Every day, high performers are tapped to be executives and then left alone to figure out how to succeed in their new role. When this happens, most executives rely on strengths that served them well earlier in their careers. As executive coach Scott Eblin explains, this is why 40 percent of them fail. Moving successfully to the executive level requires knowing which behaviors and beliefs to let go, as well as which new ones to pick up. This confidence-building book outlines a program for success based on frank advice from accomplished senior executives around the world on what to do and, just as important, what to avoid. Like
