If you paid even a moment's attention during high-school history class, you probably know that 1910 brought about the Union of South Africa, that the 1948 general election ushered in apartheid, and that the Rainbow Nation was born when Madiba triumphed in the country's first democratic elections in 1994. Spoilt Ballots dishes the dirt on these pivotal turning points in our history. But it also sheds light on a dozen lesser-known contests, starting with the assassination of King Shaka in 1828 and ending with the anointing of King Cyril at Nasrec in 2017. Spoilt Ballots dishes the dirt on these pivotal turning points in our history. But it also sheds light on a dozen lesser-known contests, starting with the assassination of King Shaka in 1828 and ending with the anointing of King Cyril at Nasrec in 2017. Spoilt Ballots is as much about the people who voted in some of our most decisive elections as it is about those who didn't even get the chance to make their mark. It explains why a black man in the Cape had more political rights in 1854 than at any other point in the ensuing 140 years and how the enfranchisement of women in 1930 was actually a step back for democracy. The book will leave you wondering if Oom Paul Kruger's seriously dicey win in the 1893 ZAR election might have paved the way for the Boer War and whether 'Slim Jannie' Smuts really was that slim after all. It'll explain how the Nats managed to get millions of English-speakers to vote for apartheid and why the Groot Krokodil's attempt to co-opt coloureds and Indians into the system backfired spectacularly. Entertaining and impeccably researched, Spoilt Ballots lifts the lid on 200 years of electoral dysfunction in our beloved and benighted nation.

Ben Brooksby is a fifth-generation farmer from St Helens Plains in western Victoria. When he was younger, he struggled with anxiety and other mental health issues, as do so many others in rural communities. A simple social media post helped him to turn things around. After he shared a photo on Instagram showing himself naked in a truck full of lentils, he received a huge response, with other farmers wanting to share their own photos - and their stories. As the Naked Farmer movement grew, Ben met people from all around the country who wanted to get naked for mental health. As they got their kits off, they also opened up about their struggles. This is a heartwarming, moving and candid collection of stories of the challenges our farmers are facing, and the way these communities are banding together in response. From the deepest seafloor to the highest mountain, from the hottest region to the cold Antarctic plateau, environments labeled as extreme are numerous on Earth and they present a wide variety of features and characteristics. The life processes occurring within these environments are equally diverse, not only depending on stress factors (e.g. temperature, pressure, pH and chemicals) but also on the type of life forms, ranging from microbes to higher species. How is life limited by and adapted to extreme external biotic and abiotic factors? This key question summarises the deliberations raised by this exciting and fascinating research area. Addressing the challenge of answering this question would help to reveal new insights and refine theories concerning the origin and evolution of life on our planet, as well as life beyond Earth. Investigating life processes under extreme conditions can also bring clues for understanding and predicting ecosystems' responses to global changes. Furthermore, this area of research has a wide application potential in the fields of (bio)technology, chemical industry, pharmaceuticals, biomedicine or cosmetics. Beware! Dangerous secrets lie between the pages of this book. OK, I warned you. But if you think I'll give anything away, or tell you that this is the sequel to my first literary endeavor, The Name of This Book is Secret, you're wrong. I'm not going to remind you of how we last left our heroes, Cass and Max-Ernest, as they awaited initiation into the mysterious Terces Society, or the ongoing fight against the evil Dr. L and Ms. Mauvais. I certainly won't be telling you about how the kids stumble upon the Museum of Magic, where they finally meet the amazing Pietro! Oh, blast! I've done it again. Well, at least I didn't tell you about the missing Sound Prism, the nefarious Lord Pharaoh, or the mysterious creature born in a bottle over 500 years ago, the key to the biggest secret of all. I really can't help myself, now can I? Let's face it - if you're reading this, it's too late.

Margaret Drabble is a writer who plays a lively role in both popular and literary culture. Widely read and studied throughout the world her novels attract both the general reader and the literary critic. Originally published in 1985, Joanne Creighton examines this phenomenon and places particular emphasis on her "Englishness", her role as a woman writing credibly about modern women and her ability to mediate between the traditional and the modern. She argues that the resonances of Drabble's work grow put of her strong sense of the powers and resources of existing literary traditions coupled with her intelligent portrayal of the familiar problems of people in modern society, and that is precisely this mediating position which makes Drabble an important voice in contemporary fiction and links her with other writers of her generation. Challenging those critics who see Drabble as a fiction traditionalist. Creighton finds her work open-ended, inquiring, equivocal and unquestionably contemporary in spirit.
