The Radio Amateur Antenna Handbook Amer Radio Relay League

"The most complete book about amateur radio on-the-air operating ever published"--Cover subtitle.

12 Week Workout Plan Watson-Guption Publications

This book includes useful tips and tricks for the configuration and operation of the fabulous Icom IC-7300 transceiver. Rather than duplicate the manuals which describe each button, function, and control, I have used a more functional approach. This is a "how to do it" book with easy to follow step by step instructions. The IC-7300 has

created something of a revolution in the amateur radio world. With this radio, Icom provides the advantages of SDR technology in a format that is familiar for users of their earlier transceivers. Most importantly the IC-7300 has many features that were previously only available on much more expensive radios.

British Radio and Television Pioneers Legare Street Press

This well-known classic on Quad theory, design, construction, and operation has been updated to include new Quad designs, new dimension charts, additional gain figures, and much more.

Learning the Radiotelegraph Code Watson-Guptill Publications

Consume the Spirit of Thine Greatest Enemy, in the Land of Erebus, on All Hallows' Eve... Harley has a game plan to stop the third ritual: infiltrate the Cult of Eris and steal back her mother's soul. But her only way in is through her devious half-brother Finch--the same guy who was Katherine's most devoted bootlicker not too long ago. Joining a cult counts as sibling bonding time, right? Left with no choice but to break Finch out of prison, Harley must play the part of a loyal cultist. Within Katherine's inner circle, deadly initiation trials and watchful enemies make every moment a battle for survival. Harley hasn't forgotten that Finch once belonged to the cult himself, and she wonders if she'll end up with a valuable new ally... or a knife in the back. Buy now! *Beware of spoilers in the reviews below that are without spoiler alerts.*

The Radio Boys on Secret Service Duty Simon and Schuster

One of a series of three resource guides concerned with communication, control, and computer access for the disabled or the

elderly, the book focuses on hardware and software. The guide's 13 chapters each cover products with the same primary function. Cross reference indexes allow access to listings of products by function, input/output feature, and computer model. Switches are listed separately by input/output features. Typically provided for each product are usually an illustration, the product name, vendor, size, weight, power source, connector type, cost, and a description. Part I, "Computer Adaptations," presents the following types of items: modifications for standard keyboards; alternate inputs usable with all software; input devices usable with only some software; input adapters for computers; alternate display systems usable with all software; Braille printers and tactile display components; speech synthesizers; and other software and hardware adaptations. Part II, "Application Software for Special Ed and Rehab," includes software for administration and management; assessment; education, training, and therapy; recreation; and personal tools or aids. Appendixes include a list of additional sources of information, a glossary, addresses of manufacturers listed with their products, and an alphabetical listing of all products in the 3-book series. Watson-Guptill Publications

This book includes useful tips and tricks for the configuration and operation of the amazing Icom IC-9700 VHF and UHF transceiver. Rather than duplicate the manuals which describe each button, function, and control, I have used a more functional approach. This is a "how to do it" book with easy to follow step by step instructions. The IC-9700 is a ground breaking amateur radio transceiver. It is the first full power, multi-mode, VHF/UHF amateur radio transceiver to be based on SDR technology. With this radio, Icom provides the perfect companion to the IC-7300. It is a transceiver for VHF and UHF DX operation, working satellites, EME, and repeater operation, supporting both traditional FM repeaters and D-Star digital. Many of the features included in the IC-9700 have never been available on

VHF/UHF amateur radio transceivers before. All of these great features make the IC-9700 quite a complicated radio to configure and operate. The Radio Today guide to the Icom IC-9700 will help you to get the most out of this incredible transceiver.

W1FB's QRP Notebook Trace Research and Development Center Waisman Center

Behind the Front Panel by David Rutland, an electronics engineer with over 25 years of experience in the design of vacuum tube circuits, explores the whys and wherefores of the components and circuits of the first broadcast radios. By using simplified descriptions and illustrations, supplemented by 25 photographs of actual radio component parts, he provides a readable explanation of what goes on inside the old battery radios. His story begins with the invention of the radio tube at the turn of the last century and concentrates on the engineering design and development through the 1920's. Design examples are taken from over 45 actual radios manufactured in the decade that saw broadcast radio start as a national pastime and end as a national necessity. This book is a classic in radio history. This edition is carefully re-mastered from the original and published by the California Historical Radio Society.

73 Amateur Radio University of Virginia Press

From Simon & Schuster, Currents of Death is Paul Brodeur's exploration of power lines, computer terminals, and the attempt to cover up their threat to your health. Paul Brodeur is a longtime staff writer at The New Yorker magazine and is the author of eight previous books. In his latest work, Currents of Death explores the threat to public health from power lines.
