The purpose of this study was to examine whether a teacher's modeling of the writing process for kindergarteners helps them to progress through the developmental stages of writing. This study analyzed the progress of a group of kindergarteners in North San Diego County, in a low socioeconomic area, predominantly populated by second language learners. The teacher modeled the writing process for students on a daily basis, explicitly verbalizing the process for students as she wrote on the board. Six students'

journal writings were then analyzed over an eleven week period, tracking the growth of student writing, with the teacher modeling the writing process daily. The teacher focused on 3 different writing conventions (capitalization/ punctuation, inventive spelling, and spacing between words) each for a 3 week period, and tracked students' use of those conventions using a 4 point rubric. The data collection demonstrated that the majority of students did progress in their writing, as was established by tracking the 6 students' growth along the 4 point rubric.

This remarkable book shows teachers how to inspire students to learn to write and write to learn.

Committed to the premise that all students can learn to write with appropriate teaching, modelling, and practice, it argues that reading and writing go hand in hand. Through reading, writing and the inevitable discussions that follow, students learn from the experiences of others, open their minds to many possibilities, gain a glimpse into new worlds, make connections to their lives, and reflect on their own choices and learning. This

practical book shows you how to use freewriting and powerful mentor texts to create classrooms where students enjoy putting pencil to paper and taking the necessary risks to grow and flourish as writers.

### The Writing Revolution

#### Capstone

Why you need a writing revolution in your classroom and how to lead it The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by

focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, The Writing Revolution can make a dramatic difference. And the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities The Writing Revolution is as much a method of teaching content as it is a method of

---

teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content.
