The first and only monograph available on the subject, *The Roman City and its Periphery* offers a full and detailed treatment of the little-investigated aspect of Roman urbanism – the phenomenon of suburban development. Presenting archaeological and literary evidence alongside sixty-three plans of cities, building plans, and photographs, Penelope Goodman examines how and why Roman suburbs grew up outside Roman cities, what was distinctive about the nature of suburban development, and what contributions buildings and activities in the suburbs might make to the character and function of the city as a whole. With full bibliography and annotations throughout, this will not only provide a coherent treatment of an essential theme for students of Roman urbanism, but archaeologists, urban planners and geographers also, will have an excellent comparative tool in the study of modern urbanism.

Ham Radio License Manual Pittsburgh : Westinghouse

This must-read for lovers of Stephen King's *The Shining* will leave readers breathless as Seda and her family find themselves at the mercy of a murderer in an isolated and snowbound hotel. Get ready for what Kirkus calls "A bloody, wonderfully creepy scare ride." When her mom inherits an old, crumbling mansion, Seda's almost excited to spend the summer there. The grounds are beautiful and it's fun to explore the sprawling house with its creepy rooms and secret passages. Except now her mom wants to renovate, rather than sell the estate—which means they're not going back to the city...or Seda's friends and school. As the days grow shorter, Seda is filled with dread. They're about to be cut off from the outside world, and she's not sure she can handle the solitude or the darkness it brings out in her. Then a group of teens get stranded near the mansion during a blizzard. Seda has no choice but to offer them shelter, even though she knows danger lurks in the dilapidated mansion—and in herself. And as the snow continues to fall, what Seda fears most is about to become her reality...

This is the edition to purchase if you plan to take your General Exam after July 1, 2019. If your plan is to take it before then, please see the earlier edition of this program, under the same title. Everything you need to prepare for your General Class ham license. Covers every question on the General exam. Memorizing 400+ random answers is hard -- and boring. Learning is easy! If you've made the decision to open up your ham radio world by going for the General Class License, great! General is certainly more challenging than Technician, but *The Fast Track to Your General Class Ham Radio License* explains the reasoning and technology behind each correct answer on the General Class exam so you'll understand and remember the subject matter. Created by an experienced ham and adult educator, it's like having your own, patient, experienced, good-humored mentor for the exam. To get your General Class license you must pass a multiple-choice test. The General license test consists of 35 questions drawn from a pool of 462. Memorizing the answers to 462 disconnected questions is difficult, but *The Fast Track* makes getting your upgrade easier by explaining the logic behind each correct answer. It's simple: When you understand the material, and you have a context for the material, you remember the answers and pass the test. Best of all, once you've passed your exam you'll have a solid grounding in ham radio basics. - Includes every possible question and every answer - Correct answers clearly marked in bold - Precise instructions for how to locate a testing session, how to prepare, and even what to bring -- and what not to bring -- to the test. - All technical topics explained in clear, plain language, often with illustrations - Step by step instructions to solve all the math problems - Test taking strategies - Hints to easily solve many questions and avoid the traps in the test - Written in "learning order", not just the (confusing) order of the official question bank. - Covers questions that will be used until June 30, 2019. - Over 300 pages packed with information Rave reviews for *The Fast Track To Your Technician Class Ham Radio License*: "This is a great book. So many of the study guides are just question dumps and it's a horrible way to learn, at least for me. I need an explanation and something to keep my interest and Mr. Burnette's book fit the bill perfectly. I echo all the sentiments of the other reviewers, the author is a top notch communicator." "Michael Burnette's ham radio exam prep book is the most useful and comprehensive book that I have found on this subject and makes getting ready for this exam not only easy, but fun. I have learned so much since studying this guide and feel ready to take this exam at a moment's notice. The guide has a wealth of information, not only on the questions and answers, but on the exam itself that is sure to put any test taker's mind at ease." "The Audible copy was GREAT because Michael Burnette is an exciting and entertaining and memorable guide!" "Thank you! Thank you a thousand times over. I bought your book in order to study for my tech license(Kindle version) and the audiobook and I loved them! I originally bought ** *****'s CD's and they confused me. I bought yours and it made learning simple and enjoyable. I did this to surprise my husband of 30 years who has had a license sincethe early parts of our marriage. He has asked me off and on to consider getting a license and I kept saying no. Well with the help of your book and audiobook, I was able to blow his doors off and pass my technician exam first try. Now if you only had volumes for general and expert, the world would be perfect. Seriously thanks again." **The Radio Amateur's Handbook** Amer Radio Relay League
Memorizing answers is hard. Learning is easy! *The Fast Track to Your Technician Ham Radio License* explains the reasoning and technology behind each correct answer on the Amateur Radio exam so you'll understand and remember the subject matter. Created by an experienced ham and adult educator, it's like having your own, patient, experienced, good-humored mentor for the exam. Technician is the entry-level ham radio license that lets you operate on all ham channels from 30 MHz up, which includes the very popular VHF and UHF bands. To get your license you must pass a multiple-choice test. The Technician license test consists of 35 questions drawn from a pool of about 350. Memorizing the answers to 350 questions is difficult, but *The Fast Track* makes getting your license easy by explaining the logic behind each correct answer. It's simple: When you understand the material, you remember the answers and pass the test. Best of all, once you've passed your exam you'll have a solid grounding in ham radio basics. - Includes every possible question and every answer - Correct answers clearly marked in bold - Precise instructions for how to locate a testing session, how to prepare, and even what to bring -- and what not to bring -- to the test. - All technical topics explained in clear, plain language, most with

illustrations - Step by step instructions to solve all the math problems, complete with exactly which keys to press on your calculator for each problem - Test taking strategies - Hints to easily solve many questions and avoid the traps in the test - Written in "learning order," not just the order of the official question bank. - Covers questions that will be used until June 30, 2018. - Nearly 300 pages packed with information

From the award-winning author of the Fast Track ham license series. Don't let a few math problems stop you from enjoying the great hobby of ham radio! The questions in the question pool for the FCC General Class Amateur Radio License include questions about conversions of electronic units in the metric system; Ohm's Law and Joule's Law problems; frequency to wavelength conversions; wavelength to frequency conversions; decibel/power calculations; series and parallel resistance, inductance and capacitance calculations; peak-to-peak and RMS voltage calculations; and impedance matching transformers. While the math is quite straightforward, if the language and concepts of electronics are new to you, it can all be a bit baffling. If that's you, this is the workbook for you. Each problem that can be on the exam is completely solved, with step-by-step instructions. We've color-coded every value to help you follow it through the solutions. We even tell you precisely which buttons to push on which calculator to make the answer appear. While all the math problems in the question pool are covered in the full license program, *The Fast Track to Your General Class Ham Radio License*, this workbook provides extra practice and explanation for those of us (like the author!) who needed a boost in our math skills to get our licenses. The program was co-designed by Michael Burnette, AF7KB, the author of the popular Fast Track ham radio license programs and his wife, Kerry, KC7YL. Kerry is a math and science teacher with a Masters degree in teaching and years of experience in making math come alive for students. Beyond learning how to "hammer the exam," you'll have a solid grounding in the fundamentals of math for electronics -- knowledge that will serve you well in the hobby and when you decide to take the step up to your Amateur Extra Class license. If you're a person who struggled with math in the past, if you suspect you "don't have the math gene," even if you don't remember a shred of your Technician level math, if you can push the buttons on a calculator, this course will have you confidently solving those equations like a pro in just a few hours. This course doesn't just teach you the math -- it teaches you how to learn the math. Note: This workbook is an adjunct to *The Fast Track to Your General Class Ham Radio License* book and audio; it provides additional training on the required math and does not cover the entire question bank of 400+ questions. While the exercises can be completed on any calculator, it provides specific key-by-key instructions for the affordable and widely available Texas Instruments TI-30XS calculator.
