Beyond Grammar: Language, Power, and the Classroom asks readers to think about the power of words, the power of language attitudes, and the power of language policies as they play out in communities, in educational institutions, and in their own lives as individuals, teachers, and

participants in the larger community. Each chapter provides extended discussion of a set of critical language issues that directly affect students in classrooms: the political nature of language, the power of words, hate language and bullying, gender and language, dialects, and language policies. Written for pre-service and practicing teachers, this text addresses how teachers can alert students to the realities of language and power--removing language study from a "neutral" corner to situate it

within the context of political, social, and cultural issues. Developing a critical pedagogy about language instruction can help educators understand that classrooms can either maintain existing inequity or address and diminish inequity through critical language study. A common framework structures the chapters of the text: * Each chapter begins with an overview of the language issue in question, and includes references for further research and for classroom use, and provides applications for classroom teachers. * Numerous references to the popular press and the breadth of language issues found therein foreground current thought on socio-cultural language issues, attitudes, standards, and policies found in the culture(s) at large. * References to current and recent events illustrate the language issue's importance, cartoons address the issue, and brief "For Thought" activities illustrate the point being discussed and extend the reader's knowledge and awareness. * "Personal

Explorations" ask readers to go beyond the text to develop further understanding; "Teaching Explorations" ask teachers to apply chapter content to teaching situations. Beyond Grammar: Language, Power, and the Classroom is intended for undergraduate and master's level courses that address literacy education, linguistics, and issues of language and culture.

Management practices and processes frequently differ across national and regional boundaries. What may be acceptable managerial behaviour in one culture may be counterproductive or even unacceptable in another. As managers increasingly find themselves working across cultures, the need to understand these differences has become increasingly important. This book examines why these differences exist and how global managers can develop strategies and tactics to deal with them. The text draws on recent research in anthropology, psychology, and management, to

explain the cultural and psychological underpinnings that shape managerial attitudes and behaviours, whilst introducing a learning model to guide in the intellectual and practical development of managers seeking enhanced global expertise. It offers user-friendly conceptual models to guide understanding and exploration of topics and summarizes and integrates the lessons learned in each chapter in applications-oriented 'Manager's Notebooks'. A companion website featuring comprehensive chapter-by-chapter PPT slides is available at www.cambridge.org/management_across_cultures.

Old School Photography is a must-have modern manual for learning how to create great photographs with a 35mm film camera. Famed YouTube personality Kai Wong expertly and humorously shares 100 essential tips for selecting and using film cameras, shooting with film and various lenses, and employing specific techniques to ensure you can get great results quickly. Known for his

breadth of knowledge and quick wit, Kai Wong delivers an informative and entertaining read on how to take great film photos. • An informative and entertaining read on how to take great film photos • A must-have guide for those new to old-school film techniques • A much-needed book for the current resurgence of vintage 35mm film cameras Renewed interest in film photography has surged in the past few years, both among those rediscovering their past passion and those discovering it for the first time. Vintage cameras that had previously lost their value are now often worth more than they first sold for due to high demand amongst enthusiasts, students, and collectors. Film manufacturers have even started reissuing long discontinued stocks—for example, Kodak's much-loved and recently re-released classic Ektachrome slide film. In our modern world, billions of people have access to instantaneous photography on their mobile phones, but as a result there has been a resurgent desire for a more

tactile, physical, unaltered, and thus honest medium. Much of which, ironically, ends up on the internet, with photography fans and influencers sharing their images across Instagram, Flickr, YouTube, and the like. More so than with digital photography, film photography requires a sense of craft, skill, patience, technical knowledge, and a trial-and-error process that results in a greater sense of accomplishment. Old School Photography is both enlightening and humorous, and attracts a new generation of fans who are eager to experiment with film cameras, make prints, and post their film photographs online.

New Trends in Audiovisual

Translation is an innovative and interdisciplinary collection of articles written by leading experts in the emerging field of audiovisual translation (AVT). In a highly accessible and engaging way, it introduces readers to some of the main linguistic and cultural challenges that translators encounter when translating films and other audiovisual productions. The chapters in this volume examine translation practices and experiences in various countries, highlighting how AVT plays a crucial role in shaping debates about languages and cultures in a world increasingly dependent on audiovisual media. Through analysing materials which have been dubbed and subtitled like Bridget

Jones's Diary, Forrest Gump, The Simpsons or South Park, the authors raise awareness of current issues in the study of AVT and offer new insights on this complex and vibrant area of the translation discipline.

The second edition of this popular textbook explores the latest approaches to cross-cultural management, as well as presenting strategies and tactics for managing international assignments and global teams. With a clear emphasis on learning and development, the text encourages students to acquire skills in multicultural competence that will be highly valued by their future employers. This has never been as important as now, in a world where, increasingly, all managers are global managers and where management practices and processes can differ significantly across national and regional boundaries. This new edition has been updated after extensive market feedback to include new features: a new chapter on working and living abroad; applications boxes showing how theories and key concepts can be applied to solve real-life management problems; student questions to encourage critical thinking; and updated examples and references. Supplementary teaching and learning materials are available on a companion website at www.cambridge.org/steers. In addition, recommended in-depth cases for each chapter are

Extracting maximum torque and horsepower from engines is an art as well as a science.

David Vizard is an engineer and more aptly an engine building artist who guides the reader through all the aspects of power production and high-performance engine building. His proven high-

performance engine building methods and techniques are revealed in this all-new edition of *How to Build Horsepower*. Vizard goes into extreme depth and detail for drawing maximum performance from any automotive engine. The production of power is covered from the most logical point from the air entering the engine all the way to spent gasses leaving through the exhaust. Explained is how to optimize all the components in between, such as selecting heads for maximum flow or port heads for superior power

output, ideal valvetrain components, realizing the ideal rocker arm ratios for a particular application, secrets for selecting the best cam, and giving unique insight into all facets of cam performance. In addition, he covers how to select and setup superchargers, nitrous oxide, ignition and other vital aspects of high-performance engine building.

National Automotive Sampling System, Crashworthiness Data System Heyday Books

This is a deliberately provocative book. It critiques current student behaviour management practices,

seeks to explain the flawed assumptions that justify those practices, and proposes how things could be better for children in our schools if different practices were adopted. It is one of the few books to offer alternative ways of addressing the issues associated with student behaviour at school, and exposes the field to serious and sustained critique from both a research perspective and a children's rights ideological stance. The authors address the following questions: What ideas dominate current thinking on student behaviour at school? What are the policy drivers for current practices? What is wrong with common behaviour approaches? What key ideologies justify these

approaches? How can we present ethical alternatives to current approaches? How can a human rights perspective contribute to the development of alternative approaches? In exploring these questions and some ethical alternatives to the status quo, the authors suggest practical ways to 'answer back' to calls for more authoritarian responses to student behaviour within our schools. In doing so, the authors advocate for reforms on behalf of children, and in their interests.
