Fueled by media reports of gender bias in the schools, the debate over single sex education has been recently renewed. "Voices of Hope" asks for a reconsideration of the framing of that debate. For whom is single sex education better? For the attainment of which goals? What do girls gain by being schooled with male peers? What is lost? In this longitudinal study of more than fifty high school girls at four New England independent schools, Carole B. Shmurak follows their development from ninth grade through the first year of college. Case studies capture the girls' own voices as they describe their hopes for their futures and the events that subsequently affect those futures.

[\(Books for Kids: Football Story for Boys 7-12\)](#) Bob and Tom Get a Dog"Siblings Bob and Tom get a dog with spots. This A-level story uses decodable text to raise confidence in early readers. The book uses a combination of sight words and short-vowel words in repetition to build recognition. Original illustrations help guide readers through the text."--Basic Electrical and Electronics Engineering:

Analytical Dynamics presents a fair and balanced description of dynamics problems and formulations. From the classical methods to the newer techniques used in today's complex and multibody environments, this text shows how those approaches complement each other. The text begins by introducing the reader to the basic concepts in mechanics. These concepts are introduced at the particle mechanics level. The text then extends these concepts to systems of particles, rigid bodies (plane motion and 3D), and lightly flexible bodies. The cornerstone variational principles of mechanics are developed and they are

applied to particles, rigid bodies, and deformable bodies. Through this approach, students are exposed to a natural flow of the concepts used in dynamics.
