Based on years of original research, this book controversially counters almost every existing leadership model and approach. It shows how as leaders rise to senior levels, their roles become less about doing things that directly drive results and more about directing and supporting others to achieve objectives. Using case studies and research insights the authors reveal how leadership success is thus not so much about having the right core capabilities, but about creating the right environment. Using the analogy of a smartphone operating system (OS), the book presents a new way of thinking about leadership. The authors provide a clear and practical framework to follow and show how your leadership OS becomes the impact you have, the imprint you make and the foundation of your legacy as a leader. After reading it, you will learn:

- How to diagnose the impact you have as a leader and understand the OS you create
- How famous business and societal leaders have created effective – and sometimes ineffective – OSs
- How to optimise your OS to produce the best results
- How to get people working together effectively, and be a high-performing leader

Providing you with practical and easy to follow advice, this book will show you how leadership success is not about having the core capabilities, but about creating the right operating systems for your organisation.

The Geek Gap is thoroughly original, virtually unique, of paramount importance and, on top of ALL that, a 'great read.' Bill Pflieger and Minda Zetlin deserve a giant 'Hats off' for this wonderful piece of work. --Tom Peters Business managers (suits) and technology professionals (geeks) have become warring camps in too many companies. While both groups have no trouble following the lingo of their own specialties, when they have to communicate with each other, neither side fully understands-or wants to understand-the other. And that's a big problem in an increasingly technology-dependent business environment where success depends on the smooth integration of both business savvy and technological expertise. Bill Pflieger-a respected computer and Web consultant-and Minda Zetlin-a veteran business writer-explore, in this insightful, witty, and very instructive book, the culture clash that pervades nearly every business-technology interaction. The Geek Gap provides members of both camps a practical guide to working together effectively. Using many real-world examples, the authors vividly illustrate the consequences in time, money, careers, and even lives when these separate cultures fail to communicate. By far the most serious example was the Challenger space shuttle disaster, which was likely the direct

result of an internal clash and lack of communication between NASA's managers and engineers. The authors provide practical solutions for building trust between business and computer professionals. The book is filled with tips aimed at geeks and suits to help each group understand the other, communicate in what amounts to a foreign language, and get what they need to do their jobs effectively. The authors profile companies and individual executives who have successfully bridged the gap by conducting events that bring the two groups together, switching jobs from one area to the other, creating whole new careers as go-betweens, and much, much more. This is the first book to directly address issues of communication and understanding between business and technology people. The Geek Gap-in identifying this problem and providing numerous practical and workable solutions-is an indispensable guide for all. Bill Pflieger (Woodstock, NY) is a computer and Web consultant who writes a regular technology column for the Woodstock Times. With computer experience going back to the early 1970s at IBM, he has also worked for Tripod.com and Lycos Network. Minda Zetlin (Woodstock, NY) is a longtime business writer whose work has appeared in Crain's New York Business, Success!, Management Review, and other publications. She is also the author of Telecommuting for Dummies and co-author of The ASJA Guide to Freelance Writing.
