Starting a successful brewery takes more than heart. The Brewers Association's Guide to Starting Your Own Brewery delivers essential industry knowledge to brewers aspiring to chart their own course. While America's craft beer renaissance continues, emphasis must remain on producing the highest quality beer—or the success of the entire industry is jeopardized. This comprehensive guide will help you plan and open a thriving, quality-oriented brewery. It reviews everything that matters, from site selection and branding to regulatory requirements, flooring choices and equipment considerations. Industry veteran Dick Cantwell of Elysian Brewing adeptly covers ingredients, financing, business plans, quality assurance,

distribution, wastewater, sustainability practices and more, for prospective brewpub and packaging brewery owners alike.

Cantwell walks the reader through the planning and execution required to turn craft brewing dreams into reality.

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he

proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Focuses on the work of four Victorian anti-feminist women writers-- Eliza Linton,

Charlotte Yonge, Mrs. H. Ward, and Margaret Oliphant-- and asks why, despite their own liberated lifestyles, they publicly opposed the advancement of women. Surveys women's anti-feminist attitudes after Mary Wollstonecraft's death, as well as selections from the novelists' best known works and journalism, examining their construction of gender ideals, criticism of the church, and their antagonism to literary predecessors such as Jane Austin and George Eliot. The author stresses their inconsistencies, and suggests that their novels reveal a strong attraction to

the world of work. Annotation

"A parent's gripping journey
of awareness, acceptance, and
appreciation of her two boys
dealing with significant
challenges brought on by
autism." --Stephen Mark
Shore, EdD When Karla Akins
hoped that her autistic sons
could learn to read and
function independently,
doctors warned her that those
expectations would never be
met. She set out to prove

that, despite those warnings,
all things are possible
through God. Laced with humor
and compassion, A Pair of
Miracles is the heartwarming
story of her journey rearing
adopted twin sons, each
diagnosed with autism and
fetal alcohol disorder. This
is more than a moving
biography from a mom on the
front lines, however. It is a
powerful tool, full of
practical help for parents,
educators, and church members
working with children who have
intellectual disabilities,
speech impairments, and other

limitations on the autism spectrum. It is also a challenge to the church to welcome and celebrate all the members of their congregation, no matter their abilities. Thanks to Karla's determination, faith, and unconditional love--and contrary to the doctors' predictions--her adult twins are now able to function independently in many ways. They help their dad install pools, do carpentry work, and serve in the church as ushers, sound engineers, and children's ministry workers.

For parents seeking hope, answers, and peace, Karla leads the way to all three down a path she's already been.

In this book, leading international experts explore the emerging concept of the zero energy mass custom home (ZEMCH) – designed to meet the need for social, economic, and environmental sustainability – and provide all of the knowledge required for the delivery of zero energy mass customized housing and community developments in developed and developing countries. The coverage is wide ranging, progressing from explanation

of the meaning of sustainable development to discussion of challenges and trends in mass housing, the advantages and disadvantages of prefabricated methods of construction, and the concepts of mass customization, mass personalization, and inclusive design. A chapter on energy use will aid the reader in designing and retrofitting housing to reduce energy demand and/or improve energy end-use efficiency. Passive design strategies and active technologies (especially solar) are thoroughly reviewed. Application of the ZEMCH construction criteria to new buildings and refurbishment of old houses is explained and the methods and value of building performance simulation, analyzed. The concluding chapter presents examples of ZEMCH projects from around the world, with discussion of marketing strategy, design, quality assurance, and delivery challenges. The book will be invaluable as a training/teaching tool for both students and industry partners.
