The simulation of enzymatic processes is a well-established field within computational chemistry, as demonstrated by the 2013 Nobel Prize in Chemistry. It has been attracting increasing attention in recent years due to the potential applications in the development of new drugs or new environmental-friendly catalysts. Featuring contributions from renowned authors, including Nobel Laureate Arie Warshel, this book explores the theories, methodologies and applications in simulations of enzyme reactions. It is the first book offering a comprehensive perspective of the field by examining several different methodological approaches and discussing their applicability and limitations. The book provides the basic knowledge for postgraduate students and researchers in chemistry, biochemistry and biophysics, who want a deeper understanding of complex biological process at the molecular level.

Mechanics of Composite Materials contains the proceedings of the Fifth Symposium on Naval Structural Mechanics held in Philadelphia, Pennsylvania, on May 8-10, 1967. The papers explore the mechanics of composite materials for naval applications. The structural requirements of a system and the fundamental mechanical properties of composite materials, as well as the behavior of such materials under various environmental conditions, are discussed. This book is comprised of 40 chapters and begins with an analysis of missile and aircraft systems constraints and operational requirements, along with ship systems constraints and operational requirements, for composite materials. The following chapters focus on structural uses of composites, particularly in naval ships, aircraft, re-entry vehicles, and space vehicle

structures; and the micromechanics, structural mechanics, and failure mechanics of composite materials. Problems in the design of joints and attachments are considered, along with the stability of pre-strained laminated media; environmental factors in the design of composite materials; and the effect of water on glass-reinforced plastics. This monograph will be a useful resource for scientists and engineers who are particularly concerned with the mechanics of composite materials.

Challenges in today's schools often transcend the public classroom. Administrators are frequently faced with situations that require responsive actions rather than preventative measures. If school districts are to become world class institutions, master planning is an absolute necessity. Typically, books about master planning follow a specialized narrative which ultimately leaves the reader wondering how to implement the parts as a whole. By taking an organized executable approach to master planning, The School District Master Planning Guide describes education leadership endeavors in terms of programs, projects, functions and processes, which combined form an integrated holistic model. This holistic model takes the form of expanded descriptions, hierarchical listings, logical reasoning, and limited narration. Administrators and planning center personnel at all skill levels may immediate utilize The School District Master Planning Guide as a reference planning tool to develop and implement coherent master plans. The guide has been designed as a general overview of school district administration regarding educational administration in four phases or areas: Phase I: Organizational Planning (Organizational Planning Criteria Overview, Board of Education, Superintendent of the School System) Phase II: Curriculum Operations (Curriculum Operations Overview, Pupil Personnel Services, Curriculum Design and Development, Curriculum Instructional Delivery) Phase III: Support Systems (Support Systems Overview, Facilities, Nutrition Services, Transportation Services, Warehouse Services) Phase IV: Analytics (Analytics Overview, Solution Analysis Framework Overview, Master Plan Employment with PD&E Involvement) Additional uses may include the personnel selection and evaluation process, development of higher education administrative core curriculum coursework for continuing education, and administrative training for prospective administrative candidates. Appendix I is directed toward administrative training with situational questions designed to stimulate leadership thought, argument and introspection.

The New York Times bestselling author of The Benedict Option draws on the wisdom of Christian survivors of Soviet persecution to warn American Christians of approaching dangers. For years, émigrés from the former Soviet bloc have been telling Rod Dreher they see telltale signs of "soft" totalitarianism cropping up in America--something more Brave New World than Nineteen Eighty-Four. Identity politics are beginning to encroach on every aspect of life. Civil liberties are increasingly seen as a threat to "safety". Progressives marginalize conservative, traditional Christians, and other dissenters. Technology and consumerism hasten the possibility of a corporate surveillance state. And the pandemic, having put millions out of work, leaves our country especially vulnerable to demagogic manipulation. In Live Not By Lies, Dreher amplifies the alarm sounded by the brave men and women who fought totalitarianism. He explains how the totalitarianism facing us today is based less on overt violence and more on psychological manipulation. He tells the stories of modern-day dissidents--clergy, laity, martyrs, and confessors from the Soviet Union and the captive nations of Europe--who offer practical advice for how to identify and resist totalitarianism in our time. Following the model offered by a prophetic World War II-era pastor who prepared believers in his Eastern European to endure the coming of communism, Live Not By Lies teaches American Christians a method for resistance: • SEE: Acknowledge the reality of the situation. • JUDGE: Assess reality in the light of what we as Christians know to be true. • ACT: Take action to protect truth. Aleksandr Solzhenitsyn famously said that one of the biggest mistakes people make is assuming totalitarianism can't happen in their country. Many American Christians are making that mistake today, sleepwalking through the erosion of our freedoms. Live Not By Lies will wake them and equip them for the long resistance.
