Geoffrey Stone's *Perilous Times* incisively investigates how the First Amendment and other civil liberties have been compromised in America during wartime. Stone delineates the consistent suppression of free speech in six historical periods from the Sedition Act of 1798 to the Vietnam War, and ends with a coda that examines the state of civil liberties in the Bush era. Full of fresh legal and historical insight, *Perilous Times* magisterially presents a dramatic cast of characters who influenced the course of history over a two-hundred-year period: from the presidents—Adams, Lincoln, Wilson, Roosevelt, and Nixon—to the Supreme Court justices—Taney, Holmes, Brandeis, Black, and Warren—to the resisters—Clement Vallandigham, Emma Goldman, Fred Korematsu, and David Dellinger. Filled with dozens of rare photographs, posters, and historical illustrations, *Perilous Times* is resonant in its call for a new approach in our response to grave crises.

This book deals with supply-side economics and the needed reorientation it would bring to West German policy. The change, recommended after searching analysis, would add up to an overall strategy for freeing markets, for removing government-imposed distortions, and for using free-market approaches to correct distortions imposed by pressure groups. The strategy would pierce Germany's state-supported encrustations and corporatism. It would equip the country to follow the lead of the United States and Great Britain in starting to escape from the tangle in which taxes, regulations, and unemployment have grown in step. The impending completion of the European internal market in 1992 adds urgency to this task.

Sea otters once ruled the Pacific Ocean, but

the fur trade of the eighteenth and nineteenth centuries brought this predator to near extinction. Today they're slowly coming back from the brink, and scientists are learning more about their pivotal role as one of nature's keystone species. This book looks at the history, biology, behavior and uncertain future of sea otters. Author and photojournalist Isabelle Groc takes us into the field: watching sea otter rafts off the British Columbia coast from a kayak, exploring what makes their fur coats so special, understanding how their voracious appetites are helping kelp forests thrive and, ultimately, learning how sea otters are leaving their mark (or paws) on every part of the ecosystem. They might be one of the most adorable creatures in the ocean, but kids will discover how their survival is key to a rich, complex and connected ecosystem.

What happens to members of the United States Armed Forces after they die? Why do soldiers endanger their lives to recover the remains of their comrades? Why does the military spend enormous resources and risk further fatalities to recover the bodies of the fallen, even decades after the cessation of hostilities? *Soldier Dead* is the first book to fully address the complicated physical, social, religious, economic, and political issues concerning the remains of men and women who die while serving their country. Michael Sledge traces the changes in the handling of our Soldier Dead over time and their reflection of advances in technology and the shifting attitudes of the public, government, and military. He also considers the emotional stress experienced by those who handle the dead; the continuing efforts to retrieve bodies from Korea and elsewhere; and how unresolved issues regarding the treatment of enemy dead continue to affect U.S. foreign relations.

*The Making of a Market* Cambridge University Press

During the nineteenth century, Yucatán moved effectively from its colonial past into modernity, transforming from a cattle-ranching and subsistence-farming economy to a booming export-oriented agricultural economy. Yucatán and its economy grew in response to increasing demand from the United States for henequen, the local cordage fiber. This henequen boom has often been seen as another regional and historical example of overdependence on foreign markets and extortionary local elites. In *The Making of a Market*, Juliette Levy argues instead that local social and economic dynamics are the root of the region's development. She shows how credit markets contributed to the boom before banks (and bank crises) existed and how people borrowed before the creation of institutions designed specifically to lend. As the intermediaries in this lending process, notaries became unwitting catalysts of Yucatán's capitalist transformation. By focusing attention on the notaries' role in structuring the mortgage market rather than on formal institutions such as banks, this study challenges the easy compartmentalization of local and global relationships and of economic and social relationships.

Journal of the House of Representatives of the United States

A vivid account of America at the pivot point of the postwar era, Harry Truman's first full year in office. In 1946, America had just exited the biggest war in modern history and was about to enter another of a kind no one had fought before. We think of this moment as the brilliant start of America Triumphant, in world politics and economics. But the reality is murkier: 1946 brought tension between industry and labor, political disunity, bad veteran morale,

housing crises, inflation, a Soviet menace—all shadowed by an indecisiveness that would plague decision makers who would waffle between engagement and isolation, as the country itself pivoted between prosperity and retrenchment, through the rest of the century. The Year of Indecision, 1946 overturns the image of Truman as a can-do leader—1946, in fact, marked a nadir in his troubled presidency. Relations broke down with the Soviet Union, and nearly did with the British. The United States suffered shortages and strikes of a magnitude it had not seen in years. In November 1946, the Democrats lost both houses of Congress. The tension between fear and optimism expressed itself too in popular culture. Americans rejoiced in talent and creative energy, but a shift was brewing: Bing Crosby making room for Bill Haley and B.B. King; John Wayne for Montgomery Clift. That year also saw a burst of spirit in literature, music, art and film—beneath the shadow of noir. The issues and tensions we face today echo those of seven decades ago. As we observe in this portrait of the era just before our own, as America learned, piecemeal and reluctantly, to act like a world power, it tried, and succeeded only partially, to master fear. Indecision, Weisbrode argues, is the leitmotif of American history.

The second edition of *Beyond the Wild Blue*, an update of the popular history originally released in 1997, is a fascinating look at sixty turbulent years of Air Force history. From the prop-driven armada of World War II to the most advanced Stealth weaponry, from pioneers like General Henry "Hap" Arnold to glorious conquests in the Gulf War, *Beyond the Wild Blue* is a high-flying study of the triumphs (and failures) of leadership and technology. In three new chapters, Walter Boyne covers an eventful ten years, including 9/11, the invasion of Afghanistan, and the second Gulf War, describing in detail the technological advancements that led to highly efficient airstrikes in Iraq. He also takes stock of the Air Force's doctrine and mission statements as this unique sector of the military grapples with an ever-changing world.

Over the course of American history, the United States of America, and its sister republics in Ibero-America, have had their sovereignties and development constantly threatened and often undermined by imperial machinations: assassinations, drug running, cultural warfare, rigged scandals, senseless military engagements, coups, currency runs, etc. Every thinking patriot of whatever

nation has long sought the overthrow of the British Empire in order to secure a sovereign, peaceful and prosperous future for his or her nation. Lyndon LaRouche has long identified the combination of the United States, Russia, China and India as the minimum array of power necessary to finally shut down the Anglo-Dutch Imperial System. Today, in 2018, the British Empire has been forced out into the open. It is no longer a secret known only to historians, diplomats, and intelligence agencies, that the hand of the British Empire has been directly intervening into, and often decisively, America's (as well as nearly every other nation's) political affairs for decades if not centuries. The possibility of the Four Powers finally coming together to overthrow the Empire, establish Mr. LaRouche's New Bretton Woods fixed exchange rate credit system, and create what Mrs. Helga Zepp-LaRouche and the Schiller Institute call The New Paradigm of relations among nations based upon cooperative development of science, technology and infrastructure—from Earth into the galaxy—has thrown the Empire into self-exposure and self-destructive, fearful, aggressive fits. This book, by bringing the power of Truth to bear upon the Empire, and making easily accessible Mr. LaRouche's clarity about the actions required of the Four Powers, will accelerate the final demise of the Empire and its replacement by a beautiful future for all (including the currently hysterical tentacles of Empire). In addition to Mr. LaRouche's outlines of the actions required of the Four Powers, a series of appendices are included to facilitate better mutual understanding among the people and leaders of the Four Powers. The better the peoples of the Four Powers understand each other, the better they will be able to work together to take the measures immediately necessary, and in the long run jointly work on the great project of developing civilization as a whole.
