Even the smartest among us can feel inept as we fail to figure out which light switch or oven burner to turn on, or whether to push, pull, or slide a door. The fault, argues this ingenious—even liberating—book, lies not in ourselves, but in product design that ignores the needs of users and the principles of cognitive psychology. The problems range from ambiguous and hidden controls to arbitrary relationships between controls and

functions, coupled with a lack of feedback or other assistance and unreasonable demands on memorization. The *Design of Everyday Things* shows that good, usable design is possible. The rules are simple: make things visible, exploit natural relationships that couple function and control, and make intelligent use of constraints. The goal: guide the user effortlessly to the right action on the right control at the right time. In this entertaining and insightful analysis, cognitive scientist Don Norman hails the excellence of design as the most important key to regaining the competitive edge in influencing consumer behavior. Now fully expanded and updated, with a new introduction by the author, *The Design of Everyday Things* is a powerful primer on

At last, a cookbook about pasta-making that covers all kinds of pasta machines—both manual and electric, and also stand-mixer pasta attachments—and that delivers foolproof recipes sure to make you an expert noodle master in no time! Homemade pasta is

easy, fast, and fun. It tastes better than boxed pastas from the store. And, while-store-bought pastas do indeed come in a variety of shapes, they all have basically one bland and unexciting flavor; by contrast, as this wide-ranging and deliciously inventive book shows, making pasta by hand at home lets you create and enjoy dozens and dozens of different flavors of noodles. In her previous books—on such subjects as searing, marinating, and cast-iron cooking—chef, cooking teacher, and food blogger Lucy Vaserfirer has earned a reputation for expertly and gently translating the methods of master chefs into simple-to-follow, step-by-step instructions that let home cooks cook like the pros. Here, Lucy does the same for pasta-making, showing you how easy it is to use a sheeter or an extruder of any type,

---

manual or electric, to create tasty pastas that will please everyone from grown-up gourmands to picky kids who want pasta at nearly every meal. Lucy shares in these pages terrific purees that you can make, using a blender or a mixing bowl, that you then can turn into all sorts of flavored pastas, from the familiar tomato or spinach pastas to noodles flavored with herbs like basil or tarragon, spices like pepper or saffron, and other flavors, such as a Sage Brown Butter Pasta that incorporates a flavored butter. She teaches you how to make every kind of pasta shape with your pasta machine, including ones you can't find in stores. She includes durum and semolina pastas, the most common kinds, as well as buckwheat, ancient-grain, and gluten-free pastas. She even shows how to make

Asian noodles, such as udon, soba, and ramen, with your pasta machine. Whether you are a first-time owner of a pasta maker or a seasoned pro looking for exciting new ideas, this book has more than 100 splendid recipes, plus loads of clever tips and tricks, that will make you love your pasta machine and use it often.

Since the 1960s, the class action lawsuit has been a powerful tool for holding businesses accountable. Yet years of attacks by corporate America and

unfavorable rulings by the Supreme Court have left its future uncertain. In this book, Brian T. Fitzpatrick makes the case for the importance of class action litigation from a surprising political perspective: an unabashedly conservative point of view. Conservatives have opposed class actions in recent years, but Fitzpatrick argues that they should see such litigation not as a danger to the economy, but as a form of private enforcement of the law. He starts from the premise that all of us, conservatives and libertarians included, believe that markets need at least some rules to thrive, from laws that enforce contracts to laws that prevent companies from committing fraud. He also reminds us that conservatives consider the private sector to be superior to the government in most areas. And the relatively little-discussed intersection of those two beliefs is where the benefits of class action lawsuits become clear: when corporations commit misdeeds, class action lawsuits enlist the private sector to intervene, resulting in a smaller role for the government, lower taxes, and, ultimately, more

---

effective solutions. Offering a novel argument that will surprise partisans on all sides, The Conservative Case for Class Actions is sure to breathe new life into this long-running debate.
