critical media studies and to put media studies on the agenda of animal ethics researchers. Contributors examine the convergence of media and animal ethics from theoretical, philosophical, discursive, social constructionist, and political economic perspectives. The book is divided into three sections: foundations, representation, and responsibility, outlining the different disciplinary approaches' application to media studies and covering how non-human animals, and the relationship between humans and non-humans, are represented by the mass media, concluding with

suggestions for how the media, as a major producer of cultural norms and values related to non-human animals and how we treat them, might improve such representations. *Out of Sight - Out of Murder* Council Oaks Distribution This is the first edition of a unique new plastics industry resource: Who's Who in Plastics & Polymers. Legare Street Press It's no secret that in today's complex world, students face unparalleled demands as they prepare for college, careers, and active citizenship. However, those demands won't be met without a fundamental shift from traditional, teacher-centered instruction toward innovative, student-centered teaching and learning. For schools ready to make such a shift, project-based learning (PBL) offers a proven framework to help students be better

equipped to tackle future challenges. Project Based Teachers encourage active questioning, curiosity, and peer learning; create learning environments in which every student has a voice; and have a mastery of content but are also comfortable responding to students' questions by saying, "I don't know. Let's find out together." In this book, Suzie Boss and John Larmer build on the framework for Gold Standard PBL originally presented in

Setting the Standard for Project Based Learning and explore the seven practices integral to Project Based Teaching: Build the Culture Design and Plan Align to Standards Manage Activities Assess Student Learning Scaffold Student Learning Engage and Coach For each practice, the authors present a wide range of practical strategies and include teachers' reflections about and suggestions from their classroom experiences. This book and a related

Think you know the real Barack Obama? You don't—not until you've read *The Amateur*. In this stunning exposé, bestselling author Edward Klein—a contributing editor to *Vanity Fair*, former foreign editor of *Newsweek*, and former editor-in-chief of the *New York Times Magazine*—pulls back the curtain on one of the most secretive White

Houses in history. He reveals a callow, thin-skinned, arrogant president with messianic dreams of grandeur supported by a cast of true-believers, all of them united by leftist politics and an amateurish understanding of executive leadership.

This volume is a collection of all-new original essays covering everything from feminist to postcolonial readings of the play as well as source queries and analyses of historical

performances of the play. The Merchant of Venice is a collection of seventeen new essays that explore the concepts of anti-Semitism, the work of Christopher Marlowe, the politics of commerce and making the play palatable to a modern audience. The characters, Portia and Shylock, are examined in fascinating detail. With in-depth analyses of the text, the play in performance and individual characters, this

book promises to be the essential resource on the play for all Shakespeare enthusiasts. **Montana; 1909** Simon & Schuster This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of

interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than

---

"zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.
