How we can evade, protest, and sabotage today's pervasive digital surveillance by deploying more data, not less—and why we should. With *Obfuscation*, Finn Brunton and Helen Nissenbaum mean to start a revolution. They are calling us not to the barricades but to our computers, offering us ways to fight today's pervasive digital surveillance—the collection of our data by governments, corporations, advertisers, and hackers. To the toolkit of privacy protecting techniques and projects, they propose adding obfuscation: the deliberate use of ambiguous, confusing, or misleading information to interfere with surveillance and data collection projects. Brunton and Nissenbaum provide tools and a rationale for evasion, noncompliance, refusal, even sabotage—especially for average users, those of us not in a position to opt out or exert control over data about ourselves. *Obfuscation* will teach users to push back, software developers to keep their user data safe, and policy makers to gather data without misusing it. Brunton and

Nissenbaum present a guide to the forms and formats that obfuscation has taken and explain how to craft its implementation to suit the goal and the adversary. They describe a series of historical and contemporary examples, including radar chaff deployed by World War II pilots, Twitter bots that hobbled the social media strategy of popular protest movements, and software that can camouflage users' search queries and stymie online advertising. They go on to consider obfuscation in more general terms, discussing why obfuscation is necessary, whether it is justified, how it works, and how it can be integrated with other privacy practices and technologies.

What is the point? What is the purpose of life? Why must I suffer the stress, and anxiety that comes with it? Why does it all seem so hard and so unfair? If you have asked yourself any of these questions, then you have found the book you are looking for. There are answers to all of these questions and Anderson Silver has compiled teachings from Stoicism and other schools of thought in *Your User's Manual*. Meant as a light read that the reader can come back to and meditate on periodically, Anderson has done a wonderful job of condensing fundamental teachings, making *Your User's Manual* a straightforward read in answering life's most pressing questions and recognizing what is truly important.

The 12 disciples who followed Jesus offer us wonderful lessons on what it means to be modern-day disciples of Jesus, but we also gain great insight into the cost of discipleship by looking at Jesus' mother, Mary, and Mary Magdalene. In this Bible study, we follow the 12 disciples and the two Marys through the Gospels so that we can make their way of discipleship our own way of discipleship. Genesis 1 11: God Makes a Start is an excellent Bible study resource for teens wanting a better understanding of how and why God created the world, and why the

earliest events of the Bible should matter to us today. The stories of Adam and Eve, of their sons Cain and Abel, of the people who provoked the flood and those who built the tower of Babel: all of these stories display our human tendency to overstep our limits as creatures, to take control of our lives apart from God, to treat one another unjustly. The Genesis accounts tell us that our unhappiness stems from our failure to trust and obey our creator. Against this background, Jesus life and death emerge as a deliberate reversal of the deep-rooted human tendency to distrust and disobey God.

Designed as a guided discovery, *Six Weeks with the Bible for Catholic Teens* introduces high school students to books of the Bible by integrating the biblical text with

insightful questions to help youth discern what Scripture means for their lives today. The series provides students with a clear explanation of Biblical text, opportunities for prayer, and a means to enter into conversation with God. "
