In August 1812, under threat from the Potawatomi, Captain Nathan Heald began the evacuation of ninety-four people from the isolated outpost of Fort Dearborn to Fort Wayne. The group included several dozen soldiers, as well as nine women and eighteen children. After traveling only a mile and a half, they were attacked by five hundred Potawatomi warriors. In under an hour, fifty-two members of Heald ' s party were killed, and the rest were taken prisoner; the Potawatomi then burned Fort Dearborn before returning to their villages. These events are now seen as a foundational moment in Chicago ' s storied past. With *Rising up from Indian Country*, noted historian Ann Durkin Keating richly recounts the Battle of Fort Dearborn while situating it within the context of several wider histories that span the nearly four decades between the 1795 Treaty of Greenville, in which Native Americans gave up a square mile at the mouth of the Chicago River, and the 1833 Treaty of Chicago, in which the American government and the Potawatomi exchanged five million acres of land west of the Mississippi River for a tract of the same size in northeast Illinois and southeast Wisconsin. In the first book devoted entirely to this crucial period, Keating tells a story not

only of military conquest but of the lives of people on all sides of the conflict. She highlights such figures as Jean Baptiste Point de Sable and John Kinzie and demonstrates that early Chicago was a place of cross-cultural reliance among the French, the Americans, and the Native Americans. Published to commemorate the bicentennial of the Battle of Fort Dearborn, this gripping account of the birth of Chicago will become required reading for anyone seeking to understand the city and its complex origins.

There were no medical oncologists until a few decades ago. In the early 1960s, not only were there no such specialists, many practitioners regarded the treatment of terminally-ill cancer patients with heroic courses of chemotherapy as highly questionable. Physicians loath to assign patients randomly to competing treatments also expressed their outright opposition to the randomized clinical trials that were then relatively rare. And yet today these trials form the basis of medical oncology. How did such a spectacular change occur? How did medical oncology move from a non-entity and in some regards a reviled practice to the central position it now occupies in modern medicine? *Cancer on Trial* answers these questions by exploring how practitioners established a new style of practice, at the center of which lies the cancer clinical trial.

Chicago has been called by many names. Nelson Algren declared it a “City on the Make.” Carl Sandburg dubbed it the “City of Big Shoulders.” Upton Sinclair christened it “The Jungle,” while New Yorkers, naturally, pronounced it “the Second City.” At last there is a book for all of us, whatever we choose to call Chicago. In this magisterial biography, historian Dominic Pacyga traces the storied past of his hometown, from the explorations of Joliet and Marquette in 1673 to the new wave of urban pioneers today. The city’s great industrialists, reformers, and politicians—and, indeed, the many not-so-great and downright notorious—animate this book, from Al Capone and Jane Addams to Mayor Richard J. Daley and President Barack Obama. But what distinguishes this book from the many others on the subject is its author’s uncommon ability to illuminate the lives of Chicago’s ordinary people. Raised on the city’s South Side and employed for a time in the stockyards, Pacyga gives voice to the city’s steelyard workers and kill floor operators, and maps the neighborhoods distinguished not by Louis Sullivan masterworks, but by bungalows and corner taverns. Filled with the city’s one-of-a-kind characters and all of its defining moments, *Chicago: A Biography* is as big and boisterous as its namesake—and as ambitious as the men and women who built it. A Manual for Writers of Research Papers, Theses, and Dissertations, Eighth Edition Bloomsbury Publishing USA A “fascinating” biography of an early Chicago settler, a social and cultural force in the city, and one of America’s first female historians (Chicago Sun-Times). When Juliette Kinzie first visited Chicago in 1831, it was anything but a city. An outpost in the shadow of Fort Dearborn, it had no streets, no sidewalks, no schools, no river-spanning bridges. And with two hundred disconnected residents, it lacked any sense of community. In the decades that followed, not only did Juliette witness the city’s transition from Indian country to industrial center, but she was instrumental in its development, one of the women in this “man’s city” who worked to create an urban and urbane world, often within their own parlors. Here we finally get to experience the rise of Chicago from the view of one of its founding mothers. In a moving portrait of a trailblazing and complicated woman, Keating takes us to the corner of Cass and Michigan (now Wabash and Hubbard), Juliette’s home base. Through Juliette’s eyes, our understanding of early Chicago expands from a city of boosters and speculators to include the world women created in and between households. We see the development of Chicago society, first inspired by Eastern cities and later coming into its own midwestern ways. We also see the city become a community, as it developed its intertwined religious, social, educational, and cultural institutions. Keating draws on a wealth of sources, including hundreds of Juliette’s personal letters, allowing Juliette to tell much of her story in her own words. Juliette’s death in 1870, just a year before the infamous fire, seemed almost prescient. She left her beloved Chicago right before the physical city as she knew it vanished in flames. But now her history lives on, in a biography that offers a new perspective on Chicago’s past. “An authority on Chicago’s history, Keating draws on a trove of family documents . . . Illustrations are a particular strength of the book, including maps, portraits, and photographs of houses—the latter are particularly apt because the book is an exploration of peoples’ lives within households.” —Journal of the Early Republic “Chronicles the history of women in early colonial America, an area that benefits from this addition to the genre.” —The American Historical Review “[A] remarkable book.” —The Journal of American History

Colorado's Spanish Peaks are landmarks of unique beauty. As the region's first comprehensive guide, this book provides an indispensable introduction to the area, including numerous maps and illustrations. The guide's utility is enhanced by appendices featuring preparations for outings, notes on Colorado trespass law, tips on mountain photography, and a source list for agencies and organizations. Finally, a detailed resource list is included, plus two indices, one for general subjects, the other for common and scientific names of plants and animals.

The World of Juliette Kinzie University of Chicago Press The neoliberal philosophy of fiscal austerity aligned with reduced regulation has transformed Chicago. As pursued by mayor Rahm Emanuel and his predecessor Richard M. Daley, neoliberalism led officials to privatize everything from parking meters to schools, gut regulations and social services, and promote gentrification wherever possible. The essayists in *Neoliberal Chicago* explore an essential question: how does neoliberalism work on the ground in today's Chicago? Contextual chapters explore race relations, physical development, and why Chicago

embraced neoliberalism. Other contributors delve into aspects of the neoliberal vision, neoliberalism's impact on three iconic city spaces, and how events like the 2008 foreclosure crisis and the bid to attract the Olympic Games reveal the workings of neoliberalism. "Which neighborhood?" It's one of the first questions you're asked when you move to Chicago. And the answer you give - be it Bucktown, Bronzeville, or Bridgeport - can give your inquisitor a good idea of who you are, especially in a metropolis with so many different neighborhoods and suburbs to choose from." "Many of us know little of the neighborhoods beyond those where we work, play, and live. This is particularly true in Chicagoland, a region that spans over 4,400 square miles and is home to more than 9.5 million residents. Now, historian Ann Durkin Keating's compact guide, drawn largely from the bestselling *Encyclopedia of Chicago*, brings the history of Chicago neighborhoods to life."--BOOK JACKET.

Yesterday's Soldier chronicles my journey as a young man, thrust from the world of religious life in a Massachusetts Roman Catholic seminary to the US Army, training to be an Infantry Officer during the Vietnam War. I entered religious

life in the Congregation of Holy Cross in Massachusetts in 1963 with the intent of being ordained a priest. I lived in a strict male religious community very much like a monastery. Upon graduating from college there, Father Superior decided that I had only a "partial vocation," and released me from my vows and further advancement to ordination. This memoir shares my experiences in the US Army, from basic combat training to infantry advanced training to Infantry Officer Candidate school. It was at Officers Candidate School where I faced the hardest decision of my life to make--to become a non-combatant conscientious objector, risking the Army's punishment and imprisonment for that decision. Surviving the Army's systematic punishment ("the Treatment") during the long months of waiting for a decision in my case, I defied the will of my family, the demands of my church, and faced criminal charges by the US Army. Eventually, I was sent to Vietnam as a Conscientious Objector, where I dealt with more Army discrimination, the hazards of war, and connecting with the Vietnamese people.

Cancer on Trial

An account of the 1878 yellow fever epidemic documents how it killed more than 18,000 people in the American South, tracing its particularly catastrophic impact in Memphis, Tennessee, while noting the heroic efforts of people who remained behind to help.

A little more than seventy-five years ago, Kate L. Turabian drafted a set of guidelines to help students understand how to write, cite, and formally submit research writing. Seven editions and more than nine million copies later, the name Turabian has become synonymous with best practices in research writing and style. Her *Manual for Writers* continues to be the gold standard for generations of college and graduate students in virtually all academic disciplines. Now in its eighth edition, *A Manual for Writers of Research Papers, Theses, and Dissertations* has been fully revised to meet the needs of today's writers and researchers. The Manual retains its familiar three-part structure, beginning with an overview of the steps in the research and writing process, including formulating questions, reading critically, building arguments, and revising drafts. Part II provides an overview of citation practices with detailed information on the two main scholarly citation styles (notes-bibliography and author-date), an array of source types with contemporary examples, and detailed guidance on citing online resources. The final section treats all matters of editorial style, with advice on punctuation, capitalization, spelling, abbreviations, table formatting, and the use of quotations. Style and citation recommendations have been revised throughout to reflect the sixteenth edition of *The Chicago Manual of Style*. With an appendix on paper format and submission that has been vetted by dissertation officials from across the country and a bibliography with the most up-to-date listing of critical resources available, *A Manual for Writers* remains the essential resource for students and their teachers.

The structure that anchors Chicago Every day Chicagoans rely on the loop of elevated train tracks to get to their jobs, classrooms, or homes in the city's downtown. But how much do they know about the single most important structure in the history of the Windy City? In engagingly brisk prose, Patrick T. Reardon unfolds the fascinating story about how Chicago's elevated Loop was built, gave its name to the downtown, helped unify the city, saved the city's economy, and was itself saved from destruction in the 1970s. This unique volume combines urban history, biography, engineering, architecture, transportation, culture, and politics to explore the elevated Loop's impact on the city's development and economy and on the way Chicagoans see themselves. The Loop rooted Chicago's downtown in a way unknown in other cities, and it protected that area—and the city itself—from the full effects of suburbanization during the second half of the twentieth century.

Masses of data underlie new insights into what has made Chicago's downtown, and the city as a whole, tick. The Loop features a cast of colorful Chicagoans, such as legendary lawyer Clarence Darrow, poet Edgar Lee Masters, mayor Richard J. Daley, and the notorious Gray Wolves of the Chicago City Council. Charles T. Yerkes, an often-demonized figure, is shown as a visionary urban planner, and engineer John Alexander Low Waddell, a world-renowned bridge creator, is introduced to Chicagoans as the designer of their urban railway. This fascinating exploration of how one human-built structure reshaped the social and economic landscape of Chicago is the definitive book on Chicago's elevated Loop.
