Haynes Manuals N. America, Incorporated New York Times bestselling author, Food Network star, and The Pioneer Woman herself, Ree Drummond brings us the first book in a brand-new picture book series! In Ree's own words: "I was all grown up when I moved out to the country. When I first arrived, I felt so out of place! But eventually, I looked around and discovered all the wonderful things about country life. So I decided to write a story about my experiences, as seen through the eyes of a little girl named Ree. Little Ree moves to the country and feels as scared and unsure as I was. But then she finds that if she sets her mind to it, being a country girl is a pretty cool thing. Come along on her adventures!" Little

Ree trades in her city days for a country way of life when she moves with her family to her grandparents' ranch. She's excited to ride horses, swim in the pond, and help Grandma cook for everyone. But on her first day, she finds that living on a ranch can be tough. She has to get up at the crack of dawn, learn to herd cows, and make sure her horse, Pepper, doesn't eat everything in sight. And that's all before breakfast! Will she ever get used to this new place? Luckily, the end of the day brings a big family barbecue...and the happy discovery that being a country girl isn't about the right pair of boots, it's all about the right attitude. With warmth, humor, and stories inspired by life on the ranch, Ree Drummond's new picture book introduces us to a spunky new picture book star and treats us to a special pancake recipe at the end!

Today's parents are constantly pressured to be perfect. But in striving to do everything right, we risk missing what children really need for lifelong emotional security. Now the simple, powerful "Circle of Security" parenting strategies that Kent Hoffman, Glen Cooper, and Bert

Powell have taught thousands of families are available in self-help form for the first time. You will learn: How to balance nurturing and protectiveness with promoting your child's independence. What emotional needs a toddler or older child may be expressing through difficult behavior. How your own upbringing affects your parenting style--and what you can do about it. Filled with vivid stories and unique practical tools, this book puts the keys to healthy attachment within everyone's reach--self-understanding, flexibility, and the willingness to make and learn from mistakes. Self-assessment checklists can be downloaded and printed for ease of use.

Tales of shipwrecks have a definite fascination and a

universal appeal. They are not only exciting and thrilling but usually contain some element of mystery. They recount the struggle of man to survive, pitting himself, or in several instances--herself, and the ship against the elements of destruction, calling forth his utmost skill, his strength, and his ingenuity, often with his very life as the high stake. Some emerge heroes; others are never heard from again. In this book are told only a selected number of the outstanding number of the shipwrecks of the Great Lakes. To attempt to put into a single book all the shipwrecks occurring on the Great Lakes would be sheer folly. Here are true tales of dozens of thrilling shipwrecks told in an interesting manner - complete with dozens of photographs. Heroic rescues from Duluth to the St. Lawrence make fascinating reading. Shipwrecks are

recounted, covering a period of over one hundred years, from the old wooden immigrant steamers and the lofty-masted sailing vessels, up to the present ships of today. Much lake lore is woven into the tales of the wrecks, but nothing has been retold from Mr. Bowen's other books, *Lore of the Lakes and Memories of the Lakes*.

Seventy-five percent of processed foods on supermarket shelves—from soda to soup, crackers to condiments—contain genetically engineered ingredients. The long-term effects of these foods on human health and ecology are still unknown, and public concern has been steadily intensifying. This new book from the Council for

Responsible Genetics gathers the best, most thought-provoking essays by the leading scientists, science writers, and public health advocates. Collectively, they address such questions as: Are GM foods safe and healthy for us? Will GM food really solve world hunger? Who really controls the power structure of food production? Are GM foods ecologically safe and sustainable? Why is it so difficult to get GM foods labeled in the US? What kinds of regulations and policies should be instituted? How is seed biodiversity, of lack thereof, affecting developing countries? Should animals be genetically modified for food? How are other countries handling GM crops? Ultimately, this definitive book encourages us to

think about the social, environmental, and moral ramifications of where this particular branch of biotechnology is taking us, and what we should do about it.

the history and heritage of this historic event. Starting with the original Union Pacific-Central Pacific lines that met at Promontory Summit, Utah, in 1869, the book expands the narrative by considering all of the transcontinental routes in the United States and examining their impact on building this great nation. Exquisitely illustrated with full color photographs, After Promontory divides the western United States into three regions—central, southern, and northern—and offers a deep look at the transcontinental routes of each one. Renowned railroad historians Maury Klein, Keith Bryant, and Don Hofsommer offer their perspectives on these regions along with contributors H.
