An authoritative guide to the theory and practice of static and dynamic structures analysis Static and Dynamic Analysis of Engineering Structures examines static and dynamic analysis of engineering structures for methodological and practical purposes. In one volume, the authors – noted engineering experts – provide an overview of the topic and review the applications of modern as well as classic methods of calculation of various

structure mechanics problems. They clearly show the analytical and mechanical relationships between classical and modern methods of solving boundary value problems. The first chapter offers solutions to problems using traditional techniques followed by the introduction of the boundary element methods. The book discusses various discrete and continuous systems of analysis. In addition, it offers solutions for more complex systems, such as elastic waves in inhomogeneous media, frequency-dependent damping and membranes of arbitrary shape, among others. Static and Dynamic Analysis of Engineering Structures is filled with illustrative examples to aid in comprehension of the presented material. The book: Illustrates the modern methods of static and dynamic analysis of structures; Provides methods for solving boundary value problems of structural mechanics and soil mechanics; Offers a wide spectrum of applications of modern techniques and methods of calculation of static, dynamic and seismic problems of engineering design; Presents a new foundation model. Written for researchers, design engineers and specialists in the field of structural mechanics, Static and Dynamic Analysis of Engineering Structures provides a guide to analyzing static and dynamic structures, using traditional and advanced approaches with real-world, practical examples. "A parent's gripping journey of awareness, acceptance, and appreciation of her two boys dealing with significant challenges brought on by autism." --Stephen Mark Shore, EdD When Karla Akins hoped that her autistic sons could learn to read and function independently, doctors warned her that those expectations would never be met. She set out to prove that, despite those warnings, all things are possible through God. Laced with humor and compassion, A Pair of Miracles is the heartwarming story of her journey rearing adopted twin sons, each diagnosed with autism and fetal alcohol disorder. This is more than a moving biography from a mom on the front lines, however. It is a powerful tool, full of practical help for parents, educators, and church members working with children who have intellectual disabilities, speech impairments, and other limitations on the autism spectrum. It is also a challenge to the church to welcome and celebrate all the members of their congregation, no matter their abilities. Thanks to Karla's determination, faith, and unconditional love--and contrary to the doctors' predictions--her adult twins are now able to function independently in many ways. They help their dad install pools, do carpentry work, and serve in the church as ushers, sound engineers, and children's ministry workers. For parents seeking hope, answers, and peace, Karla leads the way to all three down a path she's already been. Tourism Management Albany [N.Y.] : Munsell When Abby Halladay's fiancé dumps her, her newspaper column gets canceled, and a case of

terminal termites sends her packing for her parents' house, her perfect life becomes the perfect disaster. She vows to do whatever it takes to salvage the life she's worked so hard to achieve, but then a funny thing happens. The messy, imperfect life she never wanted starts to feel exactly like the life she needs, and Abby must choose between the life she's planned and the life she's found. Poignant and heartfelt, *Changing Lanes* celebrates the unexpected joys of everyday life—and the enduring promise of second chances.

Follow the ultimate coffee geeks on their worldwide hunt for the best beans. Can a cup of coffee reveal the face of God? Can it become the holy grail of modern-day knights errant who brave hardship and peril in a relentless quest for perfection? Can it change the world? These questions are not rhetorical. When highly prized coffee beans sell at auction for \$50, \$100, or \$150 a pound wholesale (and potentially twice that at retail), anything can happen. In *God in a Cup*, journalist and late-blooming adventurer Michael Weissman treks into an exotic and paradoxical realm of specialty coffee where the successful traveler must be part passionate coffee connoisseur, part ambitious entrepreneur, part activist, and part Indiana Jones. Her guides on the journey are the nation's most heralded coffee

business hotshots: Counter Culture's Peter Giuliano, *Intelligentsia*'s Geoff Watts, and *Stumptown*'s Duane Sorenson. With their obsessive standards and fiercely competitive baristas, these roasters are creating a new culture of coffee connoisseurship in America—a culture in which \$10 lattes are both a purist's pleasure and a way to improve the lives of third-world farmers. If you love a good cup of coffee—or a great adventure story—you'll love this unprecedented up-close look at the people and passions behind today's best beans. “Weissman illustrates how the origin, flavor compounds and socioeconomic impact of a cup of coffee are relevant now more than ever. . . . Tagging along behind the main characters in today's specialty coffee scene, [she] travels from the exotic to the expected to artfully deconstruct the connoisseur's cup of coffee.”

A history of the Korean War with soldier's-eye views from both sides, by the Pulitzer Prize – winning author of *The Rising Sun and Infamy*. Pulitzer Prize – winning author John Toland reports on the Korean War in a

revolutionary way in this thoroughly researched and riveting book. Toland pored over military archives and was the first person to gain access to previously undisclosed Chinese records, which allowed him to investigate Chairman Mao ' s direct involvement in the conflict. Toland supplements his captivating history with in-depth interviews with more than two hundred American soldiers, as well as North Korean, South Korean, and Chinese combatants, plus dozens of poignant photographs, bringing those who fought to vivid life and honoring the memory of those lost. In *Mortal Combat* is comprehensive in its discussion of events deemed controversial, such as American brutality against Korean civilians and allegations of American use of biological warfare. Toland tells the dramatic account of the Korean War from start to finish, from the appalling experience of its POWs to Mao ' s prediction of MacArthur ' s Inchon invasion. Toland ' s account of the " forgotten war " is a must-read for any history aficionado.

Seventy-five percent of processed foods on supermarket shelves—from soda to soup, crackers to condiments—contain genetically engineered ingredients. The long-term effects of these foods on human health and ecology are still unknown, and public concern has been steadily intensifying. This new book from the Council for Responsible Genetics gathers the best, most thought-provoking essays by the leading scientists, science writers, and public health advocates. Collectively, they address such questions as: Are GM foods safe and healthy for us? Will GM food really solve world hunger? Who really controls the power structure of food production? Are GM foods ecologically safe and sustainable? Why is it so difficult to get GM foods labeled in the US? What kinds of regulations and policies should be instituted? How is seed biodiversity, of lack thereof, affecting developing countries? Should animals be genetically modified for food? How are other countries handling GM crops? Ultimately, this definitive book encourages us to think about the social, environmental, and moral ramifications of where this particular branch of biotechnology is taking us, and what we should do about it.

This introductory text provides readers with a robust understanding of tourism and its industries, including how destinations are developed, marketed and managed, and how tourism impacts communities, environments and economies. The authors discuss the critical issues affecting 21st century tourism, such as sustainability, the climate crisis, globalisation, community, technology, the environment and the sharing economy. The text has been fully updated in light of the Covid-19 pandemic and its notable, and in some cases lasting, impacts on the tourism industry. The text features new mini-case studies (snapshots) and international case studies from countries around the globe including USA, Saudi Arabia, India, China, New Zealand, Australia, Namibia and the UK. It discusses the latest trends in transport, hospitality, attractions and the travel trade and

includes examples from major tourism companies including Trip.com, TUI and Airbnb. The book is suitable for students who are starting their tourism studies as part of their college or university education. Clare Inkson is a Senior Lecturer in Tourism and Course Leader of BA Tourism with Business at the University of Westminster, London. Lynn Minnaert is the Academic Director and Clinical Associate Professor at New York University's Jonathan M. Tisch Center for Hospitality and Tourism.

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just

two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

As we make our way into the twenty-first century, many Christians are looking for an expression of discipleship that speaks meaningfully to our time, a faith yearning that is at once personally intimate and relevant and that grows out of and nurtures authentic Christian community. The Pilgrim's Compass shepherds readers through a metaphorical pilgrimage to consider one's life a journey for faith formation. Using this book as a guide to help Christians consider their journey as they walk through the four stages of intentional faithfulness, disciples will encounter God, wrestle with God, be wounded as will God, and be reborn as a new person with a new name. The Pilgrim's Compass encourages individuals to embrace the ancient practice of

pilgrimage both as metaphor for the daily walk of discipleship and as an intentional journey of faith, which uses prayerful travel to assist an inner transformation.
