An alien intelligence initiates first contact with the Earth, but it may be the last thing we ever hear. As Cal-Tech astrophysicist Allan Sands prepares to spend another perfect Pasadena Christmas with his wife and children, he realizes something isn't right. The television doesn't work, mobile networks are down, and the internet slows to a halt. When Allan notices celestial objects are absent from the early-morning sky he knows this is no power outage or terrorist attack. He heads to nearby Mt. Wilson Observatory, where he discovers the cause of the strange Event is worse than he could have imagined. From his perch above Los Angeles Allan can see the oncoming tsunami that will devastate the coastline and kill millions, foreshadowing disasters soon to befall the entire planet. And he may be the only person who knows why. 2,500 miles away at Hickam Air Force Base in Honolulu Lieutenant Lee Green and her raptor squad are the only pilots left to escort the president to safety as the world scrambles to save lives and comprehend what is happening. Their next mission: Find Allan Sands and the other scientists on the president's secret First Contact list. Will the world be ready to hear what the scientists conclude about the mysterious so-called Event that turned day to night? When a strange object is spotted heading for the Earth the world wonders if the aliens are coming in peace to help us survive or to finish what they started. Equal parts high concept and high action, the Filter Trap

explains Fermi's Paradox in a way that contrasts the hidden terrors of the universe with the ever-present hope in the human heart.

Guide to Culturally Competent Health Care F A Davis Company

As frustration mounts in some quarters at the perceived inadequacy or speed of international action on climate change, and as the likelihood of significant impacts grows, the focus is increasingly turning to liability for climate change damage. Actual or potential climate change liability implicates a growing range of actors, including governments, industry, businesses, non-governmental organisations, individuals and legal practitioners. Climate Change Liability provides an objective, rigorous and accessible overview of the existing law and the direction it might take in seventeen developed and developing countries and the European Union. In some jurisdictions, the applicable law is less developed and less the subject of current debate. In others, actions for various kinds of climate change liability have already been brought, including high profile cases such as Massachusetts v. EPA in the United States. Each chapter explores the potential for and barriers to climate change liability in private and public law.

Slave Stealers Cambridge University Press

With the ongoing global economic crisis still taking full effect on today's society, International Corporate Finance 1e brings a fresh approach and perspective on present events. This text focuses on a key player in this financial world: multinational corporations (MNC). By applying general financial concepts and procedures, it explains the conduct of financial management in MNCs. Because most corporations are either directly or indirectly affected by multinational entities and have a global exposure, a study of MNC financial management has broad applicability. This new text takes a quantitative approach with an emphasis on excel spreadsheets and current examples.

Fearless! McGraw-Hill/Irwin

Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the

sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.

Cowie's bookbinder's manual S. Chand

Morality is one of the fundamental structures of any society, enabling complex groups to form, negotiate their internal differences and persist through time. In the first book-length study of Roman popular morality, Dr Morgan argues that we can recover much of the moral thinking of people across the Empire. Her study draws on proverbs, fables, exemplary stories and gnomic quotations, to explore how morality worked as a system for Roman society as a whole and in individual lives. She examines the range of ideas and practices and their relative importance, as well as questions of authority and the relationship with high philosophy and the ethical vocabulary of documents and inscriptions. The Roman Empire incorporated numerous overlapping groups, whose ideas varied according to social status, geography, gender and many other factors. Nevertheless it could and did hold together as an ethical community, which was a significant factor in its socio-political success.

Crane Safety Manual for Operators - Users Cambridge University Press

The initial state of learner spontaneous input processing in foreign language learning, as well as the extent to which this processing leads to intake, is of central importance to theoreticians and teachers alike. In this collection of original studies, leading experts examine a range of issues, such as what learners do when faced with a language they know little or nothing about, what factors appear to mediate beginning learners' processing of input, how beginners treat two types of information - form and meaning - in the input, and how adult cognition deals with stimulus frequency at this initial stage. This book provides a microscopic view on learners' processing of foreign language input at the early stages of learning, and evaluates a variety of methodological options within the context of ab initio processing of foreign languages other than English, such as German, Korean, Norwegian, Polish, and Spanish.

PLEASE NOTE: This is a summary of the book and NOT the original book. Creativity, Inc. by Ed Catmull: A 30-minute Summary Inside this Instaread Summary: Overview of the entire book Introduction to the Important people in the book Summary and analysis of all the chapters in the book Key Takeaways of the book A Reader's Perspective Preview of this summary: Chapter 1 Every Sunday, as a kid, Catmull watched on TV *The Wonderful World of Disney*, where Disney explained how they made their animations and incorporated technological breakthroughs into their work. One day, Catmull had a life-changing realization: a good animation was measured by whether or not the character on the screen made you believe it was a thinking being. He decided he wanted to become an animator and create emotional characters. Catmull graduated with a double major in Physics and Computer Science from the University of Utah. In his graduate program he met professor Ivan Sutherland, a pioneer in computer graphics and director of the computer graphics program. The program was funded by the Advanced Research Projects Agency (ARPA), the creators of the first computer network, ARPANET, which would later evolve into the Internet. ARPA was developed as a response to the threat of the Soviet Sputnik satellite, the first of its kind. The U.S. felt threatened by Soviet technological advancements and they developed ARPA to stay up with the Soviets. To Catmull, the lesson to be learned from this was when the competition gets smart, you need to get smarter. Catmull found enormous inspiration in the computer graphics program, not only from the technology he was discovering but also from his fellow students. The collaborative and creative atmosphere he experienced there was something he later tried to emulate at Pixar. In 1972, Catmull made his first animated film, a digitized model of his left hand. *Hand* became a reference for state-of-the-art computer animation. Professor Sutherland came up with the idea of an exchange program with Disney. Disney would send an animator to the University of Utah to learn about new technologies, and the university would send one of their students to learn about storytelling. Catmull was sent to propose....

Explorer Repair Manual S. Chand Publishing

A look at Fayetteville, North Carolina, home to Fort Bragg, that poses the question, 'Are we all military dependents?' Fayetteville has earned the nicknames of Fatalville and Fayetteenam. Unusual and not-sounusual features of the town include gross income inequalities, an extraordinarily high incidence of venereal disease, miles and miles of strip malls, and a history of racial violence. Through interviews with residents and historical research, Catherine Lutz immerses herself in the life of the town to discover how it has supported the military for over a century. From secret training operations that use civilians as mock enemies and allies to the satellite economy of the town, Lutz's history of Fayetteville reveals the burdens that military preparedness creates for all of us.

Climate Change Liability Cambridge University Press

Is construction grammar a useful framework for the study of language change? Hilpert combines the current linguistic theory of construction grammar with advanced corpus-based methodology in order to study language change in a new way. This new perspective has wide-ranging consequences for the way historical linguists think about language change.
