Eight proven principles to help you overcome your self-doubt, conquer your fear of the future, reverse negative thoughts about yourself, and hurdle any other obstacles standing between you and your dreams. But instead of letting his circumstances control him, Dr. Carson took control of his attitude and actions, leading to his discovery of eight straightforward but revolutionary principles that helped shape his future. In *You Have a Brain*, Dr. Carson unpacks the eight important parts of T.H.I.N.K. B.I.G.—Talent, Honesty, Insight, Being Nice, Knowledge, Books, In-Depth Learning, and God—and presents the stories of people who demonstrated those things in his life. Through the advice and real-world examples laid out in these pages, you will learn how to incorporate these T.H.I.N.K. B.I.G. principles into your own life so that you, like Dr. Carson, can embrace an amazing future filled with incredible success. *You Have a Brain*: Includes discussion questions at the back of the book Unpacks the eight essential parts of *Thinking Big*: Talent, Honesty, Insight, Strong People Skills, Knowledge, Books, In-Depth Learning, and God Is written by Dr. Ben Carson, a world-renowned neurosurgeon, former presidential candidate, and current Secretary of Housing and Urban Development (HUD) Teaches great life lessons for young men and women Is the perfect gift for high school and college graduations, birthdays, and confirmations, and a great addition to YA book clubs and YA study groups

Report of the Proceedings of the Third Teacher Education Conference Legare Street Press

Through a multi-sited qualitative study of three Kenyan secondary schools in rural Taita Hills and urban Nairobi, the volume explores the ways the dichotomy between “Western” and “indigenous” knowledge operates in Kenyan education. In particular, it examines views on natural sciences expressed by the students, teachers, the state’s curricula documents, and schools’ exam-oriented pedagogical approaches. O’Hern and Nozaki question state and local education policies and practices as they relate to natural science subjects such as agriculture, biology, and geography and their dismissal of indigenous knowledge about environment, nature, and sustainable development. They suggest the need to develop critical postcolonial curriculum policies and practices of science education to overcome knowledge-oriented binaries, emphasize sustainable development, and address the problems of inequality, the center and periphery divide, and social, cultural, and environmental injustices in Kenya and, by implication, elsewhere. “In an era of environmental crisis and devastation, education that supports sustainability and survival of our planet is needed. Within a broader sociopolitical context of post-colonialism and globalization, this volume points out possibilities and challenges to achieve such an education. The authors propose a critical, postcolonial approach that acknowledges the contextual and situational production of all knowledge, and that de-dichotomizes indigenous from ‘Western’ scientific knowledge.” Eric (Rico) Gutstein, Professor, Curriculum and Instruction, University of Illinois at Chicago (USA)

Blossoms of the Savannah East African Publishers

In 1995, this novel won both the Jomo Kenyatta Literature Prize, and the Commonwealth Writers Prize Best First Book in the Africa Region. Now reprinted, it remains in great demand. An epic story spanning cultures, it tells the lives of three generations of women. It traces the story of Akoko in her rich traditional Luo setting, through to the children who live and die in the 20th century.

The very best of the world’s best researchers have discovered a way to develop Africa: Way Omega. Now Africa’s heads of state are at a summit to approve it. If they do, it promises Africa will start developing immediately. Unknown to the summit are aggrieved conspirators plotting to defeat Way Omega and replace it with a rival strategy: Path Alpha. Their path, they say, is the only way. Should the summit still follow Way Omega, or make a U-turn? *Fathers of Nations* is a satire on contemporary African politics.

Fathers of Nations Letts & Lonsdale

Betrayal in the City, first published in 1976 and 1977, was Kenya’s national entry to the Second World Black and African Festival of Arts and Culture in Lagos, Nigeria. The play is an incisive, thought-provoking examination of the problems of independence and freedom in post-colonial African states, where a sizeable number of people feel that their future is either blank or bleak. In the words of Mosese, one of the characters: “It was better while we waited. Now we have nothing to look forward to. We have killed our past and are busy killing our future.”--Page 4 of cover.

Proceedings of the International Seminar Held at the University of Dundee, Scotland, UK on 7 September 1999 Paul Vitta

This open access book is a comparative analysis of recent large scale education reforms that broadened curriculum goals to better prepare students for the 21st century. The book examines what governments actually do when they broaden curriculum goals, with attention to the details of implementation. To this end, the book examines system level reforms in six countries at various levels of development. The study includes system level reforms in jurisdictions where students achieve high levels in international assessments of basic literacies, such as Singapore and Ontario, Canada, as well as in nations where students achieve much lower levels, such as Kenya, Mexico, Punjab-Pakistan and Zimbabwe. The chapters examine system-level reforms that focus on strengthening the capacity to teach the basics, as in Ontario and Pakistan, as well as reforms that aim at building the capacity to teach a much broader set of competencies and skills, such as Kenya, Mexico, Singapore and Zimbabwe. The volume includes systems at very different levels of spending per student and reforms at various points in the cycle of policy implementation, some just starting, some struggling to survive a governmental transition, and others that have been in place for an extended period of time. From the comparative study of these reforms, we aim to provide an understanding of how to build the capacity of education systems to teach 21st century skills at scale in diverse settings.

The River and the Source Thomas Telford

Concrete will be the key material for mankind to create the built environment of the next millennium. The requirements of this infrastructure will be both demanding, in terms of technical performance and economy, and yet be greatly varied, from architectural masterpieces to the simplest of utilities. Exploiting wastes in concrete forms the Proceedings of the one day International Seminar held during the Congress, Creating with concrete, 6-10 September 1999, organised by the concrete technology unit, University of Dundee.

Benefiting from Basic Education, School Quality and Functional Literacy in Kenya Longhorn Kenya

Chronicles one man's experiences of the Sudanese civil war in the late 1980s, from the terror and violence of his homeland, to his tortuous escape, to the culture shock he encountered while adjusting to a new life in the United States.

Learning Activities, Grade 1 National Geographic Books

Blossoms of the Savannah is the story of two sisters, Taiyo and Resian, who are on the verge of womanhood and torn between their personal ambitions and the humiliating duty to the Nasila tradition. Relocation to their rural home heralds a cultural alienation born of their refusal to succumb to female genital mutilation and early marriages. In pursuit of the delicate and elusive socio-economic cultural balance in Nasila, Ole. Kaelo, the girls' father is ensnared by a corrupt extortionist. To extricate himself he sends his daughters into a flat-spin labyrinth from which they have to struggle to escape.

Improving learning evidence and outcomes for those most in need in developing countries is at the heart of the United Nations' Sustainable Development Goal on Education (SDG4). This timely volume brings together contributions on current empirical research and analysis of emerging trends that focus on improving the quality of education through better policy and practice, particularly for those who need improved 'learning at the bottom of the pyramid' (LBOP). This volume brings together academic research experts, government officials and field-based practitioners. National and global experts present multiple broad thematic papers – ranging from the effects of migration and improving teaching to the potential of educational technologies, and better metrics for understanding and financing education. In addition, local experts, practitioners and policymakers describe their own work on LBOP issues being undertaken in Kenya, India, Mexico and Ivory Coast. The contributors argue persuasively that learning equity is a moral imperative, but also one that will have educational, economic and social impacts. They further outline how achieving SDG4 will take renewed and persistent effort by stakeholders to use better measurement tools to promote learning achievement among poor and marginalized children. This volume builds on the second international conference on Learning at the Bottom of the Pyramid (LBOP2).* It will be an indispensable resource for policymakers, researchers and government thinktanks, and local experts, as well as any readers interested in the implementation of learning equity across the globe. *The first volume Learning at the Bottom of the Pyramid (LBOP1), may be obtained at: <http://www.iiep.unesco.org/en/learning-bottom-pyramid-4608>
