"A staggering, meticulous and frequently spine-chilling work of longform journalism." Trent Dalton Somewhere deep beneath the wild seas of the southern Indian Ocean, perhaps in the eerie underwater canyons of Broken Ridge along the Seventh Arc satellite band, lies the answer to the world's greatest aviation mystery. Why, on the night of 8 March 2014, did Malaysia Airlines Flight MH370 suddenly U-turn, zig-zag up the Straits of Malacca, then vanish with 239 souls on board? Was it an elaborate murder-suicide by a rogue pilot? A terrible accident such as onboard fire, rapid decompression or systems failure? A terrorist hijacking gone wrong? Or something else entirely? Award-winning journalist Ean Higgins has led the world media's coverage of this incredible saga and draws on years of interviews with aviation experts, victims' families, air crash investigators and professional hunters across land, sea and sky to dissect the riddle of MH370's fate. PRAISE FOR THE HUNT FOR MH370 "The Hunt for MH370 is a riveting page-turner written with the drama and intrigue

of a thriller. Piece by tantalising piece, Ean Higgins unpuzzles this most baffling of mysteries, asking dangerous questions and revealing shocking truths." Dick Smith "The disappearance of MH370 remains the greatest and most pressing mystery in aviation history that demands answers for both the families of the stricken passengers and the travelling public. No journalist has been more relentless in the pursuit of the truth of MH370 than Ean Higgins. The Hunt for MH370 is an engrossing book in which Higgins has meticulously pieced together the puzzle of the doomed flight from its vanishing to the flawed investigation and the largest maritime search ever that leads the reader to a chilling conclusion that is almost impossible to comprehend." *Manual of Pediatric Anesthesia* Causey Enterprises, LLC

Authored by three world experts, this is a clinically focused book on pediatric anesthesia. "The Manual", as it is known, has long dominated the market for a succinct and practical resource on administering anesthesia to children and is used by residents, general anesthesiologists, nurse anesthetists, and pediatric anesthesiologists. This new edition retains the basic structure of the book and is updated throughout. Text-heavy in the current edition, the Seventh Edition features the addition of figures to chapters where they are especially helpful (eg, the chapter on cardiovascular surgery and cardiac procedures) and makes greater use of headings to break up the text and guide reading. From reviews of the Sixth Edition: "This is an extremely well written book that I would recommend highly to anyone involved in anaesthetizing children. It is comprehensive enough to provide an excellent reference for trainees and general anaesthetists who occasionally deal with paediatric cases, while at the same time giving valuable supplemental information for paediatric anaesthetists encountering an unusual procedure or condition. In short, this is a book that would make a welcome addition to any anaesthetist's mobile library." --Anaesthesia
