The Polka Dot File on the Robert F. Kennedy Killing describes the day-to-day chase for the mystery woman in the polka-dot dress. The book comments on but does not dwell on the police investigation, and reads like a detective thriller instead of an academic analysis of the investigation.

It incorporates actual tapes made by an important witness, and introduces the testimony of witnesses not covered in other books and it is a new take on the assassination and the motives for it introduces a new theory for the reasons behind the assassination. Original and highly personal, it reaches a startling and different conclusion not exposed by other books.

Memories flood my mind as I reminisce how my journey has been a lifetime of happenings that speak to my soul with lessons that can be applied to our daily lives. These memories are conjured up at odd and, sometimes, inconvenient times. As I sat in church last Sunday and the pastor began his message, my mind captured a thought of bygone days that spoke loud and clear to my mind, and I scrambled in my bag for a pen and paper to put my thoughts down. Brother Tim must have thought he had really said something profound, and he did, but I did not write that down. It is my hope that all who read my memories and the lessons that I glean from them will take them to heart and identify with them and feel happiness, insight, and perhaps laughter as they share my memories and truths.

An award-winning scientist offers his unorthodox approach to childrearing: “ Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions ” (Amy Chua, author of Battle Hymn of the Tiger Mother). If you ' re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley ' s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You ' ll be laughing and

learning at the same time.
