Falling into the Lesbi World offers a compelling view of sexual and gender difference through the everyday lives of tombois and their girlfriends ("femmes") in the city of Padang, West Sumatra. Tombois are masculine females who identify as men and desire women; their girlfriends view themselves as normal women who desire men. Through rich, in-depth, and provocative stories, author Evelyn Blackwood shows how these same-sex Indonesian couples negotiate transgressive identities and desires and how their experiences speak to the struggles and desires of sexual and gender minorities everywhere.

This book is the culmination of educational know-how and systematic grammar organization acquired by the three authors from their experience actually teaching Korean to foreigners in the classroom. In focusing strictly on Korean grammar, this series represents a departure from most current integrated teaching materials, allowing foreign learners to more easily concentrate on grammar in their study of

Korean. The authors have included real dialogues and illustrations to make the study of Korean more interesting, especially for those students who have heretofore felt Korean grammar to be difficult. Further, this series equally serves as a general Korean grammar reference that can be used by Korean language instructors both in Korea and abroad who regularly experience the difficulty of teaching Korean grammar first-hand.

The author has maintained two open-source MATLAB Toolboxes for more than 10 years: one for robotics and one for vision. The key strength of the Toolboxes provide a set of tools that allow the user to work with real problems, not trivial examples. For the student the book makes the algorithms accessible, the Toolbox code can be read to gain understanding, and the examples illustrate how it can be used —instant gratification in just a couple of lines of MATLAB code. The code can also be the starting point for new work, for researchers or students, by writing programs based on Toolbox functions, or modifying the Toolbox code itself. The purpose of this book is to expand on the tutorial material provided with the toolboxes, add many more examples, and to weave this into a narrative that covers robotics and computer vision separately and together. The author shows how complex problems can be decomposed and solved using just a few simple lines of code, and hopefully to inspire up and coming researchers. The topics covered are guided by the real problems observed over many years as a practitioner of both robotics and computer vision. It is written in a light but informative style, it is easy to read and absorb, and includes a lot of Matlab examples and figures. The book is a real walk through the fundamentals of robot kinematics, dynamics and joint level control, then camera models, image processing, feature extraction and epipolar geometry, and bring it all together in a

visual servo system. Additional material is provided at <http://www.petercorke.com/RVC>

Korean Grammar in Use - Beginning (English ver.) ( ) Pacific Islands Monograph Korean is the seventh most commonly spoken language in the United States, and Korean heritage students — those with some proficiency in or a cultural connection to the language through family or community — make up a substantial portion of Korean learners at the college level. Many schools offer a separate heritage track for learning Korean, but until now there has been no textbook designed specifically for heritage learners as well as the increasing number of students from diverse backgrounds who are interested in pursuing intensive learning to build on their prior experience with Korean. Integrated Korean: Accelerated 1 and 2 directly address the linguistic needs and abilities of heritage and accelerated learners in a single academic year. Volume 1 presents lessons on thematically organized subjects, starting with familiar topics such as family, friends, daily routines, schoolwork, campus activities, dining out, and shopping. Volume 2 advances to more formal subjects beyond family and friends, such as travel, transportation, housing, holidays, lifestyles, careers, and Korean history and culture. Students approach the lessons with multilevel communicative classroom activities and reading materials with standards-based exercises and projects that not only focus on the particular language requirements of heritage learners, but also encourage them to participate more fully in their own family and community life. Each volume 's textbook and workbook offer authentic conversations and texts in both informal and formal contexts, structured tasks, and a wealth of interesting and relevant cultural content. Integrated Korean is a project of the Korean Language Education and Research Center (KLEAR) with the support of the Korea Foundation. In addition to the five-level Integrated Korean textbooks and workbooks, volumes include Korean Composition, Korean Language in Culture and Society, Korean Reader for Chinese Characters, Readings in Modern Korean Literature, A Resource for Korean Grammar Instruction, and Selected Readings in Korean. Intended as a companion to the popular KLEAR Textbooks in Korean Language series and designed and edited by a leading Korean linguist, this is the first volume of its kind to treat specifically the critical role of language in Korean culture and society. An introductory chapter provides the framework of the volume, defining language, culture, and society and their interrelatedness and presenting an overview of the Korean language vis-à-vis its culture and society from evolutionary and dynamic perspectives. Early on, contributors examine the invention and use of the Korean alphabet, South Korea's "standard language" vs. North Korea's "cultured language," and Korean in contact with Chinese and Japanese. Several topics representative of Korean socio-cultural vocabulary (sound symbolic words, proverbs, calendar-related terms, kinship terms, slang expressions) are discussed, followed by a consideration of Korean honorifics and other related issues. Two chapters on Korean media, one on advertisements and the other a comparative analysis of television ads in Korea, Japan, and the U.S., follow. Finally, contributors look at salient features of the language, narrative structure, and dialectal variation. All chapters are accompanied by a set of student questions and a useful bibliography. A beginning level of proficiency in Korean is sufficient to digest the Korean examples with facility, making this volume accessible to a wide range of students. Contributors: Andrew S. The Korean alphabet, commonly known as han'gul, has been called one of the greatest

---

intellectual achievements of humankind. Experts agree that few writing systems can match its simplicity and efficiency, its elegance and intelligence. The only alphabet completely native to East Asia, han'gul distinguishes itself among writing systems of the world with its scientific qualities and unusual linguistic fit to the Korean language. Most strikingly, the theoretical underpinnings of the language, as well as the time and circumstances of its creation, are clearly known and recorded. Han'gul was invented in 1443 and promulgated in 1446 by King Sejong (1418-1450), sage ruler of the Yi dynasty (1392-1910). This volume, the first book-length work on han'gul in English by Korean-language specialists, is comprised of ten essays by the most active scholars of the Korean writing system. An instructive commentary by eminent linguist Samuel Martin follows, offering perceptive comments on the essays as well as a discussion on Martin's own research findings on the script.
