Ecohouse is an exciting and
timely text that tells you how
to design low energy,

environmentally friendly
buildings today. It also
provides the foundations for
building design in a warming
world, and stepping stones
towards the zero-carbon
emission buildings of
tomorrow. Sue Roaf is famed
for her approach to design and
her awareness of energy
efficiency. Here she reveals the
concepts, structures and
techniques that lie behind the
realization of her ideals. By

using her own house as a case-study Roaf guides the reader through the ideas for energy efficient design or 'eco design'. This guide to the ecohouse also explores 21 case-studies from around the world, from Norway and Sweden to India and Japan, Argentina and Mexico. Chapters by Christopher Day, Katerine Bohn and Andre Viljoen on ecological building materials and methods and a contribution by Robert and Brenda Vale - all experts in this field Ecohouse has a regularly updated companion web site providing further information on all issues relating to Ecohouse and eco design. Log on to www.bh.com/companion/s/ecohouse for a direct link. * Learn about the key issues of form and construction in Eco house design * Gain an understanding of building materials and their energy and environmental impacts - now essential for both student and

This book profiles 12 writing centers that function effectively on their college and university campuses. Following an introduction that provides an overview and suggests ways the book can be used, the centers are examined in detail in the following chapters: (1) "A Multiservice Writing Lab in a Multiversity: The Purdue University Writing Lab" (Muriel Harris); (2) "The Writing Center at

Medgar Evers College: Responding to the Winds of Change" (Brenda M. Greene); (3) "The Writing Centers at the University of Toledo: An Experiment in Collaboration" (Joan A Mullin and Luanne Momenee); (4) "The Lehigh University Writing Center: Creating a Community of Writers" (Edward Lotto); (5) "The Writing Center at the University of Southern California: Couches, Carrels, Computers, and Conversation" (Irene L. Clark); (6) "The Writing Center at Harvard University: A Student Centered Resource" (Linda Simon); (7) "The Writing Center at the University of Puget Sound: The Center of Academic Life" (Julie Neff); (8) "Establishing a Writing Center for the Community: Johnson County Community College" (Ellen Mohr); (9) "Redefining Authority: Multicultural Students and Tutors at the Educational Opportunity Program Writing Center at the University of Washington" (Gail Y. Okawa); (10) "The Land-Grant Context: Utah State University's Writing Center" (Joyce A. Kinkead); (11) "Taking Tutoring on the Road: Utah State University's Rhetoric Associates Program" (Joyce A. Kinkead); and (12) "Moving toward an Electronic Writing Center at Colorado State University" (Dawn Rodrigues and Kathleen Kiefer). The book concludes with two items by Joyce A. Kinkead, an epilogue and an additional article, "The Scholarly Context: A Look at Themes," which offers information on some of the uses of writing labs. (NKA) American Machinist SAGE

In a field dominated by anecdote and folklore, this landmark study integrates more than ten years of intensive research and modern theories of business and economics. The result is a comprehensive framework for understanding entrepreneurship

that provides new and penetrating insights. This clearly and concisely written book is essential for anyone who wants to start a business, for the entrepreneur or executive who wants to grow a company, and for the scholar who wants to understand this crucial economic activity.

Equity and excellence: Jones & Bartlett Learning

`This book is a must for scholars and practitioners

interested in managing work teams in organizations....

Yeatts and Hyten have written an excellent reference work. The book synthesizes a wealth of prior research into a testable model of Self-Managed Work Team performance' - Management Learning`

The work is wide-ranging in its scope but retains a clear focus and coherence throughout.'

International Journal of Public-Private Partnerships

Since the mid-1970s, pressure from international

competition has forced business in the United States to look for better ways to achieve and maintain a competitive position. One popular tool is the self-managed work-team (SMWT). This book provides a thorough examination of SMWT both at the level of theory and at the practical level of when to use work teams to find solutions and how to develop successful teams. By examining the most widely accepted theories of work-team performance, illustrated by 10 case studies from

the areas of manufacturing, public service and health care, the authors define: how high-performing self-managed work teams differ from work groups and short-term teams; the problems which compel an organization to create such teams; the factors which explain successful self-managed work teams; and how to develop high performing cost-effective teams. Writing Centers in Context University Press of Colorado Coaches often say that their coaching is developmental, but what they mean

by this varies significantly. This groundbreaking book introduces a new theory of developmental coaching and a new framework for coaching practice. It explores the most puzzling and debated aspects of human nature, such as 'self', 'free will' and 'psychological evolution' - and then introduces both a new theory of developmental coaching and a new framework for coaching practice. Tatiana Bachkirova addresses highly debated and complex ideas with ease and explains their relevance to everyday living and helping people to move forward in their lives. To make these ideas real for coaches the book is written in a clear and engaging way with examples, illustrations, exercises and case studies. Coaches who wish to enrich their practice will find plenty to learn, reflect on and apply immediately in their client engagements. Coaches who see their own self as a crucial element of a coaching encounter will have an opportunity to

explore and enhance their own developmental process. Students of advanced coaching programmes will find this book both intellectually stimulating and a useful resource for practice.

`An excellent overview of the development in thinking about play, based on research into different aspects of play...This book enables the reader to not only access, and engage with developing theories and ideas, but also provides practical ideas and examples that have been tried and tested in the classroom. This book should be compulsory reading for every teacher of young children who are interested in developing their practice to provide

a stimulating, active and playful environment with their children in which effective learning and positive attitudes are developed' - Bernadette Hancock, Headteacher of Christ the King Primary School, Cardiff `One of the major strengths of the book is that it makes some complex theory highly accessible to its audience....This makes it an excellent introductory book for use on inservice and undergraduate programs' - Sue Rogers, Institute of Education `This

book aims to improve the quality of play in "educational" settings. It will be valuable for a wide range of practitioners' - Nursery World `In this new and updated edition of an outstanding book, Wood and Attfield once again demonstrate how young children make meaning, and construct knowledge, through play. They combine an informed discussion of the 'ideological tradition' of the early childhood pioneers, which continues to underpin most

contemporary provision, with a refreshing openness to the new insights provided by recent research, and the new opportunities offered by the Foundation Stage era. Their unrivalled explanation of the links between theorists, such as Vygotsky, and classroom provision for play, is now expanded through considerations of recent findings in neuroscience, and a renewed awareness of the sociocultural contexts of childhood, as well as by studies which acknowledge the

importance of boisterous, rough-and-tumble, play activities for children's development. And throughout, they remind readers and practitioners of the important distinction between play as a spontaneous activity of children ('play as such'), and the play which educators offer as a medium for learning' - Elizabeth Brooker, Course Leader: MA in Childhood Studies, Institute of Education 'This book provides a thorough and up-to-date overview of

the topical issue of teaching and learning through play. Chapters cover issues including assessment through play, the role of adults in children's play, the impact of play on social and emotional learning and how to develop a whole-school approach to learning through play. ...This book is theoretical and detailed but extremely interesting and there is certainly practical information to be found in it' - Early Talk This timely Second

Edition explores recent developments which strongly endorse play as an integral part of the curriculum. The content has been fully revised to reflect contemporary thinking about the role and value of play in early childhood and beyond. A key focus is the provision of a secure theoretical and practical grounding for developing a pedagogy of play. In the first section, the authors provide an overview of recent developments in education policies, and reviews of

research into different aspects of play. In the second section, the emphasis is on classroom practice, specifically: organizing and developing play with particular reference to the Foundation Stage and Key Stage 1; establishing progression and continuity with Key Stage 1; assessing children's learning through play; the role of adults in children's play; using the plan-do-review approach to integrate child-initiated and adult-directed play; the importance of socio-dramatic play for

children's social and emotional learning; and developing a whole-school play ethos. This book enables practitioners to create unity between play, learning and teaching, and to improve the quality of children's learning. New material provided by practitioners has been added, to show how this unity can be successfully achieved. This is an essential text for students of education. It is highly recommended to those undertaking degrees in Childhood Studies and those

on Initial Teacher Training programmes in early years and primary education. Food Arts National Academies Press "[This book is] the most authoritative assessment of the advantages and disadvantages of recent trends toward the commercialization of health care," says Robert Pear of The New York Times. This major study by the Institute of Medicine examines virtually all aspects of for-profit health care in the United States, including the quality and availability of health care, the

cost of medical care, access to financial capital, implications for education and research, and the fiduciary role of the physician. In addition to the report, the book contains 15 papers by experts in the field of for-profit health care covering a broad range of topics"from trends in the growth of major investor-owned hospital companies to the ethical issues in for-profit health care. "The report makes a lasting contribution to the health policy

literature." "Journal of Health Politics, Policy and Law. Bureau of Mines Research John Wiley & Sons

This book presents the scientific principles, processing conditions, probable failure mechanisms, and a description of reliability performance and equipment required for implementing high-temperature and lead-free die attach materials. In particular, it addresses the use of solder alloys, silver and copper sintering, and transient liquid-phase sintering. While different solder alloys have been used widely in the microelectronics industry, the implementation of

sintering silver and transient liquid-phase sintering remains limited to a handful of companies. Hence, the book devotes many chapters to sintering technologies, while simultaneously providing only a cursory coverage of the more widespread techniques employing solder alloys. Addresses the differences between sintering and soldering (the current die-attach technologies), thereby comprehensively addressing principles, methods, and performance of these high-temperature die-attach materials; Emphasizes the industrial perspective, with chapters written by engineers who have hands-on experience using these

technologies; Baker Hughes, Bosch and ON Semiconductor, are represented as well as materials suppliers such as Indium; Simultaneously provides the detailed science underlying these technologies by leading academic researchers in the field.

Researching Writing

Researching Writing is an accessible, informative textbook that teaches undergraduates how to conduct ethical, authentic research in writing studies. The book introduces students to the research approaches used most often and offers a course framework for professors creating or teaching research courses themselves. Author Joyce Kinkead lays out the research

process, including finding and defining questions, planning, and starting the research. Expository content introduces the language and methods of writing research, and specific methods are demonstrated in published examples, illustrating student work using student work and showing that it is possible for students to join the scholarly conversation in writing studies. Other features include student activities, instructor resources, student resources, and links to external content on journal websites, digital publications, YouTube, and similar work. The first-ever textbook for research methods in writing studies for undergraduates, Researching Writing takes a hands-on

approach that excites and engages students in the depth and complexities of research and will influence the creation of courses in new writing majors as the field continues to grow.
