Tens of thousands of mechanical engineers are engaged in the design, building, upgrading, and optimization of various material handling facilities. The peculiarity of material handling is that there are numerous technical solutions to any problem. The engineer's personal selection of the optimal solution is as critical as the technical component. Michael Rivkin, Ph.D., draws on his decades of experience in

design, construction, upgrading, optimization, troubleshooting, and maintenance throughout the world, to highlight topics such as: • physical principles of various material handling systems; • considerations in selecting technically efficient and environmentally friendly equipment; • best practices in upgrading and optimizing existing bulk material handling facilities; • strategies to select proper equipment in the early phases of a new project. Filled with graphs, charts, and case studies, the book also includes bulleted summaries to help mechanical engineers without a special background in material handling find optimal solutions to everyday problems.

Today's world is full of ups and downs and young people must guard their mental health.

Whether it is dealing with the realities of COVID-19, depression, anxiety, anger, grief, guilt, low self-esteem, or the stresses of everyday life, a person's mental health can suffer. There is no better way to guard mental health than through journaling. Unlike the complexity of other journals that prompt writing about something that is irrelevant to a person's life or steers them away from what they are truly feeling or experiencing, this journal is simple and open. It allows for TRUE expression. This journal was composed by the award-winning team at The Therapy Institute.

The Therapy Institute boasts nearly two decades of working with children from all walks of life and their tried-and-true methods have been utilized to maintain the mental and physical health of children from around the world.
