves wave reflection or transmission. Most of the book is written in the language of electromagnetic theory, but, as the title suggests, many of the results can be applied to particle waves, specifically to those satisfying the Schrödinger equation. The mathematical connection between electromagnetic s (or TE) waves and quantum particle waves is established in Chapter 1. The main results for s waves are translated into quantum mechanical language in the Appendix. There is also a close analogy between acoustic waves and electromagnetic p (or TM) waves, as shown in Section 1-4. Thus the book, though primarily intended for those working in optics, microwaves and radio, will be of use to physicists, chemists and electrical engineers

studying reflection and transmission of particles at potential barriers. The techniques developed here can also be used by those working in acoustics, oceanography and seismology. Chapter 1 is recommended for all readers: it introduces reflection phenomena, defines the notation, and previews (in Section 1-6) the contents of the rest of the book. This preview will not be duplicated here. We note only that applied topics do appear: two examples are the important phenomenon of attenuated total reflection in Chapter 8, and the reflectivity of multilayer dielectric mirrors in Chapter 12. The subject matter is restricted to linear classical electrodynamics in non-magnetic media, and the corresponding particle analogues.

The number of bicyclists is increasing in the United States, especially among the working class and people of color. In contrast to the demographics of bicyclists in the United States, advocacy for bicycling has focused mainly on the interests of white upwardly mobile bicyclists, leading to neighborhood conflicts and accusations of racist planning. In *Bike Lanes Are White Lanes*, scholar Melody L. Hoffmann

argues that the bicycle has varied cultural meaning as a “rolling signifier.” That is, the bicycle’s meaning changes in different spaces, with different people, and in different cultures. The rolling signification of the bicycle contributes to building community, influences gentrifying urban planning, and upholds systemic race and class barriers. In this study of three prominent U.S. cities—Milwaukee, Portland, and Minneapolis—Hoffmann examines how the burgeoning popularity of urban bicycling is trailed by systemic issues of racism, classism, and displacement. From a pro-cycling perspective, *Bike Lanes Are White Lanes* highlights many problematic aspects of urban bicycling culture and its advocacy as well as positive examples of people trying earnestly to bring their community together through bicycling.

mathematics to primary children. Tried and tested, the fifth edition of Derek Haylock’s much loved textbook matches the 2014 curriculum requirements for England. Every chapter integrates children’s learning, classroom practice, and teacher’s own requirements for subject knowledge, making this the ideal text to guide you through your studies and beyond. More than just a book! The new edition is supported by FREE access to an interactive eBook and a companion website allowing you to use a wealth of teaching and learning resources. You can use the eBook to study where and when you want, and read, annotate and search the book on a tablet, laptop or PC. You can also visit study.sagepub.com/haylock5e to access: Videos by the author introduce core themes of each section and explain key mathematical processes. Links to the National Curriculum specify the statutory requirements for primary schools in England that relate to the mathematical content of each chapter. Learning and Teaching points highlight important issues you may face in the classroom and provide practical guidance for teaching. Self-assessment questions help check your

understanding and provide immediate feedback to see how well you have done. Select SAGE journal articles to support literature reviews and wider reading. Lesson Plan Activities by Ralph Manning support content-focused chapters and contain creative mathematics tasks across the primary age range. A Student Workbook is also available to accompany this book, including over 700 practice problems to help you understand, apply and teach primary mathematics. Derek Haylock is an education consultant and writer with a background in mathematics teaching, teacher education and classroom-based research in mathematics education. Ralph Manning is an independent consultant in primary education. He has worked as a primary teacher and as a lecturer in primary teacher education for 18 years, following a career in IT. *interactivity only available through VitalSource eBook

Vivien Stern contends that prisons, a mainstay of punishment, are an anachronistic and probably counterproductive system for dealing with rising crime rates. Arguing that inherent flaws in the institution of prison threaten democratic values and fail to meet the needs of modern society, she makes a powerful case for implementing radical change. Stern first discusses the evolution of imprisonment and then explores how different areas of the world approach and use incarceration as a punitive measure. She looks at life in prison across regions and across cultural traditions, describing the personal and very disturbing experiences of prisoners as well as the treatment of minorities, women, and juveniles. According to Stern, prison is a deformed society, a place of violence, corruption, and gross human rights abuses. The author considers the many

courageous efforts being made around the world to improve prisons and mitigate their built-in destructiveness, and she advocates searching for a better solution to control criminal offenses in an increasingly divided and dangerous society. Instead of locking up yet more people, she calls for a practical and positive system that reconciles and heals the breaches caused by crime. This hard-hitting, comparative study of imprisonment exposes the waste, the horror, and the heroism of the growing worldwide business of incarceration.

Dorkius Maximus is a young boy growing up in ancient Rome. This hilarious diary recounts his exploits as, desperate to become a great Roman hero, Dorkius enlists the help of his father's friend, Stoutus, to teach him the noble art of fighting. But heroism doesn't come naturally to Dorkius. Plus, his dad doesn't listen to him, his friends pick on him, and his mum is more interested in her sacred chickens. Dorkius knows there's a mighty warrior inside him, just waiting to get out ... isn't there? Humorously illustrated by Andrew Pinder, this book will delight any child who would like to get a taste of life as an ancient geek.

Why did prehistoric people start making music? What does every postwar pop song have in common? A "masterful" tour

of music through the ages (Booklist, starred review). Music is an intrinsic part of everyday life, and yet the history of its development from single notes to multi-layered orchestration can seem bewilderingly specialized and complex. In his dynamic tour through 40,000 years of music, from prehistoric instruments to modern-day pop, Howard Goodall does away with stuffy biographies, unhelpful labels, and tired terminology. Instead, he leads us through the story of music as it happened, idea by idea, so that each musical innovation—harmony, notation, sung theater, the orchestra, dance music, recording, broadcasting—strikes us with its original force. He focuses on what changed when and why, picking out the discoveries that revolutionized man-made sound and bringing to life musical visionaries from the little-known P é rotin to the colossus of Wagner. Along the way, he also gives refreshingly clear descriptions of what music is and how it works: what scales are all about, why some chords sound discordant, and what all post-war pop songs have in common. The story of music is the story of our urge to invent, connect, rebel—and entertain. Howard Goodall's beautifully clear and compelling account is both a hymn to human endeavor and a groundbreaking map of our musical journey.

Filipino Americans have a long and rich history with and within the United States, and they are currently the second largest Asian group in the country. However, very little is known about how their historical and contemporary relationship with America may shape their psychological experiences. The most insidious psychological consequence of their historical and contemporary experiences is colonial mentality or internalized oppression. Some common manifestations of this phenomenon are described below:

- Skin-whitening products are used often by Filipinos in the Philippines to make their skins lighter. Skin whitening clinics and businesses are popular in the Philippines as well. The "beautiful" people such as actors and other celebrities endorse these skin-whitening procedures. Children are told to stay away from the sun so they do not get "too dark." Many Filipinos also regard anything "imported" to be more special than anything "local" or made in the Philippines.
- In the United States, many Filipino Americans make fun of "fresh-off-the-boats" (FOBs) or those who speak English with Filipino accents. Many Filipino Americans try to dilute their "Filipino-ness" by saying that they are mixed with some other races. Also, many Filipino Americans regard Filipinos in the Philippines, and pretty much everything about the Philippines, to be of "lower class" and those of the "third world." The historical and contemporary reasons for

why Filipino -/ Americans display these attitudes, beliefs, and behaviors - often referred to as colonial mentality - are explored in *Brown Skin, White Minds*. This book is a peer-reviewed publication that integrates knowledge from multiple scholarly and scientific disciplines to identify the past and current catalysts for such self-denigrating attitudes and behaviors. It takes the reader from indigenous Tao culture, Spanish and American colonialism, colonial mentality or internalized oppression along with its implications on Kapwa, identity, and mental health, to decolonization in the clinical, community, and research settings. This book is intended for the entire community - teachers, researchers, students, and service providers interested in or who are working with Filipinos and Filipino Americans, or those who are interested in the psychological consequences of colonialism and oppression. This book may serve as a tool for remembering the past and as a tool for awakening to address the present. From Hand to Mouth Legare Street Press

"We travel rapidly in these historical

sketches. The reader flies in his express train in a few minutes through a couple of centuries. The centuries pass more slowly to those to whom the years are doled out day by day. Institutions grow and beneficently develop themselves, making their way into the hearts of generations which are shorter-lived than they, attracting love and respect, and winning loyal obedience; and then as gradually forfeiting by their shortcomings the allegiance which had been honorably gained in worthier periods. We see wealth and greatness; we see corruption and vice; and one seems to follow so close upon the other, that we fancy they must have always co-existed. We look more steadily, and we perceive long periods of time, in which there is first a growth and then a decay, like what we perceive in a tree of the forest." FROUDE, *Annals of an English Abbey*.
