A very dirty book
about a very unusual
relationship.
Irishness and Womanhood in

Nineteenth-century British Writing
Beacon Press
'Janey is like a whirlwind of selflessness. A beautiful spirit in a beautiful country doing a beautiful thing. I encourage my children to be more 'Janey'. With more positive spirits like Janey, the world would be a better place.' - Ben Fogle In 2014 and in her mid-twenties, Janey Lowes had been a vet for just two years when she left her home in County Durham and went travelling. Visiting Sri Lanka, she was horrified to see the state of so many of the island's dogs, in particular the three million strays. Over 5,000 miles from home, Janey decided there and then that she was going to move to the

island indefinitely and do everything within her power to help them. She raised £10,000 to get started, setting up a charity called WECare Worldwide, and began work. Frightened, determined and excited all at the same time, she found a local who was willing to work with her and began scouring the streets for dogs in need. Some she patched up as best she could at the roadside, others she brought back and treated in a make-shift surgery she had cobbled together in her new home. With very little equipment, she and her small team came up with new and ingenious ways to treat the animals. In this highly inspiring and heartfelt book full of challenges and adventure, Janey

introduces us to her world and the tireless work she carries out. As she says, 'I feel as though all these dogs are my dogs and I have a responsibility to them.' In it, we meet many of the colourful characters who have come to offer help, along with innumerable street dogs who have suffered all sorts of trauma and injury, only to be scooped up by Janey and her team and saved.

Biology 12 Eastwest Books
(Madras)

Trees Up Close offers an intimate, revealing look at the beauty of leaves, flowers, cones, fruits, seeds, buds, bark, and twigs of the most common trees. With more than 200

dazzling photos, you will be amazed by the otherworldly beauty of the acorns from a sawtooth oak, enchanted by the immature fruits of a red maple, and dazzled by the delicate emerging flowers of the American elm.

Weird But True 9 Elektor
International Media

Presents aquatic chemistry in a way that is truly useful to those with diverse backgrounds in the sciences. Major improvements to this edition include a complete rewrite of the first three background chapters making them user-friendly. There is less emphasis on mathematics and concepts are illustrated with actual

examples to facilitate understanding.

Country Home National Geographic Books

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems.

Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the

most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL"

of "DOL" could be read in the suggestive way: DO L. Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant. *Trope London* Oxford University Press Since 1958 the Maritime

Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the

trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J.

Blackwell Assistant Secretary for Maritime Affairs
Empty 47 North
"...profoundly moving..."
-Publishers Weekly Nelson Mandela's two great-grandchildren ask their grandmother, Mandela's youngest daughter, 15 questions about their grandad – the global icon of peace and forgiveness who spent 27 years in prison. They learn that he was a freedom fighter who put down his weapons for the sake of peace, and who then became the President of South Africa and a Nobel Peace Prize-winner, and realise that they can continue his legacy in the world today.

Seen through a child's perspective, and authored jointly by Nelson Mandela's great-grandchildren and daughter, this amazing story is told as never before to celebrate what would have been Nelson's Mandela 100th birthday.

Janey the Vet Timber Press

An alien intelligence initiates first contact with the Earth, but it may be the last thing we ever hear. As Cal-Tech astrophysicist Allan Sands prepares to spend another perfect Pasadena

Christmas with his wife and above Los Angeles Allan children, he realizes something isn't right. The television doesn't work, mobile networks are down, and the internet slows to a halt. When Allan notices celestial objects are absent from the early-morning sky he knows this is no power outage or terrorist attack. He heads to nearby Mt. Wilson Observatory, where he discovers the cause of the strange Event is worse than he could have imagined. From his perch	can see the oncoming tsunami that will devastate the coastline and kill millions, foreshadowing disasters soon to befall the entire planet. And he may be the only person who knows why. 2,500 miles away at Hickam Air Force Base in Honolulu Lieutenant Lee Green and her raptor squad are the only pilots left to escort the president to safety as the world scrambles to save lives and comprehend what is happening. Their	next mission: Find Allan Sands and the other scientists on the president's secret First Contact list. Will the world be ready to hear what the scientists conclude about the mysterious so-called Event that turned day to night? When a strange object is spotted heading for the Earth the world wonders if the aliens are coming in peace to help us survive or to finish what they started. Equal parts high concept and high action, the Filter Trap
--	--	---

explains Fermi's Paradox in a way that contrasts the hidden terrors of the universe with the ever-present hope in the human heart.

Civil Engineering Solved Problems EB Publishing

With the ongoing global economic crisis still taking full effect on today's society, *International Corporate Finance 1e* brings a fresh approach and perspective on present events. This text focuses on a key player in this financial world: multinational corporations (MNC). By applying general financial concepts and procedures, it

explains the conduct of financial management in MNCs. Because most corporations are either directly or indirectly affected by multinational entities and have a global exposure, a study of MNCH financial management has broad applicability. This new text takes a quantitative approach with an emphasis on excel spreadsheets and current examples.

Follow the Ninja! (Teenage Mutant Ninja Turtles) Simon and Schuster

Honeyball and Bowers' *Textbook on Employment Law* is an approach to employment law with strong critical analysis whilst placing it in its wider

contexts, in a concise and user-friendly format. Fully updated to take into account the recent significant developments in this area, including the Equality Act 2010, the key topics on most employment law courses are addressed in detail. An extremely clear writing style allows this text to remain accessible and student-focussed, while providing detailed explanations and analysis of the law. The text also includes diagrams and chapter summaries throughout to aid student understanding, while further reading suggestions assist with essay preparation and research. Setting employment

law in context, this book considers both industrial and collective issues as well as examining the increasing role of the EU in UK employment law. A separate chapter on human rights also enables students to understand the role human rights legislation plays in the development of employment law. This book also contains cross referencing to Painter & Holmes' Cases & Materials on Employment Law, ensuring that these two texts continue to complement one another and provide the perfect combination of textbook analysis and the most up-to-date cases and materials. This text is accompanied by a free

Online Resource Centre (www.oxfordtextbooks.co.uk/orc/honeyball12e/) which contains updates to the law and useful weblinks.

Trees Up Close Pergamon

This market leading text is known for its comprehensive coverage, careful and correct mathematics, outstanding exercises and self contained subject matter parts for maximum flexibility.

Thoroughly updated and streamlined to reflect new developments in the field, the ninth edition of this bestselling text features modern engineering

applications and the uses of technology. Kreyszig introduces engineers and computer scientists to advanced math topics as they relate to practical problems. The material is arranged into seven independent parts: ODE; Linear Algebra, Vector Calculus; Fourier Analysis and Partial Differential Equations; Complex Analysis; Numerical methods; Optimization, graphs; and Probability and Statistics.

The 365-series books are a unique product created keeping in mind the number of days we have in a year. Each book has 365 stories that will encourage children to read at least one story each day, inculcating in them the good habit of book reading. The series is aimed to awaken children towards moral values, cultivate religious beliefs and develop their knowledge of animals in the world. Children are sure to get hooked on the escapades summarized in a lucid manner.

Romulus Buckle & the City of the Founders Professional Publications Incorporated
Using Lady Morgan's *The Wild*

Irish Girl as his point of departure, Thomas J. Tracy argues that nineteenth-century debates over what constitutes British national identity often revolved around representations of Irishness, especially Irish womanhood. He maps the genealogy of this development in fiction, political discourse, and the popular press, from Edgeworth's *Castle Rackrent* through Trollope's Irish novels, focusing on the pivotal period from 1806 through the 1870s.
