A Gentleman Vagabond and Some Others Metropolitan Books Nonnative Oysters in the Chesapeake Bay discusses the proposed plan to offset the dramatic decline in the bay's native oysters by introducing disease-resistant reproductive Suminoe oysters from Asia. It suggests this move should be delayed until more is known about the environmental risks, even though carefully regulated cultivation of sterile Asian oysters in contained areas

This book is a series of original strategies that teacher educators, teacher candidates and practicing teachers can use to think critically about issues of equity, diversity, opportunity, and social justice in urban education.

As the demographic of

students in America is quickly becoming a “majority minority” we need teachers more than ever who can teach to diverse student populations, can utilize culturally relevant pedagogy, and have critically reflected on their own biases and stereotypes. We also need to empower teachers who are committed to social justice to navigate through school systems that are rife with structural inequities. This book will help ensure that teacher candidates are getting this preparation and

able to continue to reflect on these issues in their practice. The book is designed as a “textbook” or more accurately “workbook” with original strategies and critical reflection and discussion questions included in each chapter. The strategies can be done sequentially or in any order. In addition, they will be able to read counternarratives from their peers, which should encourage them to persist in the profession even when things get rough
