The Morphological Atlas of the Dutch Dialects (MAND) presents word formation in Dutch and Frisian dialects at the end of the twentieth

century in two comprehensive volumes. Based on data acquired in the field between 1979 and 2000, this collaborative effort between linguists from the Netherlands and Belgium deals with the grades of comparison of adjectives, possessive pronouns, personal pronouns for subject and object, the endings of present- and past-tense strong and weak verbs, the participle prefix, and the stem form of strong verbs. graphically-weighted statistics and local regression approaches A better overview of local models with reference to recent critical reviews about the subject area Expanded coverage of individual methods and connections between them Chapters have been restructured to clarify the distinction between global and local methods A new section in each chapter references key studies or other accounts that support the book Selected resources provided online to support learning An introduction to the methods and their underlying concepts, the book uses worked examples and case studies to demonstrate how the algorithms work their practical utility and range of application. It provides an overview of a range of different approaches that have been developed and employed within Geographical Information Science (GIScience). Starting with first principles, the author introduces users of GISystems to the principles and application of some widely used local models for the analysis of spatial data, including methods being developed and employed in geography and cognate disciplines. He discusses the relevant software packages that can aid their implementation and provides a summary list in Appendix A. Presenting examples from a

---

variety of disciplines, the book demonstrates the importance of local models for all who make use of spatial data. Taking a problem driven approach, it provides extensive guidance on the selection and application of local models. *Basic Wiring* Car PC Hacks A pre-release edition enables developers to tap the author's unedited content while offering access to significant

updates and the final ebook version, in a guide that explains how to develop application for Mac OS X with MacRuby and provides coverage of Interface Builder, the Cocoa libraries and more. Original. Ham Radio For Dummies Morgan James Publishing This book contains articles on advanced topics in language architectures and programming

environments. The chapters are written by distinctive leaders in their respective research fields. The original articles and reprints are enhanced by the editors' descriptions which are intended to guide the reader. The book will be of immense use to computer science students, computer system architects and designers, and designers of programming environments, requiring a deep and broad knowledge of

---

these fields. Micro Markets Bentley Publishers Learning Not Schooling: Reimagining the Purpose of Education examines how both the curiosity and the initiative of students in their formative years can be stimulated by partnering local schools with the world of adult work and professional expertise. This tactic addresses some of the

issues that seem to continually plague us, such as how to help students learn more effectively in the modern age, or how to more fully address some of the perpetual inequities between different socioeconomic groupings. Drawing on his experiences from founding and directing a private school for students age six to fourteen, Lyn

Lesch presents a new model for education in which learning for students increasingly occurs in the world of adult expertise, with classroom teachers taking on the role of conduits that not only prepare students to learn from professionals working in various fields but also assist them in absorbing the advanced information

---

and knowledge they will be acquiring.
