Published in 1993, this brave, original novel is considered to be the finest account ever written of the complexities of a transgendered existence. Woman or man? Thats the question that rages like a storm around Jess Goldberg, clouding her life and her identity. Growing up differently gendered in a blue--collar town in the 1950s, coming out as a butch in the bars and factories of the prefeminist 60s, deciding to pass as a man in order to survive when she is left without work or a community in the early 70s. This powerful, provocative and deeply moving novel sees Jess coming full circle, she learns to accept the complexities of being a transgendered person in a world demanding simple explanations: a he-she emerging whole, weathering the turbulence.

The de facto how-to manual of the international Food Not Bombs movement, which provides free food to the homeless and hungry and has branches in countries on every continent except Antarctica, this book describes at length how to set up and operate a Food Not Bombs chapter. The guide considers every aspect of the operation, from food collection and distribution to fund-raising, consensus decision making, and what to do when the police arrive. It contains detailed information on setting up a kitchen and cooking for large groups as well as a variety of delicious recipes. Accompanying numerous photographs is a lengthy section on the history of Food Not Bombs, with stories of the jailing and murder of activists, as well as premade handbills and flyers ready for photocopying.

An award-winning scientist offers his unorthodox approach to childrearing: “ Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions ”

(Amy Chua, author of Battle Hymn of the Tiger Mother). If you ’ re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley ’ s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You ’ ll be laughing and learning at the same time.
