*The Manual of Aeronautics* Penguin  
Follow the ultimate coffee geeks on their worldwide hunt for the best beans. Can a cup of coffee reveal the face of God? Can it become the holy grail of modern-day knights errant who brave hardship and peril in a relentless quest for perfection? Can it change the world? These questions are not rhetorical. When highly prized coffee beans sell at auction for \$50, \$100, or \$150 a pound

wholesale (and potentially twice that at retail), anything can happen. In God in a Cup, journalist and late-blooming adventurer Michaela Weissman treks into an exotic and paradoxical realm of specialty coffee where the successful traveler must be part passionate coffee connoisseur, part ambitious entrepreneur, part activist, and part Indiana Jones. Her guides on the journey are the nation's most heralded coffee business hotshots: Counter Culture's Peter Giuliano, Intelligentsia's Geoff Watts, and Stumptown's Duane Sorenson. With their obsessive standards

and fiercely competitive baristas, these roasters are creating a new culture of coffee connoisseurship in America—a culture in which \$10 lattes are both a purist’s pleasure and a way to improve the lives of third-world farmers. If you love a good cup of coffee—or a great adventure story—you’ll love this unprecedented up-close look at the people and passions behind today’s best beans. “Weissman illustrates how the origin, flavor compounds and socioeconomic impact of a cup of coffee are relevant now more than ever. . . . Tagging along behind the main characters in today’s specialty coffee scene, [she] travels from the exotic to the expected to artfully deconstruct the connoisseur’s cup of coffee.” —Publishers Weekly

"Absolutely riveting . . . Essential reading for foodies, java-junkies, anthropologists, and anyone else interested in funny, sardonically told adventure stories." —Anthony Bourdain, author of *Kitchen Confidential* Full of humor and historical insights, *The Devil ’ s Cup* is not only a history of coffee, but a travelogue of a risk-taking

brew-seeker. In this captivating book, Stewart Lee Allen treks three-quarters of the way around the world on a caffeinated quest to answer these profound questions: Did the advent of coffee give birth to an enlightened western civilization? Is coffee the substance that drives history? From the cliffhanging villages of Southern Yemen, where coffee beans were first cultivated eight hundred years ago, to a cavernous coffeehouse in Calcutta, the drinking spot for two of India ’ s Nobel Prize winners . . . from Parisian salons and caf é s where the French Revolution was born, to the roadside diners and chain restaurants of the good ol ’ USA, where something resembling brown water passes for coffee, Allen wittily proves that the world was wired long before the Internet. And those who deny the power of coffee (namely tea drinkers) do so at their own peril.

(Amazon customer) For everyone who wants to understand more about coffee and its wonderful nuances and possibilities, this is the book to have. Coffee has never been better, or more interesting, than it is today. Coffee producers have access to more varieties and techniques than ever before and we, as consumers, can share in that expertise to make sure the coffee we drink is the best we can find. Where coffee comes from, how it was harvested, the roasting process and the water used to make the brew are just a few of the factors that influence the taste of what we drink. Champion barista and coffee expert James Hoffmann examines these key factors, looking at varieties of coffee, the influence of terroir, how it is harvested and processed, the roasting methods used, through to the way in which the beans are brewed. Country by country - from Bolivia to Zambia - he then identifies key characteristics and the methods that determine the quality of that country's output. Along the way we learn about everything from the development of the espresso machine, to why strength guides on supermarket coffee are really not good news. This is the first book to chart the coffee production of over

How to Innovate and Execute  
Leaders already know that innovation calls for a different set

of activities, skills, methods, metrics, mind-sets, and leadership approaches. And it is well understood that creating a new business and optimizing an already existing one are two fundamentally different management challenges. The real problem for leaders is doing both, simultaneously. How do you meet the performance requirements of the existing business—one that is still thriving—while dramatically reinventing it? How do you envision a change in your current business model before a crisis forces you to abandon it? Innovation guru Vijay Govindarajan expands the leader's innovation tool kit with a simple and proven method for allocating the organization's energy, time, and resources—in balanced measure—across what he calls “the three boxes”:

- Box 1: The present—Manage the core business at peak profitability
- Box 2: The past—Abandon ideas, practices, and attitudes that could inhibit innovation
- Box 3: The future—Convert breakthrough ideas into new products and businesses

The three-box framework makes leading innovation easier because it gives leaders a simple vocabulary and set of tools for managing and measuring these different sets of behaviors and activities across all levels of the organization. Supported with rich company examples—GE, Mahindra & Mahindra, Hasbro, IBM, United Rentals, and Tata Consultancy Services—and testimonies of leaders who have successfully used this framework, this book solves once and for all the practical dilemma of how to align an organization on the critical but

competing demands of innovation.
