For four centuries, New England has been a cradle of crime and murder—from the Salem witch trials to the modern-day mafia. Nineteenth century New England was the hunting ground of five female serial killers: Jane Toppan, Lydia Sherman, Nellie Webb, Harriet E. Nason, and Sarah Jane Robinson. Female killers are often portrayed as caricatures: Black Widows, Angels of Death, or Femme Fatales. But the real stories of these women are much more complex. In *Pretty Evil New England*, true crime author Sue Coletta tells the story of these five women, from broken childhoods, to first brushes with death, and she examines the overwhelming urges that propelled these women to take the lives of a combined total of more than one-hundred innocent victims. The murders, investigations, trials, and ultimate verdicts will stun and surprise readers as they live vicariously through the killers and the would-be victims that lived to tell their stories.

**The Soviet-Afghan War** Verso Books  
Cities are the new battleground of our increasingly urban world. From the slums of the global South to the wealthy financial centers of the West, **Cities Under Siege** traces the spread of political violence through the sites, spaces, infrastructure and symbols of the world's rapidly expanding metropolitan areas. Drawing on a wealth of original research, Stephen Graham shows how Western militaries and security forces now perceive all urban terrain as a conflict zone inhabited by lurking shadow enemies. Urban inhabitants have become targets that need to be continually tracked, scanned and controlled. Graham examines the transformation of Western armies into high-tech urban counter-insurgency forces. He looks at the militarization and surveillance of international borders, the use of 'security' concerns to suppress

democratic dissent, and the enacting of legislation to suspend civilian law. In doing so, he reveals how the New Military Urbanism permeates the entire fabric of urban life, from subway and transport networks hardwired with high-tech 'command and control' systems to the insidious militarization of a popular culture corrupted by the all-pervasive discourse of 'terrorism.'

Since the beginning of time, the angelic hosts of the High Heavens and the demonic hordes of the Burning Hells have been locked in a struggle for the fate of all Creation. That struggle has now come to the mortal realm...and neither Man nor Demon nor Angel will be left unscathed.... Legend speaks of a long-dead city known as Ureh, thought by many to have been a gateway to the High Heavens. It is believed that every two thousand years, when the stars align and the

shadow of Mount Nymyr falls upon the ruins, Ureh is reborn -- and all its lost riches are revealed to those brave enough to seek them out. Now, after a lifetime of research and intense calculation, the Vizjerei sorcerer, Quov Tsin, has come to witness Ureh's rebirth for himself. But that which awaits Tsin and his hired band of mercenaries is nothing like what they expected. They will find that the dream of radiant Ureh is, in fact, a twisted nightmare of horror -- one that will draw them inexorably into The Kingdom of Shadow An original tale of swords, sorcery, and timeless struggle based on the bestselling, award-winning M-rated computer game from Blizzard Entertainment. Intended for mature readers.

An “intriguing, insightful” look at how algorithms and robots could lead to social unrest—and how to avoid it (The Economist, Books of the Year). After decades of effort, researchers are finally cracking the code on artificial intelligence. Society stands on the cusp of unprecedented change, driven by advances in robotics, machine learning, and perception powering systems that rival or exceed human capabilities. Driverless cars, robotic helpers, and intelligent agents that promote our interests have the potential to usher in a new age of affluence and leisure—but as AI expert and Silicon Valley entrepreneur Jerry Kaplan warns, the transition may be protracted and brutal unless we address the two great scourges of the modern developed world: volatile labor markets and income inequality. In *Humans Need Not Apply*, he proposes innovative, free-market adjustments to our economic system and social policies to avoid an extended period of social turmoil. His timely and accessible analysis of the promises and perils of AI is a must-read for business leaders and policy makers on both sides of the aisle. “A reminder that AI systems don’t need red laser eyes to be dangerous.”—Times Higher Education Supplement “Kaplan...sidesteps the usual arguments of techno-optimism and dystopia, preferring to go for pragmatic solutions to a shrinking pool of jobs.”—Financial Times

Over the past 30 years or so, research effort in behaviour and ecology has progressed from simple documentation of the habits or habitats of different species to asking more searching questions about the adaptiveness of the patterns of behaviour observed; moved from documenting simply what occurs, to trying to understand why. Increasingly, studies of behaviour or ecology explore the function of particular responses or patterns of behaviour in individuals or populations - looking for the adaptiveness that has led to the adoption of such patterns either at a proximate level (what environmental circumstances have favoured the adoption of some particular strategy or response from within the animal's repertoire at that specific time) or at an evolutionary level (speculating upon what pressures have led to the inclusion of a particular pattern of behaviour within the repertoire in the first place). Many common principles have been established - common to a wide diversity of animal groups, yet showing some precise relationship between a given aspect of behaviour or population dynamics and some particular ecological factor. In particular, tremendous advances have been made in understanding the foraging behaviour of animals - and the 'decision rules' by which they seek and select from the various resources on offer - and patterns of social organization and behaviour: the adaptiveness of different social structures, group sizes or reproductive tactics.
