The Chainsaw Operator's Manual is an essential safety tool for chainsaw operators. It is the ultimate guide to basic chainsaw operating techniques covering safety, maintenance and cross-cutting, but not tree felling. Detailed diagrams illustrate horizontal, vertical and boring cuts, as well as trimming and cross-cutting techniques. Safety considerations are discussed, including workplace safety, occupational hazards, kick-back and identifying dangerous trees. An explanation of the 'tension' and 'compression' forces in timber is also provided to help you understand where to begin cutting to avoid jamming the saw. The book covers chainsaw maintenance in

detail, explains all aspects of the equipment and helps you select the right chainsaw and personal protection equipment for your needs. Trouble-shooting charts are included to help you solve operating problems. This manual has been updated to take into account the most recent changes in nationally accredited competency standards. It is a must-have for anyone operating a chainsaw.

Introducing a NEW addition to our growing library of computer science titles, Algorithm Design and Applications, by Michael T. Goodrich & Roberto Tamassia! Algorithms is a course required for all computer science majors, with a strong focus on theoretical topics. Students enter the course after gaining hands-on experience with computers, and are expected to learn how algorithms can be applied to a variety of contexts. This new book integrates application with theory. Goodrich & Tamassia believe that the best way to teach algorithmic topics is to present them in a context that is motivated from applications to uses in society, computer games, computing industry, science, engineering, and the internet. The text teaches students about designing and using algorithms, illustrating connections between topics being taught and their potential applications, increasing engagement.

At last, a cookbook about pasta-making that covers all kinds of pasta machines—both manual and electric, and also stand-mixer pasta attachments—and that delivers foolproof recipes sure to make you an expert noodle master in no time! Homemade pasta is easy, fast, and fun. It tastes better than boxed pastas from the store. And, while-store-bought pastas do indeed come in a variety of shapes, they all have basically one bland and unexciting flavor; by contrast, as this wide-ranging and deliciously inventive book shows, making pasta by hand at home lets you create and enjoy dozens and dozens of different flavors of noodles. In her previous books—on such subjects as searing, marinating, and cast-iron cooking—chef, cooking teacher, and food blogger Lucy Vaserfirer has earned a reputation for expertly and gently translating the methods of master chefs into simple-to-follow, step-by-step instructions that let home cooks cook like the pros. Here, Lucy does the same for pasta-making, showing you how easy it is to use a sheeter or an extruder of any type, manual or electric, to create tasty pastas that will please everyone from grown-up gourmards to picky kids who want pasta at nearly every meal. Lucy shares in these pages terrific purees that you can make, using a blender or a mixing bowl, that you then can turn into all sorts of flavored pastas, from the familiar tomato or spinach pastas to noodles flavored with herbs like basil or tarragon, spices like pepper or saffron, and other flavors, such as a Sage Brown Butter Pasta that incorporates a flavored butter. She teaches you how to make every kind of pasta shape with your pasta machine, including ones you can't find in stores. She includes durum and semolina pastas, the most common kinds, as well as buckwheat, ancient-grain, and gluten-free pastas. She even shows how to make Asian noodles, such as udon, soba, and ramen, with your pasta machine. Whether you are a first-time owner of a pasta maker or a seasoned pro looking for exciting new ideas, this book has more than 100 splendid recipes, plus loads of clever tips and tricks, that will make you love your pasta machine and use it often.
