There were no medical oncologists until a few decades ago. In the early 1960s, not only were there no such specialists, many practitioners regarded the treatment of terminally-ill cancer patients with heroic courses of chemotherapy as highly questionable. Physicians loath to assign patients randomly to competing treatments also expressed their outright opposition to the randomized clinical trials that were then relatively rare. And yet today these trials form the basis of medical oncology. How did such a spectacular change occur?

How did medical oncology move from a non-entity and in some regards a reviled practice to the central position it now occupies in modern medicine? Cancer on Trial answers these questions by exploring how practitioners established a new style of practice, at the center of which lies the cancer clinical trial.

Rising Up from Indian Country

The World of Juliette Kinzie Inspector Ghote, 'one of the great creations of detective fiction' (Alexander McCall Smith), is sent to the remote Indian countryside to protect a formidable retired judge who's been receiving death threats in this classic mystery - with a brand-new introduction by bestselling author Vaseem Khan. Inspector Ganesh Ghote of the Bombay CID is ordered off to the remote, heat-soaked Indian countryside to protect an aged, unpopular and rigidly obstinate judge of the British Raj era, against whom death threats have been made. In the old house, Ghote soon finds that his chief opponent is not the unknown who has been leaving Justice Sir Asif Ibrahim threatening letters, but the formidable, iron-principled old judge himself, who dismisses the threats as mere foolishness and refuses to cooperate with Ghote's investigation. The good inspector is determined to do his duty, and soon has both a lengthy list of suspects - including the judge's own beautiful, high-strung daughter, a radical American priest and the editor of a left-wing newspaper - and a possible motive for shutting up the judge: he is writing his memoirs, and who knows

what secrets the old man is planning to reveal . . .

Guide to Chicago's Twenty-First-Century Architecture

Springer Publishing Company
When Juliette Kinzie first visited Chicago in 1831, it was anything but a city. An outpost in the shadow of Fort Dearborn, it had no streets, no sidewalks, no schools, no river-spanning bridges. And with two hundred disconnected residents, it lacked any sense of community. In the decades that followed, not only did Juliette witness the city's transition from Indian country to industrial center, but she was instrumental in its development. Juliette is one of Chicago's forgotten founders. Early Chicago is often presented as "a man's city," but women like Juliette worked to create an urban and urbane world, often within their own parlors. With *The World of Juliette Kinzie*, we finally get to experience the rise of Chicago from the view of one of its most important founding mothers. Ann Durkin Keating, one of the foremost experts on nineteenth-century Chicago, offers a moving portrait of a trailblazing and complicated woman. Keating takes us to the corner of Cass and Michigan (now Wabash and Hubbard), Juliette's home base. Through Juliette's eyes, our understanding of early Chicago expands from a city of boosters and speculators to include the world that women created in and between households. We see the development of Chicago society, first inspired by cities in the East and later coming into its own midwestern ways. We also see the city become a community, as it developed its intertwined religious, social, educational, and cultural institutions. Keating draws on a wealth of sources, including hundreds of Juliette's personal letters, allowing Juliette to tell much of her story in her own words. Juliette's death in 1870, just a year before the infamous fire, seemed almost prescient. She left her beloved Chicago right before the physical city as she knew it vanished in flames. But now her history lives on. *The World of Juliette Kinzie* offers a new perspective on Chicago's past and is a fitting tribute to one of the first women historians in the United States.

Neoliberal Chicago

Aspen Publishing
Once maligned as a swampy outpost, the fledgling city of Chicago brazenly adopted the motto *Urbs in Horto* or *City in a Garden*, in 1837. *Chicago Gardens* shows how this upstart town earned its sobriquet over the next century, from the first vegetable plots at Fort Dearborn to innovative garden designs at the 1933 World's Fair. Cathy Jean Maloney has spent decades researching the city's horticultural heritage, and here she reveals the unusual history of Chicago's first gardens. Challenged by the region's clay soil, harsh winters, and fierce winds, Chicago's pioneering horticulturalists, Maloney demonstrates, found imaginative uses for hardy prairie plants. This same creative spirit thrived in the city's local fruit and

vegetable markets, encouraging the growth of what would become the nation's produce hub. The vast plains that surrounded Chicago, meanwhile, inspired early landscape architects, such as Frederick Law Olmsted, Jens Jensen, and O.C. Simonds, to new heights of grandeur. Maloney does not forget the backyard gardeners: immigrants who cultivated treasured seeds and pioneers who planted native wildflowers. Maloney's vibrant depictions of Chicagoans like "Bouquet Mary," a flower peddler who built a greenhouse empire, add charming anecdotal evidence to her argument – that Chicago's garden history rivals that of New York or London and ensures its status as a world-class capital of horticultural innovation. With exquisite archival photographs, prints, and postcards, as well as field guide descriptions of living legacy gardens for today's visitors, Chicago Gardens will delight green-thumbs from all parts of the world.

 Since the 1950s and the advance of urban renewal, local governments and urban policy have focused heavily on the central business district. However, such development has all but ignored the inner-city neighborhoods that continue to struggle in the shadows of high-rise America. This analysis of urban neighborhoods in the United States from 1960 to 1995 presents fifteen essays by scholars of urban planning and development. Together they show how urban neighborhoods can and must be preserved as economic, cultural, and political centers.

The neoliberal philosophy of fiscal austerity aligned with reduced regulation has transformed Chicago. As pursued by mayor Rahm Emanuel and his predecessor Richard M. Daley, neoliberalism led officials to privatize everything from parking meters to schools, gut regulations and social services, and promote gentrification wherever possible. The essayists in *Neoliberal Chicago* explore an essential question: how does neoliberalism work on the ground in today's Chicago? Contextual chapters explore race relations, physical development, and why Chicago embraced neoliberalism. Other contributors delve into aspects of the neoliberal vision, neoliberalism's impact on three iconic city spaces, and how events like the 2008 foreclosure crisis and the bid to attract the Olympic Games reveal the workings of neoliberalism. After showing the origins of fundamentalism, he examines representative anti-Catholic groups and presents their arguments in their own words. His rebuttals are clear, detailed, and charitable. Special emphasis is given to the scriptural basis for Catholic doctrines and beliefs.

In August 1812, under threat from the Potawatomi, Captain Nathan Heald began the evacuation of ninety-four people from the isolated outpost of Fort Dearborn to Fort Wayne. The group included several dozen soldiers, as well as nine women and eighteen children. After traveling only a mile and a half, they were attacked by five hundred Potawatomi warriors. In under an hour, fifty-two members of Heald's party were killed, and the rest were taken prisoner; the Potawatomi then burned Fort Dearborn before returning to their villages. These events are now seen as a foundational moment in Chicago's storied past. With Rising up from Indian Country, noted historian Ann Durkin Keating richly recounts the Battle of Fort Dearborn while situating it within the context of

several wider histories that span the nearly four decades between the 1795 Treaty of Greenville, in which Native Americans gave up a square mile at the mouth of the Chicago River, and the 1833 Treaty of Chicago, in which the American government and the Potawatomi exchanged five million acres of land west of the Mississippi River for a tract of the same size in northeast Illinois and southeast Wisconsin. In the first book devoted entirely to this crucial period, Keating tells a story not only of military conquest but of the lives of people on all sides of the conflict. She highlights such figures as Jean Baptiste Point de Sable and John Kinzie and demonstrates that early Chicago was a place of cross-cultural reliance among the French, the Americans, and the Native Americans. Published to commemorate the bicentennial of the Battle of Fort Dearborn, this gripping account of the birth of Chicago will become required reading for anyone seeking to understand the city and its complex origins.

From the lumberyards and meatpacking factories of the Southwest Side to the industrial suburbs that arose near Lake Calumet at the turn of the twentieth century, manufacturing districts shaped Chicago's character and laid the groundwork for its transformation into a sprawling metropolis.

Approaching Chicago's story as a reflection of America's industrial history between the Civil War and World War II, Chicago Made explores not only the well-documented workings of centrally located city factories but also the overlooked suburbanization of manufacturing and its profound effect on the metropolitan landscape. Robert Lewis documents how manufacturers, attracted to greenfield sites on the city's outskirts, began to build factory districts there with the help of an intricate network of railroad owners, real estate developers, financiers, and wholesalers. These immense networks of social ties, organizational memberships, and financial relationships were ultimately more consequential, Lewis demonstrates, than any individual achievement. Beyond simply giving Chicago businesses competitive advantages, they transformed the economic geography of the region. Tracing these transformations across seventy-five years, Chicago Made establishes a broad new foundation for our understanding of urban industrial America.

Second City." At last there is a book for all of us, whatever we choose to call Chicago. In this magisterial biography, historian Dominic Pacygatraces the storied past of his hometown, from the explorations of Joliet and Marquette in 1673 to the new wave of urban pioneers today. The city's great industrialists, reformers, and politicians—and, indeed, the many not-so-great and downright notorious—animate this book, from Al Capone and Jane Addams to Mayor Richard J. Daley and President Barack Obama. But what distinguishes this book from the many others on the subject is its author's uncommon ability to illuminate the lives of Chicago's ordinary people. Raised on the city's South Side and employed for a time in the stockyards, Pacyga gives voice to the city's steelyard workers and kill floor operators, and maps the neighborhoods distinguished not by Louis Sullivan masterworks, but by bungalows and corner taverns. Filled with the city's one-of-a-kind characters and all of its defining moments, Chicago: A Biography is as big and boisterous as its namesake—and as ambitious as the men and women who built it.
