The Triumph 350cc and 500cc unit-construction twins were called the 'C' Series, and were made between 1957 and 1974. The range started with the 350cc 'Twenty-one' - a sedate touring bike with full enclosure in the form of the famous Triumph 'Bathtub' - went through such famous names as the Speed Twin, Tiger 100 and Trophy, and ended with the rip-roaring Daytona and the off-road Adventurer. This book deals with the whole range, giving the history of all the models, and also describes the restoration of a 1969 Trophy T100C.

A history of the Vilna ghetto, focusing on resistance and on the Judenrat, and revolving around three persons: Yitzhak Wittenberg, the leader of the United Partisan Organization (FPO) in Vilna; Yechiel (Ilya) Sheinbaum, who led the Second Fighting Organization; and Jacob Gens, the head of the ghetto and of the Jewish police. Criticizes the strategic plan for a "last minute uprising" which was adopted by the FPO instead of the more promising strategy of escape from the ghetto and joining the Soviet partisans. With the surrender of Wittenberg in July 1943, the FPO lost its only able and resolute commander. Contends that there was no "Vilna ghetto uprising", but only the defense of the house at Strashune 6 on 1 September 1943; it was defended by Sheinbaum's organization and by unaffiliated fighters, rather than by the FPO. Ideological and political rivalries between different factions of the ghetto resistance precluded the possibility of escape and survival of many able-bodied Jews. Depicts Gens as a

controversial figure, whose relations with the resistance were ambivalent; dismisses accusations that he was a Nazi collaborator or a leader drunk with power.

Attacking Manuals 1 & 2 comprise the first thorough examination of the nature of dynamics in chess, and the principles explained in this book are relevant to every chess game played. In lively no-nonsense language, Aagaard explains how the best players in the world attack. The rules of attack (the exploitation of a dynamic advantage) are explained in an accessible and entertaining style. This groundbreaking work is well balanced between easily understandable examples, exercises and deep analysis. Volume 2 covers what to do once the attack is up and running, and deals with weak kings, intuitive sacrifices, opposite castling, king hunts, and enduring initiative. Attacking Manuals 1 & 2 were chosen as the English Chess Federation's Book of the Year 2010.

As E-Commerce refers to the paperless exchange of business information using Electronic Data Interchange (EDI), electronic funds transfer and other network-based technologies, companies have to look at integrating their backend and front office processes and activities. This book presents the technology and non-technology aspects of e-commerce and takes it to a level that gives a clear understanding of the basic building blocks for its implementation. The book begins with the basics in the first and second part, and describes the Internet and Intranets. The third part describes EDI, the UN/EDIFACT Standards, Extranets and tracking tools. Part four comprises security - a critical component of e-commerce. Different cryptographic systems and Public Key Certification method based on X.509 standards have been covered. Part five delves into reengineering and management of change and legal issues.

Working Drawings Handbook focuses on the principles, styles, methodologies, and approaches involved in drawings. The book first takes a look at the structure of information, types of drawing, and draftsmanship. Discussions focus on dimensioning, drawing conventions, techniques, materials, drawing reproduction, location drawing, component and sub-component drawings, assembly drawing, schedule, pictorial views, and structure of working drawings. The manuscript then ponders on working drawing management and other methods. Topics include planning the set, drawing register, drawing office programming, and introducing new methods. Building elements and external features, conventions for doors and windows, symbols indicating materials, electrical, telecommunications, and fire symbols, and non-active lines and symbols are also discussed. The book is a fine reference for draftsmen and researchers interested in studying the elements of drawing.
