First published in 1927 by the
Building Research Station, this
volume provides a classification
of lime and a complete review of
its various uses in building
construction and repair. This
facsimile edition should be of
interest and of practical value
since the methods, terminology and

practices detailed by Cowper are
still valid today. A brief
historical introduction to the
subject is followed by a section on
the process of lime burning which
emphasizes the differences in
behaviour of the various classes of
limes. The results of research and
tests to determine the most
reliable and lasting limewashes and
lime-based cold water paints are
also detailed. In addition, the
book provides useful information on
the common problems occurring with
lime plasters and how these can be
solved. The classifications based
and suggested applications in the
book offer guidelines for the
conservation practitioner.

Is secularism a positive force in the modern world? Or does it lead to fragmentation and disintegration? In *Saving Leonardo*, best-selling award-winning author Nancy Pearcey (Total Truth, coauthor *How Now Shall We Live?*) makes a compelling case that secularism is destructive and dehumanizing. Pearcey depicts the revolutionary thinkers and artists, the ideas and events, leading step by step to the unleashing of secular worldviews that undermine human dignity and liberty. She crafts a fresh approach that exposes the real-world impact of ideas in

philosophy, science, art, literature, and film--voices that surround us in the classroom, in the movie theater, and in our living rooms. A former agnostic, Pearcey offers a persuasive case for historic Christianity as a holistic and humane alternative. She equips readers to counter the life-denying worldviews that are radically restructuring society and pervading our daily lives. Whether you are a devoted Christian, determined secularist, or don't know quite where you stand, reading *Saving Leonardo* will unsettle established views and topple ideological idols. Includes more than 100 art reproductions and illustrations that bring the book's themes to life. Praise for *Saving*

Leonardo: "A feast for the mind and "G. K. Chesterton said 'the danger for the eye. Nancy Pearcey not only when Men stop believing in God is is a trustworthy guide for a not that they'll believe in nuanced discussion on the nothing; but that they will believe relationship between culture and in anything.' Makoto Fujimura, artist and impacting work!" Cal Thomas, author of Refractions: A Journey of syndicated and USA Today columnist Faith, Art, and Culture "Nancy Pearcey has done it again and generation of evangelicals to better than ever. She has taken the understand the worldview challenges complex sophistication of the best we now face and to develop an cultural analysis and laid it out intelligent and articulate for any person to grasp, enjoy and Christian understanding . . . use to live out their daily lives Saving Leonardo should be put in honoring Christ. An astounding the hands of all those who should accomplishment!" James W. Sire, always be ready to give an author of The Universe Next Door answer--and that means all of us."

R. Albert Mohler, Jr., president, The Southern Baptist Theological Seminary "Nancy Pearcey is an intellectual prophet in our day and one of Evangelicalism's foremost cultural observers. Saving Leonardo is a tour de force. In it, Pearcey provides a penetrating analysis of the nature of contemporary secularism, a helpful exposition of how we got to the present situation, and a well-crafted strategy for changing the situation. This is her best effort yet . . . a must read." J. P. Moreland, distinguished professor of Philosophy, Biola University and author of The God Question "Nancy Pearcey is unsurpassed in the current generation of Christian thinkers . . . The magic continues with this book. Pearcey's virtues as a writer and thinker are once again fully evident in the range of material that she has mastered, the encyclopedic collection of data that she presents, and the analytic rigor with which she separates truth from error in worldviews. She is a prophetic voice for contemporary Christians." Leland Ryken, Clyde S. Kilby professor of English, Wheaton College "Brilliant . . . The book brings complex, abstract ideas down-to-earth -- or rather, down-to-life. . . . Saving Leonardo bridges the gaps between the arts and the sciences, the theoretical and the practical. The book not only argues for the unity of Christian truth but exemplifies that unity and shows it in action."

Henry Ford's Model T forever

changed the world. The car made "for the great multitude" (as Ford put it) first debuted in 1908 and proved so affordable and so popular that fifteen million were sold through 1927. The "Tin Lizzie" was the first automobile to be mass-produced on moving assembly lines, and built using interchangeable parts. It proved tough and reliable in everyday use, and cheap enough to spawn the automobile revolution: the car cost \$850 in 1909 but amazingly by the 1920s, the price had dropped to a mere \$260 due to the perfection of production techniques and economy of scale.

Designed by a team that included Childe Harold Willis, Joseph Galamb and Eugene Farkas, the Model T had a front-mounted four-cylinder engine that produced 20 hp and had a top speed of 45 mph. It was a rear-wheel drive vehicle with wooden wheels, and featured a two-speed transmission plus a reverse gear. Although models varied - and many revisions took place over two decades of production - the original version weighed about 1200 pounds. Created in the 1920s and featuring information about the original Model T and the "New Model T" of 1925, this maintenance manual is

an invaluable resource. It was originally intended to educate the men tasked with assembling, repairing and maintaining the Model T, and offers a plethora of information about the car, its design and operation. The text includes chapters on how to take apart and put together the car, how to overhaul the engine and transmission, valve grinding and carbon removal, rod bearings, fitting pistons and rings, correcting noisy timing gears, installation of camshaft bearings, cleaning oil lines, oil leaks, transmission band installation, axle overhauls, refurbishing and replacing springs, radiator repair, starting motor overhaul, and more. It also includes troubleshooting and general servicing information. A must have for any Model T owner, this book is also a terrific reference for the docent, historian, or anyone who ever wondered, "how did that work?"

There is renewed interest among art photographers in a number of historic printing techniques because of the remarkable effects they produce. The reader will discover how to create beautifully tinted mono- and polychromatic gum and oil images using the author's version of this 19th century technique. Step-by-step

illustrated instructions with directions for further experimentation provide a perfect source for learning this new, yet old, printing technique. Gumoil printing involves contact-printing a positive transparency onto gum-coated paper. Oil paint is then applied and rubbed into nongummed areas of the print. With bleach etching, mono- and polychromatic variations are possible. A chapter on digital printing combines the new and the historic, making this technique even more accessible for the art photographer.
