Regular cold-water immersion can improve your physical health and

emotional well-being. Whether you are an elite athlete, a bio-hacker, a health and fitness enthusiast, or someone who is trying to reboot your immune system, cold water might be the missing piece to enhance your results. However, if you live in a warm climate, what options do you have? Cold showers are a good place to start, but do not provide consistent temperatures year-round, and most people find them to be uncomfortable at best. Buying and hauling ice gets expensive and takes a lot of time. Cryotherapy chambers are inconvenient and expensive. Commercially built cold plunges can cost several thousand - or tens of thousands - of dollars. So, what is a great solution for the average person? Convert a chest freezer into a cold plunge! However, chest freezers are not meant to hold water. Creating a personal cold plunge from a chest freezer is fraught with potential problems and missteps. If you don't set it up correctly, you can damage or break your chest freezer, waste hundreds of dollars and countless hours of time, or worse, injure yourself. After two years of research and modifications and helping more than 1,500 people from 72 countries in a private online group, John Richter has created a guide book that helps you convert a chest freezer into a cold plunge while avoiding costly mistakes and frustration. The Ultimate Chest Freezer Cold Plunge DIY Guide helps you: - Select the best chest freezer - Design options for various budgets - Prevent rust and other damage- Choose equipment for easy use and maintenance- Keep your water clean- with or without chemicals- Be safe- Set the optimal temperature- Create a cold-water practice- Find the best training- Avoid costly mistakes- And much more Each chapter is easy to read and offers step-by-step directions. The book includes a buyer's guide, setup checklist, and a FAQ that answers more than 50 questions. This book is a must-have for professional athletes, students of the Wim Hof Method, followers of Dr. Jack Kruse, and anyone else who wants to take the benefits of cold training to the next level.

An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting

---

and its conventions” (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.
