Describes the lure of gold that drew both men and women west and discusses how they lived, the difficulties they faced, the impact of the gold rush on Native Americans, and more.

Sharing Higher Education's Promise Beyond the Few in Sub-Saharan Africa Houghton Mifflin Harcourt
Written by an academic at the University of Nairobi, this book seeks to widen both the breadth and depth of the body of knowledge about educational management. The theories and practices are presented as an integrated subject and the issues covered are educational management in perspective, development of management, theories of motivation and job satisfaction, leadership, authority and power, discipline, communication, decision making, supervision, financial management, and human resource development.
Death at the Well UN

This Element describes for the first time the database of peer review reports at PLOS ONE, the largest scientific journal in the world, to which the authors had unique access. Specifically, this Element presents the background contexts and histories of peer review, the data-handling sensitivities of this type of research, the typical properties of reports in the journal to which the authors had access, a taxonomy of the reports, and their sentiment arcs. This unique work thereby yields a compelling and unprecedented set of insights into the evolving state of peer review in the twenty-first century, at a crucial political moment for the transformation of science. It also, though, presents a study in radicalism and the ways in which PLOS's vision for science can be said to have effected change in the ultra-conservative contemporary university. This title is also available as Open Access on Cambridge Core.
Since1990 World Bank Publications

Blossoms of the Savannah is the story of two sisters, Taiyo and Resian, who are on the verge of womanhood and torn between their personal ambitions and the humiliating duty to the Nasila tradition. Relocation to their rural home heralds a cultural alienation born of their refusal to succumb to female genital mutilation and early marriages. In pursuit of the delicate and elusive socio-economic cultural balance in Nasila, Ole. Kaelo, the girls' father is ensnared by a corrupt extortionist. To extricate himself he sends his daughters into a flat-spin labyrinth from which they have to struggle to escape.

Cambridge University Press
This book examines the concept of the democratization of governance in universities in Kenya with particular emphasis on students involvement in governance processes and decision making. Data were collected from members of the student community utilizing a structured self-administered questionnaire and from purposively selected key informants and focus group discussants drawn from Kenyatta University (representing the public sector) and the United States International University (representing the private sector). The guiding argument for the study was that shared governance, one of the principles of good governance, is critical in enabling the universities to deliver their visions and the missions effectively. The results revealed that while in principle, Kenyan universities have embraced democratic governance in which all stakeholders, including students, have a role to play, in practice they continue to violate the core principles of good governance, particularly shared governance. Specifically, students, who are major stakeholders in university education, are largely excluded from significant structures of governance thereby limiting their influence and participation. Although their representation is mainly provided via student self-governance organs (unions, associations and/or councils), their effectiveness is undermined considerably by the lack of trust and confidencec of the student body and the unending manipulation by top university administrators and external political actors. Student active involvement in decision making is mainly confined to lower levels such as the school/faculty and departmental/programme. The authors call for a paradigm shift in the involvement of students in the governance of universities in ways that discourage the current culture of tokenism and political correctness that characterizes public and private universities in Kenya.

The Gold Rush National Academies Press
Up-to-date resources providing full coverage of Cambridge IGCSE First Language English (0500 and 0522) for first examination in 2015. This Fourth edition Coursebook is designed to support the Cambridge IGCSE First Language English (0500) and Cambridge International Level 1/Level 2 Certificate First Language English (0522). A student-friendly resource that teaches the reading and writing techniques required for the Cambridge IGCSE, as well as providing two bespoke units on speaking and listening techniques, plus embedded activities on these skills throughout. It includes carefully designed activities on a variety of engaging topics, set out in 14 lively, full-colour units. A dedicated microsite for Cambridge First Language

English provides free online resources to support the course, including answers to the Coursebook activities.

Social Protection, Growth and Employment Read Books Ltd

Africa has experienced dozens of conflicts over a variety of issues during the past two decades. Responding to these conflicts requires concerted action to manage the crises – the violence, the political discord, and the humanitarian consequences of prolonged fighting. It is also necessary to address the long-term social and economic impacts of conflict, to rebuild communities, societies and states that have been torn apart. To accomplish this requires the involvement of institutions and groups rarely considered in formal official African conflict management activities: schools, universities, religious institutions, media, commercial enterprises, legal institutions, civil society groups, youth, women and migrants. These groups and organizations have an important role to play in building a sense of identity, fairness, shared norms and cohesion between state and society – all critical components of the fabric of peace and security in Africa. This volume brings together leading experts from Africa, Europe and North America to examine these critical social institutions and groups, and consider how they can either improve or impede peaceful conflict resolution. The overarching questions that are explored by the authors are: What constitutes social cohesion and resilience in the face of conflict? What are the threats to cohesion and resilience? And how can the positive elements be fostered and by whom? The second of two volumes on African conflict management capacity by the editors, The Fabric of Peace in Africa: Looking beyond the State opens new doors of understanding for students, scholars and practitioners focused on strengthening peace in Africa; the first volume, Minding the Gap: African Conflict Management in a Time of change, focused on the role of mediation and peacekeeping in managing violence and political crises.

African Higher Education East African Publishers
Robin George Collingwood, FBA (1889 – 1943) was an English historian, philosopher, and archaeologist most famous his philosophical works. Along with “The Principles of Art” (1938), Collingwood’s “The Idea of History” was his best-known work, originally collated from numerous sources following his death by a student of his, T. M. Knox. It became a major inspiration for philosophy of history in the western world and is extensively cited to his day. This fascinating volume on history and its relationship to philosophy will appeal to students and collectors of vintage philosophical works alike. Contents include: “The Philosophy of History”, “History’s Nature”, “Object”, “Method”, “Greco-Roman Hystography”, “The Influence of Christianity”, “The Threshold of Scientific History”, “Scientific History”, “England”, “Germany”, “France”, “Italy”, etc. Many vintage books such as this are increasingly scarce and expensive. It is with this in mind that we are republishing this volume today in an affordable, high-quality, modern edition complete with a specially-commissioned new biography of the author.
Lessons from Rural Northeast Brazil BoD – Books on Demand

High-stakes public examinations exert a dominant influence in most education systems. They affect both teacher and student behavior, especially at the middle and upper levels of secondary education. The content of past examinations tends to dictate what is taught and how it is taught and, more important, what is learned and how it is learned. By changing aspects of these examinations, especially their content and format, education systems can have a strong positive impact on teacher behavior and student learning, help raise student achievement levels, and better prepare students for tertiary-level education and for employment. Examination agencies, many of which have followed the same procedures over decades, can learn from the successes and failures of other systems. This book addresses current issues related to the development, administration, scoring, and usage of these high-stakes public examinations, identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies. The book’s primary audience consists of public examination officials on national, regional, and state examination boards, but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards, to academics and researchers interested in educational assessment, to governmental and education agencies responsible for student selection, and to professionals at development organizations. “This extremely well-written and comprehensive book offers a timely review of the diversity of public examination practices worldwide; of the tensions between examinations and learning; and of the technical expertise involved in the creation of valid, reliable, and fair assessments. It reminds us that as “the diploma disease” takes hold with an ever-greater intensity at every stage of education worldwide, and the commercial business of testing flourishes, those concerned with educational quality and meaningful learning must be on guard to prevent the assessment tail wagging the educational dog.” Angela W. Little, Professor Emerita, Institute of Education, University College London “This book is very well structured and written and draws on the authors’ remarkable global knowledge across countries and histories. It will be a great asset both to administrators responsible for examinations and to academics and other professionals who seek to understand the nature and impact of examinations of different types and in different settings.” Mark Bray, UNESCO Chair Professor of Comparative Education, University of Hong Kong; and former Director, UNESCO International Institute for Educational Planning “I am sure that Public Examinations Examined, which thoroughly analyzes the practice of public examinations in different countries and makes profound and well-grounded conclusions, will arouse very great interest and will serve to further improve public examinations.” Victor Bolotov, Distinguished Professor, Higher School of Economics, National Research University, Moscow; member, Russian Academy of Education; and former Deputy Minister of Education, Russian Federation

Education in Kenya Since Independence McGill-Queen's Press - MQUP
The global financial and economic crisis beginning in 2008 has highlighted and reinforced the need for effective social protection mechanisms that prevent households from falling into poverty while also being sustainable, thus helping families to improve their earnings permanently. Meanwhile, social protection policies must be consistent with labour market mechanisms and with employment policy in order for either or both to be as beneficial as possible. This volume, using a broad definition of social protection, takes an in-depth look at selected programmes and their interaction with employment generation and growth in India, Kenya, Malawi, Mexico, Peru and Tajikistan. It focuses

on poverty and aims to explore how social and economic policies can be better integrated to simultaneously advance social welfare, employment outcomes and inclusive growth.

The Whale Rider PublicAffairs

First released in the Spring of 1999, *How People Learn* has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do-with curricula, classroom settings, and teaching methods--to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture on what people see and absorb. *How People Learn* examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.

September 2018 Longhorn Kenya

Provides a representative selection of African American poetry by figures ranging from Paul Laurence Dunbar to Julian Bond

The Idea of History Springer

Betrayal in the City, first published in 1976 and 1977, was Kenya's national entry to the Second World Black and African Festival of Arts and Culture in Lagos, Nigeria. The play is an incisive, thought-provoking examination of the problems of independence and freedom in post-colonial African states, where a sizeable number of people feel that their future is either blank or bleak. In the words of Mosese, one of the characters: "It was better while we waited. Now we have nothing to look forward to. We have killed our past and are busy killing our future."--Page 4 of cover.

The Case of Public and Private Universities Turtleback

While everybody recognizes the development challenges facing Sub-Saharan Africa, few have put together coherent plans that offer real hope for any feasible and general improvement. *Facing Forward* combines an evidence-based plan that not only recognizes the deep problems but provides specific prescriptions for dealing with the problems. In the simplest version, focus on the skills of the people and do it in a rational and achievable manner. †“ Eric Hanushek, Paul and Jean Hanna Senior Fellow, Hoover Institute, Stanford University This book offers a clear perspective on how to improve learning in basic education in Sub-Saharan Africa, based on extremely rigorous and exhaustive analysis of a large volume of data. The authors shine a light on the low levels of learning and on the contributory factors. They have not hesitated to raise difficult issues, such as the need to implement a consistent policy on the language of instruction, which is essential to ensuring the foundations of learning for all children. Using the framework of “From Science to Service Delivery,†? the book urges policy makers to look at the entire chain from policy design, informed by knowledge adapted to the local context, to implementation. *Facing Forward: Schooling for Learning in Africa* is a unique addition to the literature that is relevant for African policy makers and stakeholders. †“ Professor Hassana Alidou, Ambassador of the Republic of Niger to the United States and Canada As the continent gears itself up to provide universal basic education to all its children by 2030, it has to squarely address the challenge of how to improve learning. *Facing Forward* helps countries to benchmark themselves against each other and to identify concrete lines of action. It forces policy makers to think “where do I go from here?†? “what do I do differently?†? and to examine the hierarchy of interventions that can boost learning. It rightly urges Ministries of Education to build capacity through learning by doing and continuous adaptation of new knowledge to the local context. *Facing Forward* will unleash frank conversations about the profound reforms that are required in education policy and service delivery to ensure learning for every child on the continent. †“ Dr. Fred Matiang’I, Cabinet Secretary for the Interior and Coordination of National Government, Government of Kenya (former Cabinet Secretary for Education) *Facing Forward* couldn’t have come at a more opportune time as countries in the region, including Mauritius, focus more on learning outcomes rather than simply on inputs and processes in education systems. The book underscores the important point that African countries need not exclusively model themselves on high-performing education systems in the world. Much can as well be learnt from other countries at the same level of development, or lower, by virtue of the challenges they have faced and successfully overcome. This presents opportunities for greater peer-sharing and networking with these countries. Indeed a number of key focus areas are highlighted in the book that demonstrate good practices worthy of being emulated. These cover domains as diverse as enabling factors leading to improved student progression, strengthened teacher capacity, increased budgetary allocation with a focus on quality, as well as improved technical capacity of implementing agencies in the region. †“ Hon. (Mrs.) Leela Devi Dookun-Luchoomun, Minister of Education and Human Resources, Tertiary Education and Scientific Research, Republic of Mauritius

HSC Business Studies 101 University of Nairobi Press

This report aims to improve understanding of equity in tertiary enrollment in Sub-Saharan African countries, to examine the extent to which inequity inhibits the ability of African universities to effectively drive improvements in overall quality of life and economic competitiveness, and to identify effectiveness of government equity policies.

The Fabric of Peace in Africa World Bank Publications

"Provides the basis for an integrated appraisal of population and reproductive health dynamics and their linkages and impacts on poverty, inequality and development. Furthermore, by integrating a micro and macro analytical approach, the PSA makes the interactions between individual behaviour and demographic dynamics explicit."--Foreword.

Practices and Principles for Creating Delicious Food United Nations Publications

Demonstrates how social business transforms lives, offers practical guidance for those who want to create social businesses, explains how policies must be adapted to make room for the social-business model and shows how social business can redeem the failed promise of free-market enterprise. By a Nobel Peace Prize winner. Reprint.
