Catalog of Copyright Entries. Third Series 1958: January-June

Commerce Business Daily McGraw Hill Professional

This manual, published by the Illinois Association of School Boards, was designed to be used as a teaching tool and reference source for overseeing effective school maintenance. Section 1 describes the basics of good school maintenance, including managing the program, using computers, controlling energy costs, ensuring safe practices, designing buildings for efficient maintenance, and being informed about environmental issues. Section 2 details guidelines for operating cleaning and general building services, such as custodial operations, area cleaning programs, and equipment and supplies. A custodian's glossary is included. The third section provides guidelines for building maintenance, specifically, caring for the exterior and roof. Procedures for maintaining school grounds are detailed in the fourth

section. The fifth section describes the maintenance of mechanical equipment, including heating and air conditioning systems, sanitary systems and fixtures, sewage treatment plants, and electrical systems. A management tools appendix contains a list of environmental resources; sections on cleaning and general building services, grounds maintenance, and mechanical equipment; and annual inspection checklists. (LMI)

Coal-heat
Vols. for 1933-42 include an annual directory number; for 1959- an annual roster of realtors. 1958: January-June

The ASME (American Society of Mechanical Engineers) Boiler codes are known throughout the world for their emphasis on safety and reliability. Written by an expert with practical experience in boiler inspection and maintenance, this book offers a clear, straightforward interpretation of the codes. Contents: Types of Classification of Power Boilers * Design Criteria, Formulas, Calculations * Construction Materials and Methods * Safety Valves * Stamping of Code Symbols and Nameplates * Data Reports * Methods for Repair and Alteration

Power and the Engineer

"The professional architectural monthly" (varies).

Books and Pamphlets, Including Serials and Contributions to Periodicals
This book is the result of a long-term co-operative research and professional development programme between the Instituto de Investigaciones Electricas (IIE), Mexico, and the University of Salford, UK. It provides the design basis for the fabrication of small and large scale commercial absorption heat pump systems, and includes a comprehensive treatment of the economics of heat pump systems. It charts the development of heat pump technology from theoretical principles to the operation of practical systems for the purification of water, both for human consumption and a wide variety of industrial purposes. In addition to the increasing demand for potable water there is a rapidly increasing demand for clean water in industries ranging from foodstuffs and pharmaceuticals to electronics. This book will be essential reading for industrial engineers and others concerned with the cost-effective, environmentally friendly production of clean water.
