In this book, Dr. Li and his author team plan to emphasize why mouse models are useful in vivo systems for understanding disease mechanisms and developing therapeutic strategies in blood cancers. The authors

do not intend to cover all types of blood cancers; instead, they will focus on some major ones such as leukemias and lymphomas. However, the authors will try to cover as much as they can the cancer types and point out that many blood cancers need to be studied in mouse disease models although they are still not available at present. A major focus in the book will be to show what we can or cannot learn from mouse disease models and to also show the critical contributions of mouse models in therapeutic drug development.

Mouse Models of Human Blood Cancers

The National Politics of EU Enlargement in the Western Balkans examines the way in which a number of European Union member states, including Germany and France, formulate their policies towards enlargement in the Western Balkans. The six countries of the Western Balkans - Albania, Bosnia and Herzegovina, Kosovo, Montenegro, North Macedonia and Serbia - are on course to become the next members of the European Union. While there has been a lot of work on the ways in which these countries are preparing for accession, and how the EU as a whole approaches the question of expansion, very little attention has been paid to how individual EU member states regard enlargement into a region that presents a number of serious challenges, including

the legacies of the conflicts of the 1990s, economic underdevelopment and poor governance. Focusing on key states, such as Germany, France and Italy, the neighbouring countries of Central and South East Europe, and Britain, once a leading advocate of enlargement that is now in the process of leaving the European Union, this volume casts important new empirical and conceptual light on the diverse motivations that underpin member state attitudes towards EU enlargement. The National Politics of EU Enlargement in the Western Balkans will be of great interest to scholars of the European Union, European politics, and the politics of the Western Balkans. The chapters were originally published as a special issue of Southeast European and Black Sea Studies.
