Radar Instruction Manual  
Image

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to

capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. "Adam Rapp's brilliant and haunting story will break your heart. But then his words will mend it. . . . Absolutely unforgettable." – Michael Cart On the run in a stolen car with a kidnapped baby in tow, Custis, Curl, and Boobie are three young people with deeply troubled pasts and bleak futures. As they struggle to find a new life for themselves, it becomes painfully clear that none of them will ever be able to leave the past behind. Yet for one, redemption is waiting in the unlikelyst of places. With the raw language of the street and lyrical, stream-of-consciousness prose, Adam Rapp hurtles the reader into a world of lost children, a world that is not for the faint of heart. Gripping,

disturbing, and starkly  
illuminating, his hypnotic  
narration captures the voices  
of two damaged souls - a  
third speaks only through  
drawings - to tell a story of  
alienation, deprivation, and  
ultimately, the saving power  
of compassion.
