Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-

---

day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young

siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.

An alien intelligence initiates first contact with the Earth, but it may be the last thing we ever hear. As Cal-Tech astrophysicist Allan Sands prepares to spend another perfect Pasadena Christmas with his wife and children, he realizes something isn't right. The television doesn't work, mobile networks are down, and the internet slows to a halt. When Allan notices celestial objects are absent

---

from the early-morning sky he knows this is no power outage or terrorist attack. He heads to nearby Mt. Wilson Observatory, where he discovers the cause of the strange Event is worse than he could have imagined. From his perch above Los Angeles Allan can see the oncoming tsunami that will devastate the coastline and kill millions, foreshadowing disasters soon to befall the entire planet. And he may be the only person who knows why. 2,500 miles away at Hickam Air Force Base in Honolulu Lieutenant Lee Green and her raptor squad are the only pilots left to escort the president to safety as the world scrambles to save lives and comprehend what is happening. Their next mission: Find Allan Sands and the other scientists on the president's secret First Contact list. Will the world be ready to hear what the scientists conclude about the mysterious so-called

Event that turned day to night? When a strange object is spotted heading for the Earth the world wonders if the aliens are coming in peace to help us survive or to finish what they started. Equal parts high concept and high action, the Filter Trap explains Fermi's Paradox in a way that contrasts the hidden terrors of the universe with the ever-present hope in the human heart.

Fearless! takes place somewhere in the USA in a present-day big or medium-sized city, but it could take place in any American town. Like so many people do, the characters struggle with challenges and day-to-day frustrations that drive them toward life-changing choices about love and the pursuit of happiness. The story is engaging, with recognizable elements of reality balanced with a bit of fantasy. Fearless! reaches out and pulls on the heartstrings, tickles the funnybone, all the

Introduction to the Important people in the book  
Summary and analysis of all the chapters in the book  
Key Takeaways of the book  
A Reader's Perspective  
Preview of this summary: Chapter 1  
Every Sunday, as a kid, Catmull watched on TV The Wonderful World of Disney, where Disney explained how they

made their animations and incorporated technological breakthroughs into their work. One day, Catmull had a life-changing realization: a good animation was measured by whether or not the character on the screen made you believe it was a thinking being. He decided he wanted to become an animator and create emotional characters. Catmull graduated with a double major in Physics and Computer Science from the University of Utah. In his graduate program he met professor Ivan Sutherland, a pioneer in computer graphics and director of the computer graphics program. The program

---

was funded by the Advanced Research Projects Agency (ARPA), the creators of the first computer network, ARPANET, which would later evolve into the Internet. ARPA was developed as a response to the threat of the Soviet Sputnik satellite, the first of its kind. The U.S. felt threatened by Soviet technological advancements and they developed ARPA to stay up with the Soviets. To Catmull, the lesson to be learned from this was when the competition gets smart, you need to get smarter. Catmull found enormous inspiration in the computer graphics program, not only from the technology he was discovering but also from his fellow students. The collaborative and creative atmosphere he experienced there was something he later tried to emulate at Pixar. In 1972, Catmull made his first animated film, a digitized model of his left hand. Hand became a reference for state-of-the-art computer animation. Professor Sutherland came up with the idea of an exchange program with Disney. Disney would send an animator to the University of Utah to learn about new technologies, and the university would send one of their students to learn about storytelling. Catmull was sent to

A look at Fayetteville, North Carolina, home to Fort Bragg, that poses the question, 'Are we all military dependents?' Fayetteville has earned the nicknames of Fatalville and Fayetteenam. Unusual and not-sounusual features of the town include gross income inequalities, an extraordinarily high incidence of venereal disease, miles and miles of strip malls, and a history of racial violence. Through interviews with residents and historical research, Catherine Lutz immerses herself in the life of the town to discover how it has supported the military for over a century. From secret training operations that use civilians as mock

---

enemies and allies to the satellite economy of the town, Lutz's history of Fayetteville reveals the burdens that military preparedness creates for all of us.

Cowie's bookbinder's manual S. Chand Publishing Morality is one of the fundamental structures of any society, enabling complex groups to form, negotiate their internal differences and persist through time. In the first book-length study of Roman popular morality, Dr Morgan argues that we can recover much of the moral thinking of people across the Empire. Her study draws on proverbs, fables, exemplary stories and gnomic quotations, to explore how morality worked as a system for Roman society as a whole and in individual lives. She examines the range of ideas and practices and their relative importance,

as well as questions of authority and the relationship with high philosophy and the ethical vocabulary of documents and inscriptions. The Roman Empire incorporated numerous overlapping groups, whose ideas varied according to social status, geography, gender and many other factors.

Nevertheless it could and did hold together as an ethical community, which was a significant factor in its socio-political success. The New Artisan Bread in Five Minutes a Day Simon and Schuster

Is construction grammar a useful framework for the study of language change? Hilpert combines the current linguistic theory of construction grammar with advanced corpus-based methodology in order to study language change in a new way. This new perspective has wide-ranging consequences for the way historical linguists
