Half of all Americans live in areas subject to earthquake risk, and most Americans will travel to seismically active regions in their lifetime.

FEMA is fostering awareness of earthquake risks in the United States through the newly developed FEMA P-530, Earthquake Safety at Home. FEMA P-530 is intended to show readers why earthquakes matter where they live, and how they can “ Prepare, Protect, Survive, Respond, Recover and Repair ” from an earthquake.

This publication will help readers become familiar with why and where earthquakes might occur. It discusses wide-ranging steps that readers can take to adequately prepare and protect themselves, their family, and their belongings. These include: developing family response plans, assembling earthquake

disaster supplies, securing heavy objects and furniture, retrofitting a home, and more.

Poultry II Mariner Books

In this groundbreaking book, Scalia and Garner systematically explain all the most important principles of constitutional, statutory, and contractual

interpretation in an engaging and informative style with hundreds of illustrations from actual cases. Is a burrito a sandwich? Is a corporation entitled to personal privacy? If you trade a gun for drugs, are you using a gun in a drug transaction? The authors grapple with these and dozens of equally curious questions while explaining the most principled, lucid, and reliable techniques for deriving meaning from authoritative texts. Meanwhile, the book takes up some of the most controversial issues in modern jurisprudence. What, exactly, is "textualism?" Why is "strict construction" a bad thing? What is the true doctrine of "originalism?" And which is more important: the spirit of the law, or the letter? The authors write with a well-argued point of view that is definitive yet nuanced, straightforward yet sophisticated.

Since the 1960s, the class action lawsuit has been a powerful tool for holding businesses accountable. Yet years of attacks by corporate America and unfavorable rulings by the Supreme Court have left its future uncertain. In this book, Brian T. Fitzpatrick makes the case for the importance of class action litigation from a surprising political perspective: an unabashedly conservative point of view. Conservatives have opposed class actions in recent years, but Fitzpatrick argues that they should see such litigation not as a danger to the economy, but as a form

of private enforcement of the law. He starts from the premise that all of us, conservatives and libertarians included, believe that markets need at least some rules to thrive, from laws that enforce contracts to laws that prevent companies from committing fraud. He also reminds us that conservatives consider the private sector to be superior to the government in most areas. And the relatively little-discussed intersection of those two beliefs is where the benefits of class action lawsuits become clear: when corporations commit misdeeds, class action lawsuits enlist the private sector to intervene, resulting in a smaller role for the government, lower taxes, and, ultimately, more effective solutions. Offering a novel argument that will surprise partisans on all sides, The

Conservative Case for Class Actions is sure to breathe new life into this long-running debate.
