Urinary Stones Elsevier Learn to avoid and manage complications from non-vascular interventional and interventional oncological procedures The range of non-vascular procedures that can be performed in interventional imaging is vast and includes management of a wide range of conditions, such as treatment of kidney stones, obtaining diagnostic biopsies in

suspected cancers, bile duct occlusions, compression fractures, drainage of abscesses, collection of fluids, etc. In particular, various cancers often lend themselves well to local tumor destruction with interventional techniques, while holding morbidity and mortality to a minimum. This compendium presents 45 cases in detail to provide a thorough review of potential complications that may occur during non-vascular interventional radiology and interventional oncological procedures. Each case also includes a list of take-home messages discussing vital prevention strategies for each problem. Key Features: Content presented in case-based format to help the

reader benefit from the real-life experiences of the authors and motivate them to take part in identifying the problem and finding a solution to a specific situation Solid coverage of characteristic complications of special technologies, such as thermal ablation and percutaneous CT-guided interstitial high-dose brachytherapy A wealth of information and advice for optimizing patient safety before, during, and after interventional therapy Take-home messages at the end of each case providing vital prevention strategies Complications in Non-vascular Interventional Therapy and Interventional Oncology: Case-based Solutions is an invaluable sourcebook for radiology

residents and fellows, experienced interventional radiologists, and all physicians actively performing non-vascular and oncological interventions. This book discusses methods to both avoid and manage complications, thus having the potential to directly enhance patient care.

decrease in urine volume and/or in excess of urine formation. Dehydration is a major risk factor for kidney stones. Some of the causes of kidney stones include infection (the infection can be in the urine (hematuria), People with recurrent kidney conditions, such as gout, and those who take recurrently or unusually much are at risk for kidney stones. Diet and hereditary factors are also related to stone formation. Diagnosis of kidney stones is best made initially using an ultrasound, intravenous urography (IVP), or a CT scan. Most kidney stones will pass through the ureter to the bladder in their own time. Treatment usually involves hydration and, in some

cases, medication to help passage of urine. If needed, lithotripsy or surgery is used for when needed not through the ureter to the bladder on their own.

This title takes an interdisciplinary approach to the central role of solubility in pathological biomineralisation, ranging from traditional thermodynamics and kinetics to unusual concepts such as the PILP process. The scientific background and expertise of the contributors, ranges accordingly

from solubility modelling and database development, renal stone and bone implant research, Mössbauer spectroscopy and structural chemistry to biochemistry and crystallisation. The chapters all have a quantitative, physico-chemical component rather than giving purely phenomenological descriptions. The contributors deal with aspects and concepts that have not previously been common in the study of pathological biomineralisation processes.

Oxford Textbook of Urological Surgery Springer
Teaching all of the necessary concepts within the constraints of a one-term chemistry course can be challenging. Authors Denise Guinn and Rebecca Brewer have drawn on their 14 years of experience with the one-term course to write a textbook that incorporates biochemistry and organic chemistry throughout each chapter, emphasizes cases related to allied health, and provides students with the practical quantitative skills they will need in their professional lives. Essentials of General, Organic, and

Biochemistry captures student interest from day one, with a focus on attention-getting applications relevant to health care professionals and as much pertinent chemistry as is reasonably possible in a one term course. Students value their experience with chemistry, getting a true sense of just how relevant it is to their chosen profession. Then this book will walk you through how you may be unknowingly increasing your uric acid levels and the certain health risks associated with doing so. Using relatable anecdotes and research-backed strategies, this friendly guide will give you all the tools you need to lower your uric acid levels, including:

- Professional advice from health-care providers
- Recipes and recommended foods that are low in uric acid
- Simple strategies for

making daily lifestyle changes And more! The Uric Acid Handbook is the ultimate fact-filled guide to managing your hyperuricemia or simply improving your overall health.

Smith's Textbook of Endourology WestBow Press ABC's chief medical correspondent helps you ring in the New Year right with a resolution that's actually doable: a year-long plan to improve your emotional and physical health—from giving up alcohol to doing a digital detox, but each for only one month. Dr. Jennifer Ashton is at the top of her field as an ob-gyn and news correspondent. But even at the top there's still room to improve, and with *The Self-Care Solution*, she upends her life one month at a time, using her own experiences to help you improve your health and

enhance your life. Dr. Ashton becomes both researcher and subject as she focuses on twelve separate challenges. Beginning with a new area of focus each month, she guides you through the struggles she faces, the benefits she experiences, and the science behind why each month's challenge—giving up alcohol, doing more push-ups, adopting an earlier bedtime, limiting technology—can lead to better health. Month by month, Dr. Ashton tackles a different area of wellness with the hope that the lessons she learns and the improved health she experiences will motivate her (and you) to make each change permanent. Throughout, she offers easy-to-comprehend health information about the particular challenge to help you understand its benefits and to stick with it. Whether it's adding cardio or learning how to meditate, Dr. Ashton makes these daily lifestyle choices

and changes feel possible—and shows how beneficial a mindful lifestyle can be. Inspiring, practical, and informative, illustrated with helpful photos and charts, *The Self-Care Solution* teaches you how to recalibrate your life to enjoy a better, healthier year, one month at a time. Featuring guidance from top experts, entertaining case studies, easy-to-follow advice and tips, and Dr. Ashton’s observations and insights, this book can help you achieve a better life balance and a more active and healthy lifestyle.

Drug Design, Volume IV covers the pharmaceutical phase of drug action, with emphasis on those aspects that are of importance in the design of optimally effective drug products. The book discusses biopharmaceutics as a basis for the design of drug products; the types and pharmacokinetics of peroral prolonged action dosage forms and parenteral prolonged action forms; and the design of topical drug products. The text also describes physical-chemical parameters which

affect the bioavailability of topical drug products; the design of sunscreen preparations; as well as the clinical application of litholytic agents, which are preventive and curative drugs for nephrolithiasis. The design of biologically active nucleosides and of insecticidal chlorohydrocarbon derivatives is also encompassed. Chemists, biochemists, pharmacologists, and people involved in drug design will find the book invaluable.
