Corrupting the Image 2 Knopf Books for Young Readers
Despite decades of attention on building a global HIV research and programming agenda, HIV in older populations has generally been neglected until recently. This new book focuses on HIV and aging in the context of ageism with regard to prevention, treatment guidelines, funding, and the engagement of communities and health and social service organizations. The lack of perceived HIV risk in late adulthood among older people themselves, as well on the part of providers and society in general, has led to a lack of investment in education, testing, and programmatic responses. Ageism perpetuates the invisibility of older adults and, in turn, renders current medical and social service systems unprepared to respond to patients' needs. While ageism may lead to some advantages – discounts for services, for example – it is the negative aspects that must be addressed when determining the appropriate community-level response to the epidemic.

The series provides a comprehensive forum for publications in linguistics covering the entire range of language, including its variation and variability in space and time, its acquisition, theories on the nature of human language in general, and descriptions of individual languages. The series welcomes publications addressing the state of the art of linguistics as a whole or of specific subfields, and publications that offer challenging new approaches to linguistics. This volume is the first one to illuminate diverse aspects of word formation from cognitive perspectives. Guided by methodological pluralism, the contributions shed light on a variety of issues in word formation theory and on the interfaces between word formation and phraseology, phonology, and inflection. The majority of the studies focuses on individual types of word formation, reframing our understanding of these processes. Overall, the various contributions add to a yet marginal body of research in cognitive word formation and advance our awareness about the benefits

of applying cognitive linguistic thoughts for investigating processes of lexical creation.

The Bible and ancient near eastern texts reveal in stunning detail how under the guise of his ancient aliases, Satan directed angels to descend on Mt Hermon to create a race of hybrids, how he raised up one called "Lord of the earth" who was the first and foremost post-flood hybrid, and how he attempted to open the abyss and release his army to ensure his unending reign upon the earth.

All Men Want to Know The Maid

"Kearney is one of the most exciting thinkers in the English-speaking world of continental philosophy.... and [he] joins hands with its fundamental project, asking the question 'what/or who' comes after the God of metaphysics?" -- John D. Caputo Engaging some of the most urgent issues in the philosophy of religion today, in this lively book Richard Kearney proposes that instead of thinking of God as 'actual,' God might best be thought of as the possibility of the impossible. By pulling away from biblical perceptions of God and breaking with dominant theological traditions, Kearney draws on the work of Ricoeur, Levinas, Derrida, Heidegger, and others to provide a surprising and original answer to who or what God might be. For Kearney, the intersecting dimensions of impossibility propel religious experience and faith in new directions, notably toward views of God that are unforeseeable, unprogrammable, and uncertain. Important themes such as the phenomenology of the persona, the meaning of the unity of God, God and desire, notions of existence and difference, and faith in philosophy are taken up in this penetrating and original work. Richard Kearney is Professor of Philosophy at Boston College and University College, Dublin. He is author of many books on modern philosophy and culture, including Dialogues with Contemporary Continental Thinkers, The Wake of Imagination, and The Poetics of Modernity.

A bold and urgent perspective on how American foreign policy must change in response to the shifting world order of the twenty-first century, from the New York Times bestselling author of The Limits of Power and The Age of Illusions. The purpose of U.S. foreign policy has, at least theoretically, been to keep Americans safe. Yet as we confront a radically changed world, it has become indisputably clear that the terms of that policy have failed. Washington's insistence that a

market economy is compatible with the common good, its faith in the idea of the “West” and its “special relationships,” its conviction that global military primacy is the key to a stable and sustainable world order—these have brought endless wars and a succession of moral and material disasters. In a bold reconception of America’s place in the world, informed by thinking from across the political spectrum, Andrew J. Bacevich—founder and president of the Quincy Institute for Responsible Statecraft, a bipartisan Washington think tank dedicated to foreign policy—lays down a new approach—one that is based on moral pragmatism, mutual coexistence, and war as a last resort. Confronting the threats of the future—accelerating climate change, a shift in the international balance of power, and the ascendance of information technology over brute weapons of war—his vision calls for nothing less than a profound overhaul of our understanding of national security. Crucial and provocative, After the Apocalypse sets out new principles to guide the once-but-no-longer sole superpower as it navigates a transformed world.

Geeger the Robot Goes to School Bloomsbury Publishing

A New York Times Book Review Notable Book of 2017 An electrifying first collection from one of the most exciting short story writers of our time "I can't recall the last time I laughed this hard at a book. Simultaneously, I'm shocked and scandalized. She's brilliant, this young woman."—David Sedaris Ottessa Moshfegh's debut novel Eileen was one of the literary events of 2015. Garlanded with critical acclaim, it was named a book of the year by The Washington Post and the San Francisco Chronicle, nominated for a National Book Critics Circle Award, short-listed for the Man Booker Prize, and won the PEN/Hemingway Award for debut fiction. But as many critics noted, Moshfegh is particularly held in awe for her short stories. Homesick for Another World is the rare case where an author's short story collection is if anything more anticipated than her novel. And for good reason. There's something eerily unsettling about Ottessa Moshfegh's stories, something almost dangerous, while also being delightful, and even laugh-out-loud funny. Her characters are all unsteady on their feet in one way or another; they all yearn for connection and betterment, though each in very different ways, but they are often tripped up by their own baser impulses and existential insecurities. Homesick for Another World is a master class in the varieties of self-deception across the gamut of individuals representing the human condition. But part of the unique quality of her voice, the echt Moshfeghian experience, is the way the grotesque and the outrageous are infused with tenderness and compassion. Moshfegh is our Flannery O'Connor, and Homesick for Another World is her Everything That Rises Must Converge or A Good Man is Hard to Find. The flesh is

weak; the timber is crooked; people are cruel to each other, and stupid, and hurtful. But beauty comes from strange sources. And the dark energy surging through these stories is powerfully invigorating. We're in the hands of an author with a big mind, a big heart, blazing chops, and a political acuity that is needle-sharp. The needle hits the vein before we even feel the prick.
