This book is a real life story about the beauty of life when you have a wonderful income, which ultimately gave me a glamorous lifestyle. I had a lavished apartment on the Upper East Side of Manhattan, where I was always entertaining my friends and their friends. Sometimes my friends and I would use limousine just for the night out. At the end of my company contract and after about another six months without income, I sold my condominium at a reasonable price and relocated to Jersey City in New Jersey. I lived in a spacious apartment for another five months without income, then I decided to drive a yellow cab. I went to TLC for my hack license to enable me to drive a taxi. I registered with a taxi company in Brooklyn, and I became a taxi driver. Driving the taxi and continuing my job hunting at the same time was daunting. With too many summonses from police officers and TLC inspectors within a period of about four years taxi driving, my license was revoked. No more taxi driving, no more

income. And my life became too miserable.

Mapping Motivation for Top Performing Teams is the final volume in a series of books that are all linked to the author's Motivational Map toolkit. Each book builds on a different aspect of personal, team and organisational development. This book, using the Motivational Map, the Team Motivational Map, as well as the Organisation Motivational Map, is a practical guide to understanding how team dynamics and success are hugely influenced by motivational factors, which are not usually taken into account. The book is a deeper exploration of team mapping which occurs in Chapter 6 of *Mapping Motivation* (2015), Chapter 6 of *Mapping Motivation for Engagement* (with Steve Jones, 2019), and Chapter 6 of *Mapping Motivation for Leadership* (with Jane Thomas, 2020). But whereas these chapters only touched on specific aspects of team dynamics, this book covers the issues more comprehensively; it also attempts to avoid replication of materials, although there are bound to be small overlaps. It covers not only how motivations affect team productivity and how this can be boosted through targeted Reward Strategies, but also how 'mapping' provides profounder insights into the four key characteristics of top performing teams: the clear remit, vital interdependency, strong belief, and real accountability. How Motivational Maps covers these areas, we believe to be original, eye-opening and effective in the management of change. Further, as always with Motivational Maps, its language and metrics raise self-awareness at an individual and team level, and so can help resolve conflicts through its common and non-judgmental language. Managing teams is the key skill of managers: thus this book is a handbook for managers everywhere who wish to excel at management, for without bringing their teams on board (i.e. motivating their teams), they are not effectively managing.
