I'm using the Keithley 2400 multimeter and the 2000 and I'm having great difficulty writing them LabVIEW programs. I'm using LabVIEW 6, GPIB. I wrote a sweep program that runs V, triggers the 2000 that measure other parameters and the combination doesn't work. If anybody has a configuration program for either of the instruments it will be a ...

Tektronix hereby grants permission and license for others to reproduce and distribute copies of any Tektronix measurement product manual, including user manuals, operator's manuals, service manuals, and the like, that (a) have a Tektronix Part Number and (b) are for a measurement product that is no longer supported by Tektronix.

[how to read from Keithley 2000 multimeter buffer using ...](#)

Hi, The Keithley 2000 multimeter datasheet states that it can measure 2000 measurements per second. I know that the GPIB has a limitation of transferring 50 measurements per second. Therefore, what I wish to do is have the device read voltage measurements, store the measurements in the buffer (maximum 1024 measurements can be stored) and then transfer these 1024 measurements to the computer.
