and III Bentley Publishers Made into a powerful, award-winning film in 1970, this important Kannada novel of the sixties has received widespread acclaim from both critics and general readers since its first publication in 1965. As a

religious novel about a decaying brahmin colony in the south Indian village of Karnataka, Samskara serves as an allegory rich in realistic detail, a contemporary reworking of ancient Hindu themes and myths, and a serious, poetic study of a religious man living in a community of priests gone to seed. A death which stands as the central event in the plot brings in its wake a plague, many more deaths, live questions with only dead answers, moral chaos, and the rebirth of one man. The volume provides a useful glossary of Hindu myths, customs, Indian names, flora, and other terms. Notes and an afterword enhance the self-contained, faithful, and yet readable translation.

This WHO Global report on psoriasis brings the public health impact of psoriasis into focus. The report is written to help raise awareness of the range of ways that psoriasis can affect peoples' lives. It intends to empower policy-makers with practical

solutions to improve the health care and social inclusion of people living with psoriasis in their populations. The report highlights that much of the suffering caused by this common and complex disease can be avoided.

Improving access to early diagnosis and appropriate treatment for psoriasis requires universally accessible health-care systems that provide people-centered care for patients with complex, lifelong conditions.

Governments also have a key role to play in seeking to address the unnecessary social consequences of psoriasis by the challenging the myths and behaviors that lead to the exclusion of patients from healthcare settings and daily life.

Diagnostics, or fault finding, is a fundamental part of an automotive technician's work, and as automotive systems become increasingly complex there is a greater need for good diagnostic skills. Advanced Automotive Fault Diagnosis is the only book to treat automotive diagnostics as a science rather than a check-list procedure. Each chapter includes basic principles and examples of a vehicle system followed by the appropriate diagnostic techniques, complete with useful diagrams, flow

charts, case studies and self-assessment questions. The book will help new students develop diagnostic skills and help experienced technicians improve even further. This new edition is fully updated to the latest technological developments. Two new chapters have been added – On-board diagnostics and Oscilloscope diagnostics – and the coverage has been matched to the latest curricula of motor vehicle qualifications, including: IMI and C&G Technical Certificates and NVQs; Level 4 diagnostic units; BTEC National and Higher National qualifications from Edexcel; International Motor Vehicle qualifications such as C&G 3905; and ASE certification in the USA.

Recently vilified as the prime dynamic driving home the breach between poor and rich nations, here the branding process is rehabilitated as a potential saviour

of the economically underprivileged. Brand New Justice, now in a revised paperback edition, systematically analyses the success stories of the Top Thirteen nations, demonstrating that their wealth is based on the 'last mile' of the commercial process: buying raw materials and manufacturing cheaply in third world countries, these countries realise their lucrative profits by adding value through finishing, packaging and marketing and then selling the branded product on to the end-user at a hugely inflated price. The use of sophisticated global media techniques alongside a range of creative marketing activities are the lynchpins of this process. Applying his observations on economic history and the development and impact of global marketing, Anholt presents a cogent plan for developing nations to benefit from globalization. So long the helpless victim of capitalist trading systems, he shows that they can cross the divide and graduate from supplier nation to producer nation. Branding native produce on a global scale, making a commercial virtue out of perceived authenticity

and otherness and fully capitalising on the 'last mile' benefits are key to this graduation and fundamental to forging a new global economic balance. Anholt argues with a forceful logic, but also backs his hypothesis with enticing glimpses of this process actually beginning to take place. Examining activities in India, Thailand, Russia and Africa among others, he shows the risks, challenges and pressures inherent in 'turning the tide', but above all he demonstrates the very real possibility of enlightened capitalism working as a force for good in global terms.
