No Nonsense General Class License Study
Guide Routledge

THIS EDITION IS FOR TESTS AFTER JULY
1, 2020 Amateur radio license tests are multiple-
choice with three wrong answers and one right
answer for each question. Traditional test-prep
materials go through the questions and all the
possible answers. For the Extra test, you see 622
questions and 2,488 answers but 1,866 answers
are wrong! Why be confused and frustrated
studying three wrong answers for every one right
answer? Pass Your Amateur Radio Extra Class
Test - The Easy Way is different. The focus is on
the right answers and only the right answers with
full explanations - All Ham and No Spam. The
book is in two parts. The first explains the
concepts covering every single test question with
hints and cheats to help you understand
recognize the correct answer. The second part is
a condensed Quick Summary with only the
questions and correct answers. Since you never
see the wrong answers, the correct answers will
pop out when you take the test. You learn to
recognize, not memorize, the right answer. It
couldn't be easier! Here are two testimonials: "I
just wanted to let you know that I purchased all 3
of your amateur radio license study books, read
them all 3 repeatedly and passed all three tests in
3 weeks! 1st week Tech, 2nd week General, and
3rd week Extra class. Your books give the
information needed to understand the material
and questions and in turn, give the reader the
knowledge and confidence to pass the exams. I

have wanted to get involved in amateur radio for
years and now I have! I will be sure to let
everyone interested in amateur radio study
material to be sure and read Easy Way Ham
Books! Thank you for writing these books."
"Thanks for writing the "Pass Your Test The Easy
Way" books! I got my Tech license in May, I
scored 34/35. I got my General in June, scored
35/35. I just passed my Extra Class test this week
and scored 50/50. I went to the same VE's for
each test and after the Extra exam and some
handshakes, they had questions about how I
studied. I showed them my copy of your Extra
class book, highlighted, notes written in the
margins and so on. I used your books for each
exam and they definitely made a difference for
me. I did my part as well but your books
definitely made it easier. The books are now part
of the ham radio reference section in my library. I
don't normally go out of my way to thank an
author, in fact, I've never done this before but
your books made such a big difference for me I
felt I should reach out and let you know about it.
So, thanks again for writing this series, 73! "

Think all Ham Radio study
guides are the same? Think
again! With easy to
understand lessons and
practice test questions
designed to maximize your
score, you'll be ready. You
don't want to waste time -
and money! - retaking an
exam. You want to accelerate
your education, not miss
opportunities for starting
your future career! Every
year, thousands of people
think that they are ready for
the Ham Radio test but
realize too late when they
get their score back that
they were not ready at all.

They weren't incapable, and they certainly did their best, but they simply weren't studying the right way. There are a variety of methods to prepare for the Ham Radio test...and they get a variety of results. Trivium Test Prep's Ham Radio study guide provides the information, secrets, and confidence needed to get you the score you need - the first time around. Losing points on the Ham Radio exam can cost you precious time, money, and effort that you shouldn't have to spend. What is in the book? In our Ham Radio study guide, you get the most comprehensive review of all tested concepts. The subjects are easy to understand, and have fully-explained example questions to ensure that you master the material. Best of all, we show you how this information will be applied on the real exam; Three practice exams are included so that you can know, without a doubt, that you are prepared. Our study guide is streamlined and concept-driven so you get better results through more effective study time. Why spend days or even weeks reading through meaningless junk, trying to sort out the helpful information from the fluff? We give you everything you need to know in a concise, comprehensive, and effective package.

The National Parks Amer Radio Relay League

Memorizing answers is hard. Learning is easy! The Fast Track to Your Technician Ham Radio License explains the reasoning and technology behind each correct answer on the Amateur Radio exam so you'll understand and remember the subject matter. Created by an experienced ham and adult educator, it's like having your own, patient, experienced, good-humored mentor for the exam. Technician is the entry-level ham radio license that lets you operate on all ham channels

from 30 MHz up, which includes the very popular VHF and UHF bands. To get your license you must pass a multiple-choice test. The Technician license test consists of 35 questions drawn from a pool of about 350. Memorizing the answers to 350 questions is difficult, but The Fast Track makes getting your license easy by explaining the logic behind each correct answer. It's simple: When you understand the material, you remember the answers and pass the test. Best of all, once you've passed your exam you'll have a solid grounding in ham radio basics. - Includes every possible question and every answer - Correct answers clearly marked in bold - Precise instructions for how to locate a testing session, how to prepare, and even what to bring -- and what not to bring -- to the test. - All technical topics explained in clear, plain language, most with illustrations - Step by step instructions to solve all the math problems, complete with exactly which keys to press on your calculator for each problem - Test taking strategies - Hints to easily solve many questions and avoid the traps in the test - Written in "learning order," not just the order of the official question bank. - Covers questions that will be used until June 30, 2018. - Nearly 300 pages packed with information

Ain't God Good The ARRL General Class License Manual

The leading text and reference on radar cross section (RCS) theory and applications, this work presents a comparison of two radar signal strengths. One is the strength of the radar beam sweeping over a target, the other is the strength of the reflected echo sensed by the receiver. This book shows how the RCS "gauge" can be predicted for theoretical objects.

Hf Antenna Topics Amer Radio Relay League

This must-read for lovers of Stephen King's *The Shining* will leave readers breathless as Seda and her family find themselves at the mercy of a murderer in an isolated and snowbound hotel. Get ready for what Kirkus calls "A bloody, wonderfully creepy scare ride." When her mom inherits an old, crumbling mansion, Seda's almost excited to spend the summer there. The grounds are beautiful and it's fun to explore the sprawling house with its creepy rooms and secret passages. Except now her mom wants to renovate, rather than sell the estate—which means they're not going back to the city...or Seda's friends and school. As the days grow shorter, Seda is filled with dread. They're about to be cut off from the outside world, and she's not sure she can handle the solitude or the darkness it brings out in her. Then a group of teens get stranded near the mansion during a blizzard. Seda has no choice but to offer them shelter, even though she knows danger lurks in the dilapidated mansion—and in herself. And as the snow continues to fall, what Seda fears most is about to become her reality...

Profoundly Disconnected : A True Confession from Mike Rowe by Mike Rowe

The Fast Track to Your General Class Ham Radio License
This is the edition to purchase if you plan to take your General Exam after July 1, 2019. If your plan is to take it before then, please see the earlier edition of this program, under the same title. Everything you need to prepare for your General Class ham license. Covers every question on the General exam. Memorizing 400+ random answers is hard -- and boring. Learning is easy! If you've made the decision to open up your ham radio world by going for the General Class License,

great! General is certainly more challenging than Technician, but The Fast Track to Your General Class Ham Radio License explains the reasoning and technology behind each correct answer on the General Class exam so you'll understand and remember the subject matter. Created by an experienced ham and adult educator, it's like having your own, patient, experienced, good-humored mentor for the exam. To get your General Class license you must pass a multiple-choice test. The General license test consists of 35 questions drawn from a pool of 462. Memorizing the answers to 462 disconnected questions is difficult, but The Fast Track makes getting your upgrade easier by explaining the logic behind each correct answer. It's simple: When you understand the material, and you have a context for the material, you remember the answers and pass the test. Best of all, once you've passed your exam you'll have a solid grounding in ham radio basics. - Includes every possible question and every answer - Correct answers clearly marked in bold - Precise instructions for how to locate a testing session, how to prepare, and even what to bring -- and what not to bring -- to the test. - All technical topics explained in clear, plain language, often with illustrations - Step by step instructions to solve all the math problems - Test taking strategies - Hints to easily solve many questions and avoid the traps in the test - Written in "learning order", not just the (confusing) order of the official question bank. - Covers questions that will be used until June 30, 2019. - Over 300 pages packed with information Rave reviews for The Fast Track To Your Technician Class Ham Radio License: "This is a great book. So many of the study guides are just question dumps and it's a horrible way to learn, at least for me. I need an explanation and something to keep my interest and Mr. Burnette's book fit the bill perfectly. I echo all the sentiments of the other reviewers, the author is a top notch communicator." "Michael Burnette's ham radio exam prep book is the most useful and comprehensive book that I have found on this subject and makes getting ready for this exam not only easy, but fun. I have learned so much since studying this guide and feel ready to take this exam at a moment's notice. The guide has a wealth of

information, not only on the questions and answers, but on the exam itself that is sure to put any test taker's mind at ease." "The Audible copy was GREAT because Michael Burnette is an exciting and entertaining and memorable guide!" "Thank you! Thank you a thousand times over. I bought your book in order to study for my tech license(Kindle version) and the audiobook and I loved them! I originally bought *****'s CD's and they confused me. I bought yours and it made learning simple and enjoyable. I did this to surprise my husband of 30 years who has had a license sincethe early parts of our marriage. He has asked me off and on to consider getting a license and I kept saying no. Well with the help of your book and audiobook, I was able to blow his doors off and pass my technician exam first try. Now if you only had volumes for general and expert, the world would be perfect. Seriously thanks again."

Successful Wire Antennas

The first and only monograph available on the subject, The Roman City and its Periphery offers a full and detailed treatment of the little-investigated aspect of Roman urbanism - the phenomenon of suburban development. Presenting archaeological and literary evidence alongside sixty-three plans of cities, building plans, and photographs, Penelope Goodman examines how and why Roman suburbs grew up outside Roman cities, what was distinctive about the nature of suburban development, and what contributions buildings and activities in the suburbs might make to the character and function of the city as a whole. With full bibliography and annotations throughout, this will not only provide a coherent treatment of an essential theme for students of Roman urbanism, but archaeologists, urban planners and geographers also, will have an excellent comparative tool in the study of modern urbanism.

A Guide to the NanoVNA

A technical manual describing the history, construction, calibration of the NanoVNA. Explains model differences, application and use of the device. 52 illustrations (photos and screenshots), 20 in color.

Annual Index

The premiere volume includes articles on a multiband

portable, quads and loops, baluns, the Smith Chart, and more.

Deep Joy

From the award-winning author of the Fast Track ham license series. Don't let a few math problems stop you from enjoying the great hobby of ham radio! The questions in the question pool for the FCC General Class Amateur Radio License include questions about conversions of electronic units in the metric system; Ohm's Law and Joule's Law problems; frequency to wavelength conversions; wavelength to frequency conversions; decibel/power calculations; series and parallel resistance, inductance and capacitance calculations; peak-to-peak and RMS voltage calculations; and impedance matching transformers. While the math is quite straightforward, if the language and concepts of electronics are new to you, it can all be a bit baffling. If that's you, this is the workbook for you. Each problem that can be on the exam is completely solved, with step-by-step instructions. We've color-coded every value to help you follow it through the solutions. We even tell you precisely which buttons to push on which calculator to make the answer appear. While all the math problems in the question pool are covered in the full license program, The Fast Track to Your General Class Ham Radio License, this workbook provides extra practice and explanation for those of us (like the author!) who needed a boost in our math skills to get our licenses. The program was co-designed by Michael Burnette, AF7KB, the author of the popular Fast Track ham radio license programs and his wife, Kerry, KC7YL. Kerry is a math and science teacher with a Masters degree in

teaching and years of experience in making math come alive for students. Beyond learning how to "hammer the exam," you'll have a solid grounding in the fundamentals of math for electronics -- knowledge that will serve you well in the hobby and when you decide to take the step up to your Amateur Extra Class license. If you're a person who struggled with math in the past, if you suspect you "don't have the math gene," even if you don't remember a shred of your Technician level math, if you can push the buttons on a calculator, this course will have you confidently solving those equations like a pro in just a few hours. This course doesn't just teach you the math -- it teaches you how to learn the math. Note: This workbook is an adjunct to The Fast Track to Your General Class Ham Radio License book and audio; it provides additional training on the required math and does not cover the entire question bank of 400+ questions. While the exercises can be completed on any calculator, it provides specific key-by-key instructions for the affordable and widely available Texas Instruments TI-30XS calculator.

Ham Radio Exam Prep

Memorizing answers is hard -- and boring. Learning is easy! If you've made the decision to open up your ham radio world by going for the Extra Class License, great! The latest edition of the Extra class exam is certainly challenging. The question bank includes over 600 questions, some 25% of which are new or revised since the last edition. The Fast Track to Your Extra Class Ham Radio License explains the reasoning and technology behind each correct answer on the exam so you'll understand and remember the subject matter. It's a complete learning system; books, audio, and the

fasttrack.com web site with custom-made practice exams that integrate with the chapters in the book and audiobook. There are also teaching videos on the site. Created by an experienced ham and adult educator, it's like having your own, patient, experienced, good-humored mentor for the exam. (One reason Michael is a frequent presenter at major ham conventions.) To get your Extra Class license you must pass a multiple-choice test. The Extra license test consists of 50 questions drawn from a pool of 621. Memorizing the answers to 621 disconnected questions is difficult, but The Fast Track makes getting your upgrade easier by explaining the logic behind each correct answer. It's simple: When you understand the material, and you have a context for the material, you remember the answers and pass the test. We might even have a little fun along the way. (This may be the only amateur radio book to teach an astronomical concept with a nacho cheese analogy.) - Includes every possible question and every answer - Correct answers clearly marked in bold - Precise instructions for how to locate a testing session, how to prepare, and even what to bring -- and what not to bring -- to the test. - All technical topics explained in clear, plain language. The Kindle and print editions include over 200 illustrations to support your learning. - Step-by-step instructions to solve all the math problems - Test-taking strategies - Hints to easily solve many questions and avoid the traps in the test - Written in "learning order", not just the order of the official question bank, which is only a "warehouse" of questions and was never designed to teach anyone anything. - Chapter summaries drive home the exam-conquering points to remember from each chapter. - Complete subject and question index. - Incorporates the exclusive Fast Track study plan. We don't just present the material, we teach you the most effective way to learn it and we provide the tools to

implement it.- Covers questions that will be used until July 1, 2024.

The ARRL Antenna Compendium

Are you looking for enough practice and theory to pass the test with a great score? Have you tried shorter books and found them lacking? Look no further - this guide was designed to help students pass their exams the first time. How is this guide different from others? This is a complete guide. It describes every topic in detail and also includes 100 test questions and answers.
